AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2856. Yaesu FT-60 Stock Antenna Replacement

Yahoo group: Queen_Creek_Hams
Date: 2014-04-20 22:20:06 UTC
From: Stephen Knab
Topic: 2856 Message: 2856

I think we have a lot of FT-60 HTs in the group and I’m looking for a recommendation on a better antenna than the stock one for portable use.

I've been using a Diamond SRH77CA (15 in) with a MFJ-310 Window Mount Clip for the car that works great, but seems too long for portable use.

Thanks,

Steve Knab

2857. Re: [Queen_Creek_Hams] Yaesu FT-60 Stock Antenna Replacement

Yahoo group: Queen_Creek_Hams
Date: 2014-04-20 23:36:48 UTC
From: Tom Hurst
Topic: 2856 Message: 2857

Hi Steve,

I use the same one on a ICOM. It is a little long but made a big difference when we had the regional exercise people that had smaller antennas could not always get reliable reception or transmission.

Not sure about any smaller ones but just thought I'd throw that out there

2860. Important: Field Day 2014 to be Held in Queen Creek!

Yahoo group: Queen_Creek_Hams
Date: 2014-04-21 05:42:35 UTC
From: Joe Sammartino
Topic: 2860 Message: 2860

QST QST QST

Great News!

The Queen Creek Amateur Radio Club and Queen Creek Emergency Communications Group will hold their annual Field Day event right in Queen Creek this year!

You can now participate, visit, observe - whatever - without having to travel out of the area. This should be easy on your schedule and give many more people the opportunity to enjoy the event.

The Town and local Boys Club will allow the use of the *air conditioned*building in Founder's Park.

That is the same location that we had our first Field Day event in 2012.

If you are not familiar with Field Day, visit this link to learn more:

https://www.arrl.org/field-day

The actual event will begin on Saturday, June 28th at 11 AM and run continuously until Sunday, June 29th at 2 PM.

We will begin setting up our antennas and stations at 7 AM on Saturday morning.

We will need operators, set-up and take-down, demonstrators, and much more. There will be much more information to come.

Regards,

Joe

Arizona Emergency Net - Maricopa
Monday April 21, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Joe,

You had me at 'air conditioned'. :)

Things are stabilizing here at home front so I'm in!

To be determined....We are thinking three at the moment - 2 HF, and 1 GOTA.
It is also very dependent on the number of operators we get to volunteer.

My preference would be 4 total - 1 HF phone, 1 HF CW, 1 HF Digital, and the
GOTA station.

We will post a more detailed description of the event and necessary
participation soon.

Joe

2865. Next visible pass of the International Space Station is this evening

Yahoo group: Queen_Creek_Hams
Date: 2014-04-24 17:06:55 UTC
From: Joe Sammartino
Topic: 2865 Message: 2865
Attachments: 1 described; binary payloads are missing from this source WARC

Hi Folks,

It looks like the next visible pass of the International Space Station is this evening and should be very good.

Time: Thu Apr 24 8:01 PM

Visible: 4 min

Max Height: 57 degrees

Appears: NNW, that's 337.5 degrees

Disappears: ESE, that's 112.5 degrees

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

The attached graphic will help you to find the ISS using the information above.

Regards,

Joe

2868. RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

Yahoo group: Queen_Creek_Hams
Date: 2014-04-24 20:11:57 UTC
From: Joe Sammartino
Topic: 2818 Message: 2868

RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB
- and replicate this recipe several times over in the Valley at the same time

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio - while exercising emergency simplex communications throughout the Valley.

Where and When? (Queen Creek and Mesa)

April 26th, 2014, From 10 AM till 2 PM.

We have two local RUSS / RITP planned. Dennis, KF7RYX will host his event at the picnic pavilion at Remington Heights park near the intersection (just East) of South 198th Street and East Emperor Road. Here is a link to a map of the location:

http://tinyurl.com/KF7RYX-RITP <http://tinyurl.com/KF7RYX-RITP>

If you are looking for an event to visit closer to MESA, Doug, WB7TUJ, will host RUSS / RITP in Mesa at the same time.

Here is a link to a map of Doug's location:

http://tinyurl.com/DougRUSS <http://tinyurl.com/DougRUSS>

Questions?

Just respond to this message or send me a private email.

I will also post a link to the
APRS.fi<http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP_Den%2Ca%2FRUSS_Doug&timerange=3600&tail=3600>website
Friday night since these events will beacon as objects for all hams
to see so they can navigate directly to them.

Regards,

Joe

Sounds like fun. I haven't made a RUSS yet. Depending on the weather and how frisky I'm feeling maybe I'll ride my bike over from my house (5 miles).

Any other road bikers out there want to try to meet up and 'ride' in? (was Jay the guy with the recumbent bike that rode into QC Ham breakfast one day last year?)
Would it be completely insane to ride from location to location? (only 15.5 miles).
Gives me an excuse to get the earpiece for my HT. ;)

Yep it was me, i have biked to a few breakfasts and one of the "older" Radios in the park event.
Sorry to say I am several thousands of miles away for work and will miss this one.

15 miles, I say go get the ht headset and enjoy the great biking weather!

My ride to breakfast is about 13 miles each way for the breakfast gatherings which allows me to eat a bit more at breakfast. :-)

(Note, I have found that the headset that comes with the Baofeng ht is really good with that ht and all of the Kenwoods that have the same plug style.) On the bike you will have wind noise, but you will have that with any mic if you are using it while moving on the bike.

2871. Gear for operating remotely: Solar Panel, Charger, Battery, HF Antenna

Yahoo group: Queen_Creek_Hams
Date: 2014-04-24 23:58:44 UTC
From: <kf7mca@...>
Topic: 2871 Message: 2871

I started doing some thinking about getting the gear so I can run on battery power (for emergency prep and for recreational remote operation).

I'm thinking about starting with a battery and a charger and then adding a solar panel later.

I found the following charger which looked perfect (website answered all my questions too) but it is discontinued:
http://www.a-aengineering.com/1smartcharger.htm
http://www.a-aengineering.com/1smartcharger.htm

Also, I'm having issues operating at home (long story) so I probably need to trick out my minivan so I can drive somewhere, quickly set up and operate for a while. Might be the only way I can play for the next year or so.

Maybe @ RUSS this weekend I can bend someones ear about this?

Thanks,
Rick
kf7mca

Thanks Jay!

;)

Yeah, I've tried taking a couple conference calls for work on my bike and that was a fail. ;)
I'm going to pick up the Yaesu VC-27 earpiece at HRO tomorrow then and I can use it in the car also.
http://www.hamradio.com/detail.cfm?pid=H0-006182
http://www.hamradio.com/detail.cfm?pid=H0-006182

I typically try to cup my hand or turn my head if I'm going to try talking on my iPhone earpiece... not perfect but makes a little difference. Either way I can listen while riding, make a stop, call in and talk a little/report position and then carry on.

Too bad you can't make it. Would have been cool to ride with someone.

Joe/Dennis, I think I figured out what the other object that we saw in front of the space station was....
PROGRESS53P, an old Russian supply ship for the space station.

http://spotthestation.nasa.gov/sightings/view.cfm?country=United_States&region=Arizona&city=Phoenix http://spotthestation.nasa.gov/sightings/view.cfm?country=United_States&region=Arizona&city=Phoenix

http://en.wikipedia.org/wiki/Progress_M-53 http://en.wikipedia.org/wiki/Progress_M-53

So I guess we can't call it a UFO anymore. :(

Guys,

My 13 year old daughter and I enjoyed your conversation last night as we scanned the sky to see what you were seeing. It spawned off a 15 minute conversation about UFOs :-)

We hope to get a glance at this tonight. We were just a couple minutes too late last night to see it.

Sadly, our friend Kenn Burnell passed away this morning. He had been battling pancreatic cancer for a while. You undoubted recall seeing him coping with his chemotherapy the last few months.

Kenn and his family held a living memorial last Saturday evening and several of our group were able to visit with him at his home where he bravely greeted everyone. He had his wits about him and was cordial and considerate as he took time with all his friends who came by to say goodbye.

Kenn will be missed by our group and all who knew him. He lived a rich and interesting life.

As I learn of the funeral arrangements, I'll send out a follow-up email message.

Kind regards,
Bruce

I'm going to ride my bike to both locations tomorrow via the following route (as long as it is not raining!) - A respectable 33 miles: https://goo.gl/maps/VSeN9
https://goo.gl/maps/VSeN9

I'll leave my house around 9:30 or 10:00, will monitor the talk-in freq and will try out the earpiece that I got for my HT (from HRO today, funny story I will have to tell you tomorrow)... it has a PTT button on the wire which is very cool... we'll see how it works. If you are bored try calling for me. :)

I just set up an OpenAPRS account and downloaded the app for my iPhone ... I'll try posting my position via my iPhone for grins.

I will be out climbing mountains this weekend in New England for Summits on the Air. (SOTA). Beaconing APRS as well. N1RWY-4.
If the timing is right I will see if I can find you guys on HF and try to work you.

Which calls will you be using from the RUSS events?

Hope you had a good time Jay. Would have enjoyed he mountains myself.

We had some icky weather down here and I think they had to call it short yesterday. After all my prep I couldn't go because I had to take my son to a chess tournament in Peroria. I could hear Doug on simplex a little but he couldn't hear me.
Spoke to Dennis on ocotillo for a sec as they were packing up.

On a bright note.... I spent most of the day surfing the net and scheming on my mobile/remote setup. (HF antennae for van, Batt, charger, box for radio, solar panel?)

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday April 28, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2892. Queen Creek Field Day 2014

Yahoo group: Queen_Creek_Hams
Date: 2014-04-29 19:52:34 UTC
From: Joe Sammartino
Topic: 2892 Message: 2892

Folks,

Here is some early information regarding Field Day 2014<http://www.arrl.org/field-day>
.

The Queen Creek Amateur Radio Club and Queen Creek Emergency Communications Group are holding their annual ARRL Field Day right in Queen Creek this year.

When: June 28 - June 29, 2014

Where: Boys Club Center, Founders' Park

Address: 22407 S. Ellsworth Road,Queen Creek, AZ 85142

Contact: Joe Sammartino, N2QOJ, jsammartino@..., 480.389.1426

or Dennis Lawrence, KF7RYX, kf7ryx@...

Field Day Event Details: (May change a bit)

Air Conditioned Community Center !

(2) Stations - 80M-10M, maybe more (digital, CW)

(1) GOTA "Get On The Air" Station - 40 M, 2M, 70 cm

N3FJP Field Day Logging Software

100% Off Grid Stations, Generator and Solar/Battery

Saturday 11 AM Start Time

- Saturday 7:00 AM - Equipment staging, Laptop setups, Logging software prep

Sunday 2 PM Stop Time

- Sunday 2 PM - Breakdown

This event will be streamed on the Internet live!<http://www.ustream.tv/channel/arizona-joe>

Come help us setup, operate, breakdown, meet local hams, get on the air on the HF bands! Bring family and friends. We'll be happy to provide demonstrations. Groups are welcome, just let us know in advance.

Additional information will be available soon including a public press release.

Regards,

Joe

2893. Queen Creek Emergency Communications Group Hosts Technician Class, Training and Testing in May

Yahoo group: Queen_Creek_Hams
Date: 2014-04-30 03:30:09 UTC
From: Joe Sammartino
Topic: 2893 Message: 2893

Hi Folks,

Please pass this information on to whomever needs it.

The Queen Creek Emergency Communications Group will be hosting a two day training class consisting of two (4) hour sessions and a testing session immediately following the second training session. This is in support of requests made by two local faith based groups. There should be room for others as well. If you know of someone that might be interested, please pass on the following information and have them contact Bruce, KF6EZT, or me, N2QOJ, to register.

Here is detailed information on location, what to bring for testing, and the material one would need to download and study:

May 17th, 8 AM till 12 Noon - QC Library Recreation Annex Classroom<https://www.google.com/maps/place/21802+S+Ellsworth+Rd/@33.2503253,-111.6354454,216m/data=!3m2!1e3!4b1!4m2!3m1!1s0x872a4d3c26f40a4d:0xf536a521bed2c963?hl=en>(East side of Library)
4 hour training session only

May 24th, 8 AM till 2 PM - Town Council Chambers<https://www.google.com/maps/place/22350+S+Ellsworth+Rd/@33.2447394,-111.6349479,17z/data=!3m1!4b1!4m2!3m1!1s0x872a4d1667220b8b:0x5e744986ffa8b0a3?hl=en>(this is where QCECG normally meets)
4 hour training session plus testing session after training till 2 PM.
Technician class test takers will need to bring $15 and photo ID.
Upgraders will need to bring their original FCC class license (and CSCE, if any), a copy of the same, a photo ID, and $15.

A headcount in advance is absolutely required. The library classroom only holds 20-30 people.

*All possible attendees must do their self instruction and online practice testing in advance. *

The training sessions alone will not get the job done.

Here's a link to the PowerPoint Presentation Show that we will be using:

http://bkbarnes.com/HamRadio/Training%20Material%20and%20Q&A%20-%20very%20good.ppsx

Here's a link to several Technician Study guides:

http://bkbarnes.com/HamRadio/Tech_Study_Guide_2010.pdf

http://bkbarnes.com/HamRadio/Technician%20License%20-%20Study%20Guide.pdf

http://bkbarnes.com/HamRadio/Technician%20License%20-%20test%20questions%20and%20answers.pdf

http://bkbarnes.com/HamRadio/Technician%20class%20Notes.pdf

This is the information you need to relate regarding practice testing online, on your smart device, etc.:

- http://www.qrz.com/hamtest/ – You'll need to register to use the site, and then look under the Resources pull down menu and select Practice Amateur Radio Exams. Be sure you then select the 2010 Technician Exam Practice Test.

- eHam.net http://www.eham.net/exams/

- Technician class question pool: http://www.ncvec.org/page.php?id=349

- Android apps (go to Play Store for them)

- Ham Radio Study
http://www.appbrain.com/app/ham-radiostudy/com.tango11.hamstudy

- Amateur Radio Exams 1.0 Free
http://www.appbrain.com/app/amateur-radio-exams-1-free/com.cstructor.arexam

- PalmVE http://www.palmve.net/ - This is an Android app.

- iPhone apps – check iTunes app store. I've seen training apps, but none for free.

I recommend the QRZ.com practice exams.

The following is a paid service but a very good value with guaranteed results:

http://www.hamradiolicenseexam.com<http://www.hamradiolicenseexam.com/?gclid=CNTMn_O14L0CFUJqfgodOxgAHQ>

Important: All these study materials refer to the current Technician question pool. It expires at the end of June.

The testing session will be conducted by Fred, AB7JF, and his East Valley VE Team (and our local volunteers). Thanks Fred!

Regards,

Joe

Hey all,
I don't know if any of you chase lighthouses on HF, however, over here in Maine we have a station that will be doing a first time activation of a location for a few hours, noon to 2 PM east coast.

Frequency and info is below.
I figured that some of you 7's might want to know about this activity.

- Jay N1RWY

Subject: (PSARC) Testing, testing...
To: "psarc@..." <psarc@...>
Cc:

I will be putting a lighthouse on the air tomorrow (Wednesday) from South Addison, testing portable equipment I plan to use for more extended periods of time this summer. As far as I know this lighthouse has never been "activated." Rules of the Amateur Radio Lighthouse Society (www.arlhs.com) allow a ham to represent a lighthouse on the air as long as there is a clear view of the light from the operating position. -This is more liberal than the strict rules of the International Lighthouse Lightship Weekend in August, which requires the rig to be on lighthouse property, as you probably know.
My plan is to operate on 14.050 CW and 14.270 SSB (approximately) from noon until 2 PM.

Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

2905. Re: Queen Creek Emergency Communications Group Hosts Technician Class, Training and Testing in May

Yahoo group: Queen_Creek_Hams
Date: 2014-05-11 20:39:08 UTC
From: jsammartino@...
Topic: 2893 Message: 2905

Folks,

This is the last chance to get the word out to friends, family, co-workers - whomever. Our training begins this coming Saturday.

If you know of anyone that wants to sign up, I need to hear from them. Please pass along the information below and have them contact me at jsammartino@gmail.com or 480.389.1HAM to register.

Thanks,

Joe, N2QOJ

==========

Hi Folks,

Please pass this information on to whomever needs it.

The Queen Creek Emergency Communications Group will be hosting a two day training class consisting of two (4) hour sessions and a testing session immediately following the second training session. This is in support of requests made by two local faith based groups. There should be room for others as well. If you know of someone that might be interested, please pass on the following information and have them contact Bruce, KF6EZT, or me, N2QOJ, to register.

Here is detailed information on location, what to bring for testing, and the material one would need to download and study:

May 17th, 8 AM till 12 Noon - QC Library Recreation Annex Classroom https://www.google.com/maps/place/21802+S+Ellsworth+Rd/@33.2503253,-111.6354454,216m/data=!3m2!1e3!4b1!4m2!3m1!1s0x872a4d3c26f40a4d:0xf536a521bed2c963?hl=en (East side of Library)
4 hour training session only

May 24th, 8 AM till 2 PM - Town Council Chambers https://www.google.com/maps/place/22350+S+Ellsworth+Rd/@33.2447394,-111.6349479,17z/data=!3m1!4b1!4m2!3m1!1s0x872a4d1667220b8b:0x5e744986ffa8b0a3?hl=en (this is where QCECG normally meets)
4 hour training session plus testing session after training till 2 PM. Technician class test takers will need to bring $15 and photo ID. Upgraders will need to bring their original FCC class license (and CSCE, if any), a copy of the same, a photo ID, and $15.

A headcount in advance is absolutely required. The library classroom only holds 20-30 people.

All possible attendees must do their self instruction and online practice testing in advance.

The training sessions alone will not get the job done.

Here's a link to the PowerPoint Presentation Show that we will be using:

http://bkbarnes.com/HamRadio/Training%20Material%20and%20Q&A%20-%20very%20good.ppsx
http://bkbarnes.com/HamRadio/Training%20Material%20and%20Q&A%20-%20very%20good.ppsx

Here's a link to several Technician Study guides:

http://bkbarnes.com/HamRadio/Tech_Study_Guide_2010.pdf
http://bkbarnes.com/HamRadio/Tech_Study_Guide_2010.pdf

http://bkbarnes.com/HamRadio/Technician%20License%20-%20Study%20Guide.pdf
http://bkbarnes.com/HamRadio/Technician%20License%20-%20Study%20Guide.pdf

http://bkbarnes.com/HamRadio/Technician%20License%20-%20test%20questions%20and%20answers.pdf http://bkbarnes.com/HamRadio/Technician%20License%20-%20test%20questions%20and%20answers.pdf

http://bkbarnes.com/HamRadio/Technician%20class%20Notes.pdf
http://bkbarnes.com/HamRadio/Technician%20class%20Notes.pdf

This is the information you need to relate regarding practice testing online, on your smart device, etc.:

- http://www.qrz.com/hamtest/ http://www.qrz.com/hamtest/ – You'll need to register to use the site, and then look

under the Resources pull down menu and select Practice Amateur Radio Exams. Be sure you then select the 2010 Technician Exam Practice Test.

- eHam.net http://www.eham.net/exams/ http://www.eham.net/exams/

- Technician class question pool: http://www.ncvec.org/page.php?id=349
http://www.ncvec.org/page.php?id=349

- Android apps (go to Play Store for them)

- Ham Radio Study http://www.appbrain.com/app/ham-radiostudy/com.tango11.hamstudy
http://www.appbrain.com/app/ham-radiostudy/com.tango11.hamstudy

- Amateur Radio Exams 1.0 Free
http://www.appbrain.com/app/amateur-radio-exams-1-free/com.cstructor.arexam
http://www.appbrain.com/app/amateur-radio-exams-1-free/com.cstructor.arexam

- PalmVE http://www.palmve.net/ http://www.palmve.net/ - This is an Android app.

- iPhone apps – check iTunes app store. I've seen training apps, but none for free.

I recommend the QRZ.com practice exams.

The following is a paid service but a very good value with guaranteed results:

http://www.hamradiolicenseexam.com
http://www.hamradiolicenseexam.com/?gclid=CNTMn_O14L0CFUJqfgodOxgAHQ

Important: All these study materials refer to the current Technician question pool. It expires at the end of June.

The testing session will be conducted by Fred, AB7JF, and his East Valley VE Team (and our local volunteers). Thanks Fred!

Regards,

Joe

Arizona Emergency Net - Maricopa
Monday May 12, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Folks,

A slight change to the location and entrance of the May 17 Technician Class training.....

The class will now be held in the large conference room located in the Library proper - not the Recreation Annex area.

It will be held in the Zane Grey Conference Room. Please enter from the Northwest side of the building.

The entrance is noted on the attached graphic.

May 17th, 8 AM till 12 Noon

Regards,

Joe, N2QOJ - 480.381.2993 - Call me if you have any difficulty.

2916. Volunteers Needed for Saturday Test Session

Yahoo group: Queen_Creek_Hams
Date: 2014-05-22 13:59:01 UTC
From: Joe Sammartino
Topic: 2916 Message: 2916

Hi Folks,

On Saturday, we will be holding our final session of the Technician Class training. At 1 pm or so we will begin our VEC test session, led by Fred, AB7JF.

We need a couple of volunteers to assist with getting the students forms collected, credentials verified, etc. We also need another VE or two to complete our VE panel.

The location is the Queen Creek Town Council building. You would need to arrive at about 12:15 to 12:30 PM.

Please contact me by email or phone asap to let me know if you can help us.

Thanks,

Joe, N2QOJ

2917. QCECG FCC Test Session

Yahoo group: Queen_Creek_Hams
Date: 2014-05-22 16:31:43 UTC
From: Joe Sammartino
Topic: 2917 Message: 2917

Folks,

There are *TWO *more days to our final Technician Class training session and FCC testing session.

If you, or anyone you know, is studying to upgrade your license class, then please feel free to attend Saturday's test session at the Queen Creek Town Council building<https://www.google.com/maps/place/22350+S+Ellsworth+Rd/@33.2447394,-111.6349479,17z/data=!3m1!4b1!4m2!3m1!1s0x872a4d1667220b8b:0x5e744986ffa8b0a3?hl=en> (Southeast
Entrance) which begins at 1 PM. Plan on arriving no later than 12:30-12:45 PM to register. All license class tests will be administered. Of course, if you know someone who is planning on testing for their Technician license, tell them about our test session.

Take as many practice exams as possible between now and Saturday.

Here's the link to the practice tests. *http://www.qrz.com/hamtest/ <http://www.qrz.com/hamtest/>*

Each practice test takes about 10-20 minutes. Once you have taken several tests and are averaging a pass rate of 80% or better, you will be ready for the real test on Saturday. You'll need to register to use the site, and then look under the Resources pull down menu and select Practice Amateur Radio Exams. Be sure to select the appropriate practice test for your license class interest.

For General and Amateur Extra Class FCC testing, bring $15 for the test, your original Station License *and* a copy to give to the VE. Copies of of any CSCE (Certificate of Successful Completion of Examination) are necessary if you plan on presenting CSCE for credit.

Remember, for Technician Class FCC testing, bring a photo ID and $15 for the test. *If you don't want to use your Social Security Number on the FCC form, then register asap for an FCC FRN number* here<http://wireless.fcc.gov/uls/index.htm?job=about_getting_started#d36e21> :

How do you get an FCC FRN number?<http://wireless.fcc.gov/uls/index.htm?job=about_getting_started#d36e21>

Our testing session will be coordinated by Fred, AB7JF, of the East Valley VE Team along with our own local VEs.

Good luck!

Joe, N2QOJ

2922. Queen Creek Fire and Medical Department Community Open House

Yahoo group: Queen_Creek_Hams
Date: 2014-05-26 06:02:44 UTC
From: Joe Sammartino
Topic: 2922 Message: 2922
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

The Queen Creek Fire and Medical Department will be hosting a Community Open this coming Saturday from 9 AM until 1 PM.

The Queen Creek Emergency Communications Group will have an information stand setup for attendees.

I have attached a flyer that lists all the planned activities and attractions. Please attend if you can and be sure to bring the family too.

You can download the flyer here<https://dl.dropboxusercontent.com/u/4721475/Fire%20Open%20House%20%20Flyer%20FINAL.pdf?dl=1>if you have problems receiving with this email:

https://dl.dropboxusercontent.com/u/4721475/Fire%20Open%20House%20%20Flyer%20FINAL.pdf?dl=1

Some highlights:

- *Kids Fire Safety House *
- *Spray a Firefighter’s Hose*
- *Try on Firefighter’s Gear*
- *Vehicle Extrication Demonstration*
- *Paramedic Medical Code Demonstration*
- *Ambulance Helicopter on Display*
- *New and Antique Fire Trucks on Display *
- *Hands-Only CPR Class*
- *Station Tours*
- *Snacks and Refreshments Provided by Firehouse Subs*

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday May 26, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2924. Results from QCECG's May Technician Training and Testing

Yahoo group: Queen_Creek_Hams
Date: 2014-05-29 16:42:23 UTC
From: Joe Sammartino
Topic: 2924 Message: 2924

Hello Folks,

I thought you would be interested in the results from our recent training/testing event in May.

42 signed in for the training class on May 17. 27 signed in for the training class on May 24. Some of the first session students could not attend both sessions and would continue studying on their own. We had many walk-ins for the test session on the 24th.

29 folks registered for the test last Saturday. 25 passed on the first try.

Fred, AB7JF, offered re-tests to the 4 folks - 3 passed the re-test exam, 1 did not.

So, 28 of 29 folks passed resulting in one General upgrade and 27 new Technicians.

I would estimate that 2/3 of the testers were original students and the remaining 1/3 were walk-ins.

As always, Fred did a great job of running this testing session. Thanks to Brad, N7LZD, and Dennis, KF7RYX, for their time to teach and assist with the testing session also. A big thanks to our test session volunteers - Al Spencer, KG7BMI, Ken Gledhill, AA7PE, Steve Knab, KG7BME, Bob Rothlisberger, N7RKX, and Danny Anderson, KB7PLO.

In summary, it was a very successful event due in large part to the QCECG volunteer corps, the Town of Queen Creek / Joe La Fortune, and friends.

Regards,

Joe, N2QOJ

Wow! That is amazing. Congrats to all of the new
Hams. Great job Joe and all of the testing volunteers!

New hams... You MUST come to field day this year in Queen creek. Joe, Dennis and others supported me last year for my first filed day and it was a blast. They shared so much with me... They totally hooked me up and got me started. See you at field day!!!!!!

2932. Spot The International Space Station

Yahoo group: Queen_Creek_Hams
Date: 2014-06-02 17:21:44 UTC
From: Joe Sammartino
Topic: 2932 Message: 2932
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

For those of you interested in spotting the *International Space Station*,
it will be visible tonight for (6) minutes at a good elevation of 64
degrees. That elevation should provide for a very good viewing, barring
any clouds.

This information is valid if you are observing from the Phoenix valley area.

Here are the details:

Time: Mon Jun 02 9:11 PM
Visible: 6 min
Max Height: 64 degrees
Appears: SW (from 225 degrees)
Disappears: NE (toward 45 degrees)

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe

2934. Spot International Space Station Again Tonight

Yahoo group: Queen_Creek_Hams
Date: 2014-06-03 16:54:42 UTC
From: Joe Sammartino
Topic: 2934 Message: 2934
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

Last night's pass beginning at 9:10 PM was a great pass. I popped outside at work and there it was. I asked a couple of co-workers that happened to be outside to look up and watch. They loved it.

Good news! You can spot the station again tonight for 6 minutes at almost the same height above the horizon:

Time: Tue Jun 03 8:22 PM
Visible: 6 min
Max Height: 60 degrees
Appears: SW (from 225 dgrees)
Disappears: NE (toward 45 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe

East Valley Repeater Group
Monday June 9, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

2941. Ham Radio Field Day 2014, June 28-29

Yahoo group: Queen_Creek_Hams
Date: 2014-06-09 06:20:13 UTC
From: Joe Sammartino
Topic: 2941 Message: 2941
Attachments: 2 described; binary payloads are missing from this source WARC

Folks,

Our *third* annual Field Day is coming up later this month at Founders' Park. The Town of Queen Creek is letting us use the Community Center building which is *air conditioned and very comfortable. *We have purposely planned this year's Field Day to be local and within our community. This will allow you to better plan to participate, visit, etc. without the need to travel outside the area.

Please visit this link for more details:
http://www.n2qoj.com/fieldday2014.htm

Any local hams (non-hams can help too!) interested in assisting with setup, operating, and/or breakdown should contact Joe, N2QOJ or Dennis, KF7RYX. We need lots of participation to make this a successful event. All local area hams are invited to participate. We start setup on Saturday morning at about 7 AM, begin the Field Day formerly at 11 AM, conclude on Sunday at 2 PM, then breakdown the site. So, there is plenty of opportunity to come down and lend a hand, operate, bring visitors and family, etc. We will have two or three operating stations and a third station dedicated to "GOTA", that's "Get on the Air" for new hams and non-hams. This is your chance to operate HF across the US and Canada even if your license class is Technician. And if you do not want to operate a station, you can assist by logging the contacts. If you would like to *formerly participate*, please contact Joe by email or phone to schedule and let him know your specific interests: jsammartino@..., 480.270.4563.

If you plan on just visiting, please respond to Joe and Dennis directly (contact information below) to let us know about what time you can arrive and for how long. Also mention if you may be willing to operate, help with setup, help with take-down, or whatever combination you can provide assistance.

If you have a group such as a Boy Scout troop, prepper group, church group, etc. that would like to visit and receive demonstrations, please let us know in advance so we can be prepared. A copy of our flyer and press release is attached to this email. Feel free to distribute as necessary.

KF7RYX will be providing emergency power sources and loaning his state-of-the-art "Go-Box", designed for emergency communications and remote station communications, for the entire event. We will also have traditional ham gear for the other stations.

*Important: * If you are a new ham, please don't pass up this opportunity to visit and get presentations and demonstrations, including hands on operation. Its the one event that covers most important aspects of our

hobby - transceivers, antennas, alternate power sources, field setup and operating procedures. Bring your new handie-talkie and we will give you hints and tips on operation and programming. One-stop shopping. Our prime objective is to give our visitors and participants the opportunity to learn real ham radio techniques and skills.

Regards,

Joe, N2QOJ

2942. Arizona Emergency Net - Maricopa, 6/9/2014, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-06-09 15:01:09 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2942 Message: 2942

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 9, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2943. Radio sale now for $29.95

Yahoo group: Queen_Creek_Hams
Date: 2014-06-10 16:11:02 UTC
From: Joe Sammartino
Topic: 2943 Message: 2943

Folks,

I just sent the following information out to the new hams and students.
You may find it useful if you have been thinking about buying another
Baofeng.

Now that you have your Technician license, or will have soon, the next step
is to acquire your first hand held radio or what we call a "handi-talkie".

The most economical radio to begin with is the Baofeng UV-5r or UV-5r+, or
other variant.

You can search on eBay or Amazon for these radios....or...

You can visit this site that I use:

www.radiodity.com.

They have a fantastic Father's Day Sale going on today and tomorrow.

*They are offering the Baofeng UV-5r+ radio for only $29.95!
<http://www.radioddity.com/us/home-two-way-radio/baofeng-uv-5r-plus-earphone-136-174-400-480mhz-two-way-radio.html>*

*http://www.radioddity.com/us/home-two-way-radio/baofeng-uv-5r-plus-earphone-136-174-400-480mhz-two-way-radio.html
<http://www.radioddity.com/us/home-two-way-radio/baofeng-uv-5r-plus-earphone-136-174-400-480mhz-two-way-radio.html>*

The standard Baofeng UV-5r is still a great radio. Extended battery and
speaker/mic are must haves.
Look for a package deal like this to start.

http://www.radioddity.com/us/two-way-radio-product/baofeng/baofeng-kit/baofeng-uv-5r-sp-mic-136-174-400-480mhz-dtmf-ctcss-dual-dand-fm-ham-radio-1.html

To get all the tips, hints, and accessory information for your new radio,
visit this site: Www.miklor.com <http://www.miklor.com/> . It is the best
repository of information for these new Chinese radios. There are many
links to purchase radios and accessories.

Hurray.. I will be in town for this one.

Will ride over on the bike (APRS: N1RWY-2).
As well as the QC /Occ repeater.

Boy Scouts Electronic Swap Meet and Recycling
Sunday June 15, 2014
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2955. Breakfast this morning .. solar panel + charger

Yahoo group: Queen_Creek_Hams
Date: 2014-06-14 18:15:09 UTC
From: Jay
Topic: 2955 Message: 2955

Hey all,
Some of you were asking where I picked up the foldable 30w solar panel.

That was here:

http://www.californiapc.com/index.php?l=product_list&c=121

Fast delivery and very quick to answer emails.

Dennis, be sure to check out the solar field shelters.. very neat.

The charger that is very small that I use is here:

http://www.buddipole.com/sobaco.html

Very small and lightweight and will handle up to 75W of solar.

- Jay N1RWY (The fella who bikes to the breakfast)

East Valley Repeater Group
Monday June 16, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

2962. Arizona Emergency Net - Maricopa, 6/16/2014, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-06-16 15:01:08 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2962 Message: 2962

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 16, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2963. Nets for "New Hams"

Yahoo group: Queen_Creek_Hams
Date: 2014-06-16 20:37:25 UTC
From: Joe Sammartino
Topic: 2963 Message: 2963

For you new hams ....there is another good source for information.

There are two nets every week especially created for new hams:

Thursday: 7 PM, 442.800 Mhz (+) PL 100 Hz

Sunday: 8 PM, 146.500 Mhz Simplex

These nets are noted in our YAHOO Group Calendar. A reminder for each is sent out 6 hours prior to the start of the net.

You can participate and ask questions or just monitor. There are always good topics covered.

Regards,

Joe

2964. Queen Creek Field Day 2014 Update

Yahoo group: Queen_Creek_Hams
Date: 2014-06-18 17:30:57 UTC
From: Joe Sammartino
Topic: 2964 Message: 2964
Attachments: 2 described; binary payloads are missing from this source WARC

Folks,

The upcoming Queen Creek Field Day event is now listed in the Town of Queen Creek's website Calendar of Events:

http://www.queencreek.org/Home/Components/Calendar/Event/15701/124

This year's Field Day will also be highlighted by the use of the special event call sign N7Q.

This special 1X1 call sign has been assigned to us for exclusive use.

If you or anyone is interested in attending and wants more information, direct them to this link:

www.queencreek.org <http://www.queencreek.org>

or

http://www.n2qoj.com/fieldday2014.htm

I've also attached copies of our press release and information flyer that you can distribute as well.

There will be more updates coming today and later this week. We are looking for volunteers to sign up for operating, setup, take down, and any combination of those activities. Some of you have already volunteered, thank you!

Regards,

Joe, N2QOJ

Awesome score on the 1x1 call.
That will be a ton of fun. I will miss this year, doing a 1/2 marathon
obstacle course race up in Utah.

I look forward to hearing how it all went.

2969. Queen Creek Field Day 2014 - with VE Testing !!!

Yahoo group: Queen_Creek_Hams
Date: 2014-06-18 18:31:40 UTC
From: Joe Sammartino
Topic: 2969 Message: 2969

The Queen Creek Amateur Radio Club and QC Emergency Communications Group will be hosting Field Day 2014 at Founder's Park at the Community Center building (air conditioned!).

There will be a special event call sign of N7Q. 2A and GOTA stations.

Visit http://queencreek.org/Home/Components/News/News/6370/13

and

http://www.n2qoj.com/fieldday2014.htm

for full details.

VE Testing Added !!

We will also sponsor a VE Test Session for the current pool of Technician questions and all upgrades. Fred, AB7JF, of the East Valley VE Team will be the VE Session Manager. *This is probably the last chance for folks to take the Technician exam before the next pool of questions beginning July 1st.* Bring a photo ID and $15. For upgrades, bring your original license (and CSCE, if any), a copy for the VE team, and $15. The test session will begin at 12 PM and end at 3 PM on Saturday, June 28th.

The location for Field Day is Founder's Park <http://queencreek.org/departments/parks-recreation/facility-rentals/community-center>, at 22407 S. Ellsworth Road, Queen Creek, 85142.

Questions? Contact info below.

Regards,

Joe, N2QO

2970. Field Day Volunteering

Yahoo group: Queen_Creek_Hams
Date: 2014-06-21 18:30:12 UTC
From: Joe Sammartino
Topic: 2970 Message: 2970

Queen Creek Field Day 2014 - *"N7Q"*

*Local Talk-in: *Queen Creek Repeater, 449.475 (-) PL 136.5

Where: Founders' Park - Community Center

Setup: Saturday, June 28th - From 7 AM till 11 AM

*Field Day Operation: * Saturday, June 28th - From 11 AM till Sunday, June 29th, 11 AM

Take Down: Sunday, June 29th beginning at 11 AM

We need volunteers to operate, to assist with setup and take down, and to engage the public.

Setup: We will be setting up antennas, running antenna feed lines, setting power generation, setting up HF stations, and more.

*Operate: * We will have (2) HF stations for phone and CW and another station setup for GOTA - "Get On the Air" for new hams and non-hams. We need operators for the HF station throughout the entire event - 24 hours, if possible. We also need people to log contacts for the operators. We will have laptops and software setup for this purpose. No experience necessary - we will train you!

Take Down: Setup in reverse!

Other: We hope to have many visitors so we need folks to be available to answer basic questions about ham radio and the service we provide to the world. We need someone to take photos.

We have planned this event to be local so everyone can have a chance to participate, even it is just for an hour.

We are building a list of volunteers so here is what we need:

- Your name
- Your call sign
- If you can operate - or would like to learn - tell us so and what time you will be available
- If you would like to log contacts, tell us so and what time you can be available
- If you can assist with setup on Saturday morning, tells us
- If you can assist with take down on Sunday, tell us
- if you would like to bring family, friends, scouts - any visitors - for a demo/tour, tell us how many and approximately what time on Saturday or Sunday.

Please reply to only Joe and Dennis and not this entire distribution list.

You do not need to bring anything except your Handie Talkie for local communication. All stations will fully equipped.

Here's a snapshot of volunteers already identified (If I missed someone, please remind Joe):

Call Sign Lname Fname Class, Operate/LOG, Setup,Takedown, PIO, Recorder
N2QOJ Sammartino Joe AE Y Y Y
KF7RYX Lawrence Dennis G Y Y Y
KF7E Henderson Jim AE Y Y
NU6E Neumann Chuck AE Y N N
KG7MDR Crapse Dennis T Y
KF7SLR Cooper Janet G Y
WQ1E Stevens Don AE Y
KT1NA Cunningham Christina AE Y
W1AI Cunningham John AE
KD7YHT Packard Cole T Y Y Y
KG7BMI Spencer Al G
KF6ODI Barnes Karen T

This will be loads of fun and a great event. Your participation will guarantee that for yourself and others.

If you have received this email several times, we apologize. We wanted to be sure we used every email distribution list we had for our local hams and hams wannabees.

Regards,

Joe, N2QOJ And Also For Dennis, KF7RYX (kf7ryx@...)

East Valley Repeater Group
Monday June 23, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

2973. Arizona Emergency Net - Maricopa, 6/23/2014, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-06-23 15:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2973 Message: 2973

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 23, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2974. Important: Camp Moroni / Camp Raymond

Yahoo group: Queen_Creek_Hams
Date: 2014-06-26 16:33:01 UTC
From: Joe Sammartino
Topic: 2974 Message: 2974

Folks,

Dennis (KF7RYX) and I have been asked for a list of *Queen Creek North Stake* hams that will be participating at Camp Moroni <http://camp-moroni.com/> in July. We have recently trained and licensed several Queen Creek Stake members in preparation for this event.

So, if you are a *QC NORTH STAKE* member and plan on attending Camp Moroni, we would like you to respond and let us know who you are. They would like to identify members who are hams and can provide communications from camp-to-camp, activity-to-camp, etc. Of course, this is all voluntary.

We need your name, call sign, and Ward name, etc., ASAP. Just respond to this email.

If you have received this email multiple times, or in error, please accept our apologies.

Thank you,

Joe, N2QOJ

2977. W7ASC is back on HAM TV!

Yahoo group: Queen_Creek_Hams
Date: 2014-06-28 23:52:25 UTC
From: wmunsil@...
Topic: 2977 Message: 2977

Thanks to the efforts of several Phoenix ATVers the HAM TV station at the Arizona Science Center, W7ASC, is back on the air.

Although I can't see the Shaw Butte repeater, W7ATV, here at my QTH W8ARZ was able to relay it into the White Tank repeater, W7ATN, on 2.4 GHz FMTV and I was able to watch the video here.

It's good that visitors to the science center will be able to be exposed to HAM TV once again after a long absence.

2981. Queen Creek Field Day 2014 Highlights

Yahoo group: Queen_Creek_Hams
Date: 2014-06-30 05:23:33 UTC
From: Joe Sammartino
Topic: 2981 Message: 2981

Highlights:

- Over 400 Contacts were made throughout world. About 300 of them were in phone mode and the remainder (that's almost 100) were made in CW exclusively by Jim, KF7E. All radio station equipment was provided by Dennis - KF7RYX, Jim - KF7E, amd Joe - N2QOJ. Dennis also provided most of the antenna systems, the emergency power generator (and gas), antenna masting, and just about all the glue that held the event together.

- Two Field Day Stations and one GOTA (Get-On-The-Air) station were in operation continuously. (BTW, Icom (IC-735), Kenwood (TS-570), and Yaesu (FT-897, FT-350) were all represented. Our special event 1X1 call sign of "N7Q" was a hit. We will look to use this call again for "Radios on the Rim" and more.

- All contacts were logged via laptop. The Field Day wireless network was installed and maintained by Rick, KF7MCA. This network allowed networked laptops to log to a central file system. The software we use is N3FJP's ARRL Field Day Contest Log Version 4.2.

- A lot of the event was streamed live via USTREAM. Some of the archived video can be found at: http://www.ustream.tv/channel/arizona-joe

- Brad, N7LZD, provided a fully functional Direct TV system for use during the event. Sunday breakfast was also sponsored by Brad - thank you!

- Janet, KF7SLQ, stopped by to log, operate, and also provided a very tasty pasta dinner for the crew on Saturday evening.

- Janell, KF7WWJ, provided a brief - but complete - presentation of the phonetics to be used during Field Day operations. Thanks to Janell's OM, Jim, KC7QPI, for his temporary repair of our front door.

- Our QCECG member Brad, KF5AZH, stopped for a visit after rock climbing certification and made (sponsored too!) a pizza run for us Saturday afternoon - thank you!

- Cole, KD7YHT, provided excellent setup support especially with his 48 foot boom bucket truck and expertise.

- Bruce, KF6EZT, and Karen, KF6ODI visited with (7) grand-kids, and (2) daughters (didn't see any pets). His visit allows us to claim some additional points for our FD application since Bruce is the director of our Queen Creek Emergency Communications Group and Town liaison.

- Turn out for setup and operation was exceptional - Thank you! Visitors included new hams, old hams, non-hams, friends, family and several hams that were looking to join in the Field Day fun close to home and found us

on the ARRL Field Day Locator page.

- John, W1AI, and Kristina, KT1NA, owners of Ham Test Online <http://www.hamradiolicenseexam.com/> , not only visited and operated our stations, but also brought some nice giveaways - pens and bumper stickers - perfect for our public service event. Visit their site for online training information: http://www.hamradiolicenseexam.com/ .

- Fred, AB7JF, of the East Valley VE TEAM, once again generously provided his time and service to provide a testing session for technician licensing. We had eight (8) passes. Congratulations to these new hams.

- The announcement for our FD was carried by several news organizations including a nice article by Independent News Media: http://arizona.newszap.com/eastvalley/133074-114/queen-creek-radio-hams-to-host-overnight-field-day

- And in between all these activities, Dennis, KF7RYX, had time to demonstrate some handheld radio functions and also check out a radio or two for some folks.

- The Youth Center facility provided by the Town of Queen Creek was a great place to host our event. We thank Joe LaFortune, Emergency Manager for the Town of Queen Creek, for his fantastic and continued support of our local ham community and sponsorship of the Queen Creek Emergency Communications Group.

We had folks taking photos and videos and will make them available at our Youtube <https://www.youtube.com/user/QueenCreekARC> channel and Facebook <https://www.facebook.com/pages/Queen-Creek-Amateur-Radio-Club/190785887681041> page.
At some point, I'll post a list of all the folks who participated with setup, logging, operating, take-down, and more. But, in the meantime, Dennis and I thank each of you very much. You all made this a great success for our local community and the greater ham community. As we say in ham radio - fine business.

Regards,

Joe, N2QJ, and on behalf of Dennis, Kf7RYX

2984. Arizona Emergency Net - Maricopa, 6/30/2014, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-06-30 15:01:15 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2984 Message: 2984

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 30, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2986. 2014 Field Day with QC Hams = Awesome!

Yahoo group: Queen_Creek_Hams
Date: 2014-07-02 04:09:38 UTC
From: KF7MCA
Topic: 2986 Message: 2986

Thanks to QC Hams for another awesome field day (my second field day ever). Really appreciate everyone's generosity and making me feel at home as usual even after being away for a while.

Already looking forward to next field day and possibly a camping trip later this year. :)

Rick

2987. Screwdriver Antennas

Yahoo group: Queen_Creek_Hams
Date: 2014-07-03 04:12:50 UTC
From: kf7mca@...
Topic: 2987 Message: 2987

I continue to dream about having a decent antenna so I can do some reasonable HF from my house. I can't really (and don't want to) put up a mast and a monster antenna so I'm thinking of getting something I can conceal in the attic above my garage, in the little courtyard at my house or something I can mount on my minivan so I can use it at home and remotely (I'm leaning towards this).

I've tried some stealth wire antennas in my attic and have made some contacts but it hasn't been good enough. I may still have some options for the attic but I've turned my attention towards screwdrivers (thanks to tip from Joe).

I saw one on Doug's truck last year as he blazed past me me on the '87 on our way to field day at the rim, I saw Brad's this weekend and I was just reading a post from Norm (topic - "80 Meters... what to do") which was really interesting and helpful.

Norm, you said in your post that your screwdriver outperformed your dipole. That is kinda what I wanted to hear. I've been looking at Scorpions, TarHeel and HI-Q so far. The Scorpions seem really expensive. I'd really prefer to stay local and do the Scorpion but is it really worth it?

Any and all feedback on the topic would be appreciated.

2988. Re: Screwdriver Antennas

From: kf7mca@...
Topic: 2987 Message: 2988

Ok, here I go... replying to my own posts! :)

So I researched screwdrivers some more and read so many eham product reviews for the Scorpion that were 5 out of 5 that my eyes were about to fall out. I'm pretty much convinced that I'm going to get a screwdriver and in the process of doing this I've succumbed to the idea that I just need to go completely mobile and not even fool around with a base station. I just want to get on the air when I want to and right now doing it at home is not a great option for a variety of reasons. I can always get into my swagger wagon and back it out of the garage or drive somewhere and get my HF on. I don't mind pimping out my minivan, drilling holes in it, etc.

So, Joe has been saying since I met him that the Yaesu FT-857D is great, blah blah blah and wasn't listening but I'm seeing the light. It does VHF/UHF AND HF (10-180 meters), 100 Watts, it's small, it's simple, etc.

But... I have a Kenwood TS2000X now and I like the layout. So there is a Kenwood TS-480HX/TS, it doesn't do VHF/UHF, but it has 200W, remote operation capability and it has a bigger / brighter display.

Why does this have to be so difficult?!?!?!? since I'm a computer nut I think I would have fun with the remote capability of the Kenwood at some point in time but not sure if the lack of VHF/UHF is going to bum me out. I'd have to use my HT in the car for VHF/UHF (I really don't want to have TWO mobile rigs).

So it is looking like the Yaesu FT-857D and a screwdriver (which one? I've got a whole set of questions and additional research on that... short model or tall model, which brand, etc.)

I know this may sound like a foreign concept to some of you guys but I have the Kenwood TS2000X which I'm not going to be using so if I were to sell it and get a decent price for it I could get the screwdriver AND the Yaesu mobile. Is there any market for the TS2000X and do you think I could get a decent price for it?

2989. Re: [Queen_Creek_Hams] Re: Screwdriver Antennas

If you want easy to get on the air and work some stations, then a used FT857 and a ATAS 100 or 120? Automatic Screw driver antenna. The antenna covers 2-40m (no 80m) and is plug and play with the 857. Connect to the radio via coax, hit the tune button on the 857 and the radio does the rest.

The yeasu ATAS is not as robust as the tar heel or the scorpion, as the coil is smaller and can't handle more that 100w. But, it WILL make contacts. I have used several for years. If you want to get on the air and have fun, it is a great antenna for that (at about a third of the price)

Ask Joe about how he uses his off his pool fence for some hamming and splashing on the weekends. :-)

Mobile HF is great fun, but also a great learning curve due to the need to ground everything, bonding and even ferrite cores come into play. But as I am sure Jim would say, it is real rewarding to work them from the car/truck/jeep.

From: KF7MCA
Topic: 2987 Message: 2990

Thanks Jay… I completely forgot about the ATAS!!!

ATAS-120A @ HRO = $325… that is sounding much better than $800-$900 for the Scorpion (but I read about every word and looked at every picture on the Scorpion site last night and as a mechanical engineer I can see and appreciate the quality of the Scorpion for sure).

The wheels are spinning more now… may be heading to HRO…

Just don't like the idea of spending money on another radio or selling the TS2000X. I love the Kenwood but if I'm not using it and I can do pretty much everything with the Yaesu 857D in my car (and actually do it rather than wish doing it) then I suppose I just need to sell the Kenwood and take the loss.

Any other perspectives? Buy the new gear and try and sell the Kenwood or suck it up and keep the Kenwood for a possible day in the future when I can operate from home again (when I get my room back and figure out a workable antenna for my house)?

Hi, my only thought is if you like the Kenwood and can afford it, keep it. Its been my experience that once you sell something it is harder to buy another one.

I know the Kenwood is not a typical mobil but what about setting it up in a pelican case so you can safely and easily move it? Days in the park or other events where size and power usage are not of primary concern?

Good luck.

From: Jay
Topic: 2987 Message: 2992

If you have your heart set on keeping the TS2000X, and you want an ATAS, then what you will need is some sort of antenna controller.
AMCOM used to make them, West mountain Radio has a very expensive one, or you can roll your own if you are handy with a soldering iron.

The ATAS uses +12V to make it extend and +8V to make it retract. No negative voltage.
Several folks have home built their own controller to match with any radio.

Images here:
https://www.google.com/search?q=amcom+screw+driver+antenna+controller&safe=off&client=firefox-a&hs=c48&rls=org.mozilla:en-US:official&channel=sb&tbm=isch&tbo=u&source=univ&sa=X&ei=Wa61U9O1I5TaoATRnIGYDQ&ved=0CDsQsAQ&biw=1341&bih=949

Specs on the antenna and controller properties.

http://www.qsl.net/k5lxp/projects/ATAS100/ATASControl.html

From: Bradley Heck
Topic: 2987 Message: 2993

Good Afternoon

As you saw last weekend. I have the ft897 and the atas 120

Very very happy, wind loading is not bad, also the way I mounted mine, just retracting it I can drive into the garage, and easy to remove to get the car washed

I would give it 5 out of 5 stars

The only negative issues I have are

A. To tune the antenna the unit has to me transmitting. I really don't care to emit rf when just retracting

B. I can remote the radio from the truck via a computer, but I can not tune the antenna remotely. Per Yaesu it's not possible, bummer

Happy to meet you so you can play with it before you buy

Tom/Jay,

Thanks guys... really appreciate the dialogue and support on this...

Since my last post I've actually been carefully considering the 'keep the TS2000' option and here is what I I'm probably going to do... today.

Little Tarheel II - $399, 6M-80M
Kenwood RC-2000 Kit - $350, remote control head, extension for mic and speaker, mounting bracket, power cord, etc.

<Getting the Yaesu and Atas would have been around $1200 total>
I was going to still do the ATAS (there is a simple MFJ controller which can let the ATAS work with other radios for $80).

I'll save a about $600 and will be able to keep my baby. on the flip side if I did spend the $1200 I'd have 2 radios but I'm just not going to use the Kenwood so makes good sense to use it now... I've got plenty of room in my minivan. Plus... I get to play with this stuff over the weekend! :) I really wanted to try and make some contacts for the 13 colonies special event.

Kenwood RC-2000 Mobile Controller RC2000

If you have your heart set on keeping the TS2000X, and you want an ATAS, then what you will need is some sort of antenna controller.

AMCOM used to make them, West mountain Radio has a very expensive one, or you can roll your own if you are handy with a soldering iron.

The ATAS uses +12V to make it extend and +8V to make it retract. No negative voltage.

Several folks have home built their own controller to match with any radio.

Why can't you use the atas at home with the $80 controller and ts-2000?
Then 857 while mobile for real 2/440 (not ht). Dennis would use his atas
on the truck with gobox for ritp.

Thanks to everyone for all the advice. I am on my way home and I'm happy to say that I purchased a TarHeel and nothing else. I decided to save a couple bucks and I'll just use my TS 2000 four now. I'll be drilling a hole in the side of my minivan tonight as high up as I can and mounting this puppy. I also got a decent VHF UHF antenna that can handle 100 W as well. :-)

Rick,

That's great. So, you will be mounting that Tar Heel right on your Honda generator (Odyssey) - nice touch.

We need pics!

LOL!
Yes, it has a 20 gallon tank so I should be able to operate for a long time.... And have air conditioning. :)

Now that the power is back on and the dust storm is not raging outside I can carry on with my work. Drill in hand and about to make first hole.

Got lucky and was able to find a perfect flat spot on roof of van. The 'little' Tar Heel will have 6in clearance when pulling into my garage with the puppy on top (in bottom position). Will just have to take the whip off.

Taking pics, Thanks for the reminder.

Hope you guys made out ok tonight.

1, 2, 3.... Ready, set, go!

This is a great time to learn about Automatic Packet Reporting System which allows us to track stations and message them using the worldwide APRS system.

Dennis is traveling over the next 36 hours. Track him here:

http://aprs.fi/#!call=a%2FKF7RYX-9&timerange=3600&tail=3600

East Valley Repeater Group
Monday July 7, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

3004. Arizona Emergency Net - Maricopa, 7/7/2014, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-07-07 15:01:14 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3004 Message: 3004

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday July 7, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Final answer Regis!

My high level goal was just to get on the air and do some DX'ing. I can’t do it in my house now so I decided that doing it from my minivan was the best option. My thinking was that doing it in the minivan would avoid having to put a an antenna on the house, would like me operate anytime (without bothering my family in the middle of the night and as a bonus, let me go mobile for ham events, when I’m out driving my kids around and waiting for them and other excursions.

In short… I’ve achieved my goal and then some.

Didn’t do the Yaesu 857D and Atas because it was a lot more cash out of pocket now ($1,200) and the Atas doesn’t allow for easy replacement of the whip

Didn’t do the Kenwood 480 mobile because it is ~$1,000 and doesn’t have VHF/UHF

Didn’t do the Kenwood RC-2000 with TS-2000 because the tuning wheel is super small and the display/controls are way different than head of TS-2000 and display is small.

In the end I got a ‘Little Tarheel’ screwdriver and mounted it on top of my minivan. I am using my TS-2000 and have it temporarily mounted in the front of the minivan on board at a perfect angle for use while in either of the front seats. It is not super elegant but it is simple… my motto for the project was ‘whatever it takes’ to get on the air and do some DX from the minivan. :)

The mounting of the antenna went well and looks good. Have to take the whip off when parking in garage. Got a manually retractable mag mount for VHF/UHF which needs to be retracted also when going in the garage. I got luck on the antenna location at back of van, has plenty of room for wires and nuts and choke for antenna control wire in the headliner. The grounding went really well also, was able to get my Dremel tool up in there and make a nice patch for the grounding washer / lug.

I’ve made contacts with NC in US, Sweden, Australia, Russia and W1AW/7 operating in Utah. I’m on the air, making DX contacts, learning and super happy.

Rick,

Thanks for documenting your adventure for us. I very much enjoyed watching/reading as you worked through the process of defining your objective, researching the solution, adjusting, and selecting the final solution.

Your installation efforts and excellent results were nice extras.

Regards,

Joe

Hi Rick, sorry for last response, stayed up on RIM after Field Day at Gentry Fire Tower. Another adventure.

I have found the Scorpion to be excellent in my applications. All screwdrivers function about the same. If done correctly, a screwdriver will not need an additional tuner, even with a 2kw linear. (2kw may be a limit of many screwdrivers, so the choices are smaller).

The Scorpion is not cheap, but it will do the job. Some major advantage is they do not require a tuner, full legal limit on power (want to see plasma? Ask), take off elevation angle is low and dependent more on the ground plane than height, sized for HOA friendly installation, bird strikes do not bring them crashing to the ground. Cons, not a high gain antenna, not directional, high power may require precautions depending on location, control cable in addition to coax, mounting, and now we get into the less major issues.

Screwdrivers are typically used for mobile operation, but stationary or portable applications are also applicable with excellent results. I've used R7s and Hustler 5 banders with no notable difference in performance.

A screwdriver, in my opinion, is an excellent choice for locations with HOA limitations. It will work in the yard or in the attic with slightly different results measured with analyzer, your receiver will not detect a difference.

I chose the Scorpion because it's almost indestructible in construction and can take a lot of abuse by mis-matches and power. It's made here in town so there is access to the manufacturer, Ron Douglas.

The HF bands you chose to operate are important to consider. Mine is a 10M through 160M. It is possible to load 6M but it tricky.

My home configuration is mounted on a 10' tripod with an elevated ground plane at 10' made of ham sticks. Elevated ground plane improves performance over a ground rod or even mobile installations. Using wire is better but requires space, is messy looking, and trips up the dogs, kids, and rabbits. Ham sticks are in practice just as efficient. A few people have mounted their Scorpion on 50' towers with elevated ground planes of tuned wires (4 per band) with even better results, just not HOA friendly.

Performance of the Scorpion is equal to my dipole in practice, less than 1 db difference in direction of dipole.

Integration of the Scorpion (screwdriver) controller with your radio is somewhat simple. Most screwdrivers come with a basic "up – down" rocker switch of some configuration. Some manufactures offer options for integrations to almost any radio brand. However, Scorpion does not, so there are a few 3rd party products recommended. One is a memory controller, tune the antenna to your favorite frequency and store in memory, then just press the memory button to return to that tuned frequency. Another controller, will not only remember, but do an auto tune to any frequency your radio is tuned and can be remotely controlled by the

“tune” button on the radio. I use the memory only controller because the auto tune option was not available at the time. I’ve found I have about 100khz of usable bandwidth before exceeding 1.5:1 SWR which is fine for my ICOM 7000. BTW the ICOM 7000 and other models are friendly for integration of screwdriver auto controllers (Kenwood and Yaseu I believe can be integrated depending on model).

I’m in the process of updating my analog radio to an SDR and will be updating the antenna controller, because I plan on doing remote operations of the station via internet.

Another mode of operation I use is “portable”. I take the antenna on the road and can setup my home base configuration in about 15 minutes, including local environmental adjustments. I’ve done this for the past 4 years with no major issues. I do have small flags on the radial to alert tall people. I have just completed a new mobile mount for the scorpion on my Jeep. Will be testing this mobile configuration during my summer travels.

And of course support of the antenna is important. Ron Douglas, the owner, is located in Cave Creek. If you have a problem, he will help you through problems. If you blow the antenna up and it needs some repair, he’s very accessible for help. And since he’s in Cave Creek, you can drive it up to his place and drive home with it working. That doesn’t mean it’s all free, if you burned it up, you may have to pay for parts. If it’s some fault of the antenna, he’ll fix it. He’s also known to come to local Phoenix locations and “get em working”.

Hope this helps answer your questions or generates more.

To: Queen_Creek_Hams@...m
Subject: [Queen_Creek_Hams] Screwdriver Antennas

I continue to dream about having a decent antenna so I can do some reasonable HF from my house. I can't really (and don't want to) put up a mast and a monster antenna so I'm thinking of getting something I can conceal in the attic above my garage, in the little courtyard at my house or something I can mount on my minivan so I can use it at home and remotely (I'm leaning towards this).

I've tried some stealth wire antennas in my attic and have made some contacts but it hasn't been good enough. I may still have some options for the attic but I've turned my attention towards screwdrivers (thanks to tip from Joe).

I saw one on Doug's truck last year as he blazed past me me on the '87 on our way to field day at the rim, I saw Brad's this weekend and I was just reading a post from Norm (topic - "80 Meters... what to do") which was really interesting and helpful.

Norm, you said in your post that your screwdriver outperformed your dipole. That is kinda what I wanted to hear. I've been looking at Scorpions, TarHeel and HI-Q so far. The Scorpions seem really expensive. I'd really prefer to stay local and do the Scorpion but is it really worth it?

Any and all feedback on the topic would be appreciated.

While driving ????

So we have a nut driver using a screw driver, scary stuff.

Kidding aside, it sounds like you are having a great time operating the world from your mobile. Good for you!

Keep us updated,

Haha, yeah, that sounds about right.

Now for my next trick.... For today do I play with my radio, pack for vacation or try figuring out why my AC decided to stop working today?!?!?!

Thanks to Jim and Norm for hanging out with me after the QC Hams breakfast this morning and helping me figure out why the s-meter on my radio wasn't working,... It was because AGC was turned off. Now I have the information necessary to provide accurate signal reports (or inaccurate signal reports if I want to be like everyone else). :)

Here are a couple pictures of the setup.

I'll upload more when I have a chance.

More success last night.... France and Russia again... Then Canary Islands and Curaçao.
All on 20 meters which was hopping last night due to contest.
I figured it wouldn't be right to make contacts with people doing the contest and not participate (because the time they spent with me wouldn't count because I wasn't submitting logs) so I spent some time researching the contest and decided to enter just these contacts so I could enjoy the dx'ing.

The setup is working well... If I can hear someone they can hear me. 3 of these were ack'd on my first call!!!

Jim/ Norm... My AC Went out while we were sitting there... Not sure if you remember it not getting cold while we were in the van. I think I found a leak by a sensor... I think the mechanic may have accidentally done this while working on my starter. :(

My FT857D sometimes causes my electronic suspension to go out to lunch.

Since you jumped the battery and then replaced it, it is conceivable that
your engine control module needs a reset.

Let us know what gets diagnosed as the real problem.

Regards,

Joe

Arizona Emergency Net - Maricopa
Monday July 14, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3026. Logging software

Yahoo group: Queen_Creek_Hams
Date: 2014-07-16 06:21:26 UTC
From: kf7mca@...
Topic: 3026 Message: 3026

I just did some research set up LOTW. I understand that this is just for sending info to ARRL and I need logging software to log my contacts (Jim, I checked and you can export from qrz.com but it is like $30/year).

I'm looking at getting logging software from same guy that Joe had at field day (n3fjp AC log). Any opinions? Do I pay the extra couple bucks and get the whole package that gets you like 50 programs (49 of which I'll probably never need:).

From: Jay Baack
Topic: 3026 Message: 3027

Logging is pretty personal.
It breaks down to what do you want the computer to do. Some want a digital copy of their rig (dials, buttons, meters) as well as interaction with DX clusters, digital modes etc. Full rig control on their computer, which can change with a mouse click. HRD is one example of that.

Others want a more minimal approach, such as the older software titles such as log eqf and others. Tabbed Fields for logging entries, and an export ability for LOTW/eQSL.

Both are solutions. It is a matter of what you want to see and manipulate.

As Joe has said in the past, try several and see what sticks.

Heck, you might end up with different logging programs depending on the event. Contest, one logger, digital modes, another.

Time to load software and play!

Jay N1RWY

Boy Scouts Electronic Swap Meet and Recycling
Sunday July 20, 2014
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

There is a free version of Ham Radio Deluxe, HRD, you should give that a look as well. Several of the club members run that.

Subject: Re: [Queen_Creek_Hams] Radio logging software .. consensus?
To: "Queen Creek Hams" <Queen_Creek_Hams@yahoogroups.com>
Cc:

Jay ant the Group,

Here is my take on logging software....

Probably the most popular all-around logging program (free):

N1MM Logger <http://n1mm.hamdocs.com/tiki-index.php> -
http://n1mm.hamdocs.com/tiki-index.php

N1MM's Logger has comprehensive rig control.

N3FJP <http://www.n3fjp.com/index.html> puts out some very good logging programs. He offers Amateur Contact Log <http://www.n3fjp.com/aclog.html> for general logging and a bunch of specialty loggers for contesting.

We use his Field Day Contest logger. N3FJP's loggers offer basic rig control. They are not free but very reasonably priced.

Another popular logger is contained in the very much used Ham Radio Deluxe <http://www.ham-radio-deluxe.com/index.html> suite which contains excellent rig control, DM780 for digital modes, satellite tracking, and the integrated HRD Logbook. The latest HRD is a "paid for" program.

The older version 5 is free and can be found here:

http://www.iw5edi.com/software/ham-radio-deluxe-5-download-links

3036. SWR Meters

Yahoo group: Queen_Creek_Hams
Date: 2014-07-22 19:43:44 UTC
From: Joe Sammartino
Topic: 3036 Message: 3036

I got a great question recently from one of our newer, but fast learning hams.

He wanted to know the scoop on portable SWR / Power meters. He is interested in having a portable unit to test HTs and mobile radio performance.

Here is my answer to him:

A battery operated digital swr meter is just one more thing to go wrong. They can be pricey. if it blows, you are done.

However, if you really got to have one, this model looks interesting and affordable:

http://www.ebay.com/itm/NISSEl-RS-50-Digital-SWR-Power-Meter-125-525-Mhz-UHF-VHF-For-2-Way-Radios-/271458873304?pt=US_Radio_Comm_Meters&hash=item3f3435afd8

I can't vouch for its operation since I don't have one.

Another digital meter for vhf/uhf...

http://www.ebay.com/itm/Digital-Mini-VHF-UHF-Power-SWR-Meter-120W-For-Yaesu-FT-8800R-FT-8900R-Two-Way-RF-/350869821051?pt=LH_DefaultDomain_0&hash=item51b178967b

Only 60 watts max, though.

Analog is better for me. Antenna SWR measurements are very necessary. An analog meter can be repaired. The meter below can tell you so much in one glance:

http://www.cheapham.com/products/Jetstream-JTW270-140%252d525-MHz-Cross-Needle-Wattmeter.html

- SWR
- forward power
- reflected power

It has two scales - perfect for lower power HTs.

Here is another option:

http://www.mfjenterprises.com/Product.php?productid=MFJ-844

I use something similar to that.

Don't forget good 3 feet jumpers and a dummy load comes in handy too:

http://www.mfjenterprises.com/Product.php?productid=MFJ-261

or

http://www.amazon.com/Harvest-DL-30A-Dummy-0-500MHz-PL-259/dp/B00CGOS6UE/ref=pd_rhf_se_s_cp_5_4AE8?ie=UTF8&refRID=1TSACRB4A5MB7J97KZFS

SWR analyzers are really antenna system analyzers. They have a different purpose - antenna tuning/characterizing - especially useful for HF operations and/or when you build your own antennas. No need to buy one, though. We have a few members that have them and I am sure, could be borrowed to meet a short-term need.

Questions? Comments? Let's here from you. Of course, if you have a portable SWR/Power meter - digital or analog - please share your experience with us.

Regards,

Joe, N2QOJ

3038. Re: [Queen_Creek_Hams] SWR Meters

Yahoo group: Queen_Creek_Hams
Date: 2014-07-22 20:39:18 UTC
From: Jay
Topic: 3036 Message: 3038

I have one of the Jetstream that was mentioned in Joe's post. I use it for the digital modes when I want to adjust power out by adjusting the ALC on the radio. Mine has a 12V plug so you can light up the meter.. I don't bother with that. High and low power switch (1-20w, and I think 1 -100.. maybe 200w)

One oldie but Goodie that Joe didn't mention is the Bird 43.
Rugged and bombproof.

https://www.google.com/search?q=bird+43+wattmeter&safe=off&client=firefox-a&hs=Bh2&rls=org.mozilla:en-US:official&channel=sb&tbm=isch&tbo=u&source=univ&sa=X&ei=JMPOU9n8GIflsASi3YGIBA&ved=0CC0QsAQ&biw=1134&bih=589

One meter that can handle every ham band know to man due the design of the swappable 'slug' elements.
Need a meter that can read 1-5w on 1200 MHz?. No problem. Need another meter to read 1000 - 15000W on 28.300 MHz? Same meter, just swap the element. (Pop one out, pop one in).
You can find them used at most hamfests or online. Not digital, but will measure anything you throw at it (with the right slug element). You want reflected power, just turn the slug element the other way.

If you are serious about antenna design or even playing around with antenna design to make the super lightweight 20m vertical that attaches to a ski pole camera mount with a 6' whip for SOTA.. (wait.. I am doing that too!) then an antenna analyzer is a G R E A T tool to have. Very easy, to operate to find what is going on with antennas..

From: aa7oo
Topic: 3036 Message: 3044
Attachments: 3 described; binary payloads are missing from this source WARC

I'll share one of my favorite meters. Fortunately or Unfortunately, I don't use SWR and Pwr meters much these days.

Meters by my definition are analog. My opinion, digital meters are OK in the shack, but they are complicated for tuning purposes.

I use an antique HM-102 ….. Heathkit, yep, I built as a kit. It will measure SWR or Forward Power or Reverse Power (almost the same as SWR). Handles power 200 watts and 2000 watts. It is not a dual meter movement, like many Fwd Pwr & SWR crossed meters, but requires some knob turning back and forth between Fwd Pwr High (or Fwd Pwr Low) and SWR. The HM-102 is a passive device, like many analog meter instruments, meaning no power required other than the RF being measured. The senor can be located at the radio end of the coax or remotely at the antenna end (two different measurements points). These can be considered clunky by many. They look good on the test bench though.

I picked mine up from the Heathkit factory in Benton Harbor, Mi., back in 71 at a ridiculous price of $29. They can be picked up today at hamfests or ebay for about the same $25. They are considered old technology, but can be "repaired". There are some ham clubs and businesses that will even refurbish or sell working used ones.

I use a MFJ-269B Antenna Analyzer. The MFJ-269B covers 1.6Mhz-450Mhz. The analyzer might be considered an expensive "tool" at about $300 these days. This is the one tool you will want if you build antennas. It's not the most accurate and can give you false positives to test your skills. If one tunes the antenna and transmission line to be 50 ohms resistance with no capacitive or inductive components of impedance, the radio will be happy. Power into the antenna is then determined by the materials and craftsmanship used.

If operating mobile, the cross meter Pwr – SWR analog meter I find more readable for tuning, not the numbers the needles are pointing at, but the behavior and relationship of the needles. When driving, it's too distracting to read a numerical digital meter and try to catch its up and down behaviors.

The subject of pwr / swr meters is interesting. They are just tools. Expensive or cheap, they are all close enough unless it's a commercial installation with contracted performance parameters, then you must invest in the expensive test gear. For amateur purposes meters don't have to be high end. Low end will due. Exceptions to this rule is when tuning complex repeater antennas with duplexers, notch, and pass filters.

This is a good subject for a Saturday breakfast. Maybe even a demo someplace. I'd even host some in Oct when I return…. And it cools down. Jim may be interested too.

Norm, aa7oo

Subject: [Queen_Creek_Hams] SWR Meters

I got a great question recently from one of our newer, but fast learning hams.

He wanted to know the scoop on portable SWR / Power meters. He is interested in having a portable unit to test HTs and mobile radio performance.

Here is my answer to him:

A battery operated digital swr meter is just one more thing to go wrong. They can be pricey. if it blows, you are done.

However, if you really got to have one, this model looks interesting and affordable:

http://www.ebay.com/itm/NISSEl-RS-50-Digital- <http://www.ebay.com/itm/NISSEl-RS-50-Digital-SWR-Power-Meter-125-525-Mhz-UHF-VHF-For-2-Way-Radios-/271458873304?pt=US_Radio_Comm_Meters&hash=item3f3435afd8> SWR-Power-Meter-125-525-Mhz-UHF-VHF-For-2-Way-Radios-/271458873304?pt=US_Radio_Comm_Meters&hash=item3f3435afd8

I can't vouch for its operation since I don't have one.

Another digital meter for vhf/uhf...

http://www.ebay.com/itm/Digital-Mini-VHF-UHF-Power- <http://www.ebay.com/itm/Digital-Mini-VHF-UHF-Power-SWR-Meter-120W-For-Yaesu-FT-8800R-FT-8900R-Two-Way-RF-/350869821051?pt=LH_DefaultDomain_0&hash=item51b178967b> SWR-Meter-120W-For-Yaesu-FT-8800R-FT-8900R-Two-Way-RF-/350869821051?pt=LH_DefaultDomain_0&hash=item51b178967b

Only 60 watts max, though.

Analog is better for me. Antenna SWR measurements are very necessary. An analog meter can be repaired. The meter below can tell you so much in one glance:

http://www.cheapham.com/products/Jetstream-JTW270-140%252d525-MHz-Cross-Needle-Wattmeter.html

- SWR

- forward power

- reflected power

It has two scales - perfect for lower power HTs.

Here is another option:

http://www.mfjenterprises.com/Product.php?productid=MFJ-844

I use something similar to that.

Don't forget good 3 feet jumpers and a dummy load comes in handy too:

http://www.mfjenterprises.com/Product.php?productid=MFJ-261

or

3045. Some ideas for an antenna for your home

Yahoo group: Queen_Creek_Hams
Date: 2014-07-23 18:32:19 UTC
From: Joe Sammartino
Topic: 3045 Message: 3045
Attachments: 2 described; binary payloads are missing from this source WARC

I got asked another good question today....maybe others can benefit from my response. Of course, chime in with your thoughts as well.

Question:

Can you recommend a the best pre-built home antenna?

Here is my answer:

Well, the best pre-built home antenna might not be the economically right choice. Or it may be, I really don't know the specific need.

My assumptions are:

- vhf / uhf with SO-239 connector
- home installation
- good to very good performance
- reasonable price

Here are the best choices for above roof line antennas in our area:

For *stealthy*, HOA inhibiting environments:

VT-27
144-148 & 440-450
2.6
36 in.
3 ft. RG-58
$127.95

http://ventenna.com/Ham-Description.html

This is the easiest, self mounting solution with ok to good performance - and it looks great!

*Next, f**or standard, high performance:*

Diamond X50A - http://www.hamradio.com/detail.cfm?pid=H0-000022

This is just a very good dual band base antenna with very good gain.

You also need to figure out how to *mount* the above antennas - side of home with mast, supported at eave, roof mount, etc.

You will also need sufficient length of coax, 100 feet maximum, keeping it to 50 feet would be even better at these frequencies:

www.wiredco.com

https://www.wiredco.com/RG_8X_Black_RG8X_Coax_Antenna_Cable_PL_259_Male_p/rgblacecablemm100ft.htm

https://www.wiredco.com/RG_8X_Black_RG8X_Coax_Antenna_Cable_PL_259_Male_p/rgblackmm50ft.htm

[image: Inline image 1]

If you are planning to use this antenna with a handheld radio, you will need an antenna adapter for the radio that allows connecting to a PL-259 connector from the coax.

Examples:

[image: Inline image 2]

The pigtail type is preferred for mobile and home use - less stress to the radio's connector.

SMA Femaile to UHF SO239 Female is what Baofeng and Wouxun radios require.

https://www.wiredco.com/SMA_Female_Jack_female_SO_239_UHF_RG316_50_ohm_p/smafemso_239fem3.htm

https://www.wiredco.com/SMA_Female_Jack_to_UHF_female_Plug_Radio_Adapter_p/so239smaf1.htm

The Yaesu FT-60 requires the SMA Male version.

https://www.wiredco.com/SMA_Female_Jack_female_SO_239_UHF_RG316_50_ohm_p/smamaleso_239mal1.htm

One final note...

Have interested folks come to the QCECG Thursday night meetings or QCARC breakfests to get information like this first-hand from folks who have had the same needs.

And take some time to look at typical home installations in our "photos" section of the Queen Creek Hams Yahoo Group.

3049. Radio on the Rim

Yahoo group: Queen_Creek_Hams
Date: 2014-07-27 19:35:41 UTC
From: Joe Sammartino
Topic: 3049 Message: 3049
Attachments: 3 described; binary payloads are missing from this source WARC

It's that time again! Yep, we are doing it again! Radio fun and camping fun at the Mogollon Rim <https://www.google.com/maps/place/34%C2%B020'24.5%22N+110%C2%B059'10.0%22W/@34.3401295,-110.9861,15z/data=!3m1!4b1!4m2!3m1!1s0x0:0x0?hl=en>
.

Dennis and I have planned this event to be from Thursday, August 14th through Saturday, August 16th.

Dennis is planning on arriving Thursday afternoon or so and I will probably arrive either around 9 PM or midnight, depending on my work schedule.

Radios and VHF/UHF antennas usually go up Thursday evening with HF antennas erected early Friday morning.

Come Thursday, come Friday, come when you can. We will clear out Saturday late afternoon.

Accommodations and food are up to you. If we have enough firm commitments, we can rent a PortaPotty for the couple of days. We did that on our first trip and it worked out great. If not, I have a utilities tent for that purpose - just bring your toilet kit.

So, let me and Dennis know *asap* if you can attend. We will have fun as always - radios and camping. This is the BEST venue for getting acquainted with HF for new hams and making worldwide QSOs for everyone. Dennis will be bringing his famous Go-Box and I will be bringing a complete HF Station as well. We will have reliable simplex and repeater coverage back to the Valley. Talk-in, drive-in, and camp frequencies will be announced. Learn about batteries, solar panel power/charging, inverters, antennas, antenna raising, HF operation, etc.

The location will be the same camp area as in the past. We plan on using the original Field Day camp site #27 - or one close by if #27 is taken - for this event. Once Someone gets up there and claims a couple of camp sites, I'll announce it to all of you and the Yahoo Groups.

A PDF attachment of the directions and corresponding map is attached to this email. (It is recommended that you print out and bring with you.) There is also a JPEG file showing a bit more detail of the local area. For Google Earth users, a KMZ file is also attached.

If you have a navigation unit, input the following coordinates: 34.340134, -110.986129 (These coordinates are in DD.dddddd format, that means degrees and decimal.)

Do not depend on your Smartphone for navigation if you do not have local maps installed in the phone. Carrier coverage is spotty and you may end up a creek without a paddle (or off the Rim without a rope).

Map Link: http://tinyurl.com/QCFieldDay2013

Interactive Map - Google Site Map
<https://www.google.com/maps/place/34%C2%B020'24.5%22N+110%C2%B059'10.0%22W/@34.3401295,-110.9861,15z/data=!3m1!4b1!4m2!3m1!1s0x0:0x0?hl=en>

As Always, any questions or comments can be directed to me or Dennis (kf7ryx@...), or, back to the Group.

I hope you all can make it. It will be memorable.

Regards,

Joe, N2QOJ

East Valley Repeater Group
Monday July 28, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

Arizona Emergency Net - Maricopa
Monday July 28, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

I was using a Genesis G11 for a while. I was easily reaching Russia, Ukraine throughout the northern US South America and Japan a few times mostly on 40 meters CW at about 10 watts using a inverted V off the back of my house.

Hi Jay,

I□m assuming you□re taking about HF SDR. I didn□t hesitate too much on my decision to jump in, it just took me a while to decide which SDR to invest my meager radio budget.

I□ve been studying and playing with SDR for several years now. FlexRadio is way overpriced. ApacheLabs was at about the right price, became popular, and costs went up quickly. Hermes by TAPR is the basis for all the ham SDR radios (manufactures will debate, yet they were all in the Hermes project). Hermes is no longer in production, used ones are treasured (ApacheLabs has production rights to Hermes).

SDR is a convoluted acronym these days and covers a wide architecture of radios. DDC and DUC (direct down conversion, direct up conversion) is in my opinion (and others) the leading architecture.

I picked up an SDRStick radio. This is a DDC/DUC transceiver, meaning it converts RF directly to AF, there is no IF. See www.sdrstick.com <http://www.sdrstick.com> . It is based on the HERMES TAPR design which is the basis for FlexRadio, ApacheLabs, and many other commercial radios. Scott Cowling is making these in his spare time at his business located in Tempe. This is more for experimenters or someone wanting a high quality SDR on a low budget. Buy completed receiver board and/or transmitter board from SDRStick; and then purchase a high end FPGA SDK from Altera or Arrow.

I just got the transmitter online and working this past week. QRP at ½ watt all modes.

There are at least 6 or 7 open source software applications available. Open source makes it inexpensive to have 4 or 5 software applications that turn the hardware into a different radio.

I favor HDSDR software, but also use PowerSDR.

Something interesting about DDC radios is the bandwidth that □one□ □software□ radio can be detecting, 384Khz. That is for example the 20M band. Then launch another software radio on 40M, and then another and another, until your PC explodes. All at the same time. Yes, I can blow up my 1G Lan. That is my limitation on data bits from the hardware radio. My PC is at 98% CPU with the LAN port at 100%. Back off one receiver and the other recivers are working just fine. And yes, the transmitter can transmit to each of the tuned receiver frequency at the same time. All using the same hardware.

WSPR and the WJST modes are working, yes at ½ watt.

Having my challenges with PSK modes, just too many bleeding stations out there for simple QRP. I have to get smarter at getting in there.

I□ve not yet made a CW contact, just haven□t had time.

Have scheduled SSB testing this week with focus group who will turn their beams my way while trying SSB, PSK, FM, and CW.

My next addition is a 50-60 watt linear with band filters. BTW, the SDRSTick TX2 does not require filters, it□s very clean.

Regards to the Fun Cube. It□s a good jump into SDR concepts if you don□t know what it□s all about. Relatively inexpensive. It□s a learning SDR radio to give some working experience with SDR. It will not wow you with performance, but then it□s not in that quality class of radio. It□s still amazing what that little dongle can hear.

For about the same price as Fun Cube is the BeRadio by Arrow. It□s a small FPGA SDK with a broadcase radio card.

Soft Rock radios are SDR kits. Mostly IF SDR. But use the same software as Fun Cube.

Hi Tom,

I’m not an FPGA programmer by a long shot. When I went with the SDRStick / Hermes path with DDC and FPGAs, I thought it would allow me to explore the “tweaking” of source code. Get my hands dirty. So I purchased the Cyclone V SoC 5CSXFC6D6F31 with dual A9 ARMs and 2G RAM SDK several months ago. The SDK has some Labs. Used the Altera Quartus and DS5 development software’s.

I’ve done the Labs. I understand the architecture of writing code to various areas of the FPGA. After several days, I managed to get the LEDs to blink my call in CW!!!!!

What is it you are wanting to do?

Norm, aa7oo

I've been working on a project for a few years. Have had some support from Microsemi, Linear Tech and a few others. Sourced a PCB manufacturer, etc. Don't have the funds or training in HDL to finish it off.

I actually spoke to someone at Zephyr back in 2011 but they wanted a large sum to do the design to my specs where I've been looking more for a semi-open source of support.

I tried doing a kickstarter campaign but they would not approve it because I did not have a working prototype.

I looked at out sourcing the FPGA code and doing the hardware but it all comes down to funding. I had something in the works but it hasn't come through and won't be tell next year now if it even does.

Anyway, was happy to see someone had been playing with it:)

I need to get my G11 back on the air. Have you seen them? Genesis out of Australia.

Tom,

Like to get together more an talk about your experiences and share.

Sounds like you've hit that wall of "time" vs "vast skill diversity" vs "money". All are difficult to manage on a project as complex as SDR.

I take with Scotty at Zephyr frequently. He's attempting to attract more open source support to move current code out of IP realm.

It's very rare that an individual, or small business, has the full resources to build such a project. Soft Rock got into it successfully, at the very low end of sdr but solved the problem by breaking the project down into manageable and deliverable chunks (that effort has been over 10+ years). The deliverable specs were downsized to single bands and then further very small band segments. And while its in the SDR class of radio definition, it's really an I/Q radio with fixed DSP. Simple but very focused.

Have you studied the enormous task TAPR took to develop the Hermes, it was 100's of contributors. There were teams working on architecture, hardware, manufacturing, and of course software for the FPGA and PC for years. The software for FPGA is always being patched and released every few weeks.

It's a really big effort to keep things evolving and up to date with ham sdr.

Commercial SDRs are mostly expensive to cover the high costs of FPGA software.

The Genesis is a neat radio. I've not tracked how it is doing, nor seen in operation. Another reason to get together.

Norm, aa7oo

Subject: RE: [Queen_Creek_Hams] funcube or other sdr users?

I've been working on a project for a few years. Have had some support from Microsemi, Linear Tech and a few others. Sourced a PCB manufacturer, etc. Don't have the funds or training in HDL to finish it off.

I actually spoke to someone at Zephyr back in 2011 but they wanted a large sum to do the design to my specs where I've been looking more for a semi-open source of support.

I tried doing a kickstarter campaign but they would not approve it because I did not have a working prototype.

I looked at out sourcing the FPGA code and doing the hardware but it all comes down to funding. I had something in the works but it hasn't come through and won't be tell next year now if it even does.

Anyway, was happy to see someone had been playing with it:)

I need to get my G11 back on the air. Have you seen them? Genesis out of Australia.

On Aug 2, 2014 8:54 PM, "'aa7oo' aa7oo.az@... <mailto:aa7oo.az@...> [Queen_Creek_Hams]" <Queen_Creek_Hams@yahoogroups.com <mailto:Queen_Creek_Hams@yahoogroups.com> > wrote:

Hi Tom,

I’m not an FPGA programmer by a long shot. When I went with the SDRStick / Hermes path with DDC and FPGAs, I thought it would allow me to explore the “tweaking” of source code. Get my hands dirty. So I purchased the Cyclone V SoC 5CSXFC6D6F31 with dual A9 ARMs and 2G RAM SDK several months ago. The SDK has some Labs. Used the Altera Quartus and DS5 development software’s.

I’ve done the Labs. I understand the architecture of writing code to various areas of the FPGA. After several days, I managed to get the LEDs to blink my call in CW!!!!!

What is it you are wanting to do?

Hi Norm,

How much have you played with the FPGA"s?

I have a DE2-115 (Cyclone 4) with high speed data converters and SMA inputs / outputs. I also have some other FPGA kits

but I don't have the HDL programming experience.

Tom

Hi Jay,

I’m assuming you’re taking about HF SDR. I didn’t hesitate too much on my decision to jump in, it just took me a while to decide which SDR to invest my meager radio budget.

I’ve been studying and playing with SDR for several years now. FlexRadio is way overpriced. ApacheLabs was at about the right price, became popular, and costs went up quickly. Hermes

by TAPR is the basis for all the ham SDR radios (manufactures will debate, yet they were all in the Hermes project). Hermes is no longer in production, used ones are treasured (ApacheLabs has production rights to Hermes).

SDR is a convoluted acronym these days and covers a wide architecture of radios. DDC and DUC (direct down conversion, direct up conversion) is in my opinion (and others) the leading architecture.

I picked up an SDRStick radio. This is a DDC/DUC transceiver, meaning it converts RF directly to AF, there is no IF. See www.sdrstick.com <http://www.sdrstick.com> . It is based on the HERMES TAPR design which is the basis for FlexRadio, ApacheLabs, and many other commercial radios. Scott Cowling is making these in his spare time at his business located in Tempe. This is more for experimenters or someone wanting a high quality SDR on a low budget. Buy completed receiver board and/or transmitter board from SDRStick; and then purchase a high end FPGA SDK from Altera or Arrow.

I just got the transmitter online and working this past week. QRP at ½ watt all modes.

There are at least 6 or 7 open source software applications available. Open source makes it inexpensive to have 4 or 5 software applications that turn the hardware into a different radio.

I favor HDSDR software, but also use PowerSDR.

Something interesting about DDC radios is the bandwidth that “one” “software” radio can be detecting, 384Khz. That is for example the 20M band. Then launch another software radio on 40M, and then another and another, until your PC explodes. All at the same time. Yes, I can blow up my 1G Lan. That is my limitation on data bits from the hardware radio. My PC is at 98% CPU with the LAN port at 100%. Back off one receiver and the other recivers are working just fine. And yes, the transmitter can transmit to each of the tuned receiver frequency at the same time. All using the same hardware.

WSPR and the WJST modes are working, yes at ½ watt.

Having my challenges with PSK modes, just too many bleeding stations out there for simple QRP. I have to get smarter at getting in there.

I’ve not yet made a CW contact, just haven’t had time.

Have scheduled SSB testing this week with focus group who will turn their beams my way while trying SSB, PSK, FM, and CW.

My next addition is a 50-60 watt linear with band filters. BTW, the SDRSTick TX2 does not require filters, it’s very clean.

Regards to the Fun Cube. It’s a good jump into SDR concepts if you don’t know what it’s all about. Relatively inexpensive. It’s a learning SDR radio to give some working experience with SDR. It will not wow you with performance, but then it’s not in that quality class of radio. It’s still amazing what that little dongle can hear.

For about the same price as Fun Cube is the BeRadio by Arrow. It’s a small FPGA SDK with a broadcase radio card.

Soft Rock radios are SDR kits. Mostly IF SDR. But use the same software as Fun Cube.

Subject: RE: [Queen_Creek_Hams] funcube or other sdr users?

I've looked at TAPR a little. I've talked to the folks at EmCraft (they build the SDK for Microsemi). I spoke with them about building a plugin FPGA module and they also put me in touch with Chris Testa.

I've also had some support from engineer's at Mentor Graphics and through IEEE. I have MATLAB Code for a variable sample rate receiver but don't have the add-ons to convert it to HDL and run the board directly from Simulink.

That would be great to talk. I'm home most of the time. Email or give me a call and we can try to set something up.

I've been working on a project for a few years. Have had some support from Microsemi, Linear Tech and a few others. Sourced a PCB manufacturer, etc. Don't have the funds or training in HDL to finish it off.

I actually spoke to someone at Zephyr back in 2011 but they wanted a large sum to do the design to my specs where I've been looking more for a semi-open source of support.

I tried doing a kickstarter campaign but they would not approve it because I did not have a working prototype.

I looked at out sourcing the FPGA code and doing the hardware but it all comes down to funding. I had something in the works but it hasn't come through and won't be tell next year now if it even does.

Anyway, was happy to see someone had been playing with it:)

I need to get my G11 back on the air. Have you seen them? Genesis out of Australia.

On Aug 2, 2014 8:54 PM, "'aa7oo' aa7oo.az@... <mailto:aa7oo.az@...> [Queen_Creek_Hams]" <Queen_Creek_Hams@yahoogroups.com <mailto:Queen_Creek_Hams@yahoogroups.com> > wrote:

Hi Tom,

I'm not an FPGA programmer by a long shot. When I went with the SDRStick / Hermes path with DDC and FPGAs, I thought it would allow me to explore the "tweaking" of source code. Get my hands dirty. So I purchased the Cyclone V SoC 5CSXFC6D6F31 with dual A9 ARMs and 2G RAM SDK several months ago. The SDK has some Labs. Used the Altera Quartus and DS5 development software's.

I've done the Labs. I understand the architecture of writing code to various areas of the FPGA. After several days, I managed to get the LEDs to blink my call in CW!!!!!

What is it you are wanting to do?

Hi Norm,

How much have you played with the FPGA"s?

I have a DE2-115 (Cyclone 4) with high speed data converters and SMA inputs / outputs. I also have some other FPGA kits

but I don't have the HDL programming experience.

On Sat, Aug 2, 2014 at 6:10 PM, 'aa7oo' aa7oo.az@... <mailto:aa7oo.az@...> [Queen_Creek_Hams] <Queen_Creek_Hams@yahoogroups.com <mailto:Queen_Creek_Hams@yahoogroups.com> > wrote:

Hi Jay,

I’m assuming you’re taking about HF SDR. I didn’t hesitate too much on my decision to jump in, it just took me a while to decide which SDR to invest my meager radio budget.

I’ve been studying and playing with SDR for several years now. FlexRadio is way overpriced. ApacheLabs was at about the right price, became popular, and costs went up quickly. Hermes by TAPR is the basis for all the ham SDR radios (manufactures will debate, yet they were all in the Hermes project). Hermes is no longer in production, used ones are treasured (ApacheLabs has production rights to Hermes).

SDR is a convoluted acronym these days and covers a wide architecture of radios. DDC and DUC (direct down conversion, direct up conversion) is in my opinion (and others) the leading architecture.

I picked up an SDRStick radio. This is a DDC/DUC transceiver, meaning it converts RF directly to AF, there is no IF. See www.sdrstick.com <http://www.sdrstick.com> . It is based on the HERMES TAPR design which is the basis for FlexRadio, ApacheLabs, and many other commercial radios. Scott Cowling is making these in his spare time at his business located in Tempe. This is more for experimenters or someone wanting a high quality SDR on a low budget. Buy completed receiver board and/or transmitter board from SDRStick; and then purchase a high end FPGA SDK from Altera or Arrow.

I just got the transmitter online and working this past week. QRP at ½ watt all modes.

There are at least 6 or 7 open source software applications available. Open source makes it inexpensive to have 4 or 5 software applications that turn the hardware into a different radio.

I favor HDSDR software, but also use PowerSDR.

Something interesting about DDC radios is the bandwidth that “one” “software” radio can be detecting, 384Khz. That is for example the 20M band. Then launch another software radio on 40M, and then another and another, until your PC explodes. All at the same time. Yes, I can blow up my 1G Lan. That is my limitation on data bits from the hardware radio. My PC is at 98% CPU with the LAN port at 100%. Back off one receiver and the other recivers are working just fine. And yes, the transmitter can transmit to each of the tuned receiver frequency at the same time. All using the same hardware.

WSPR and the WJST modes are working, yes at ½ watt.

Having my challenges with PSK modes, just too many bleeding stations out there for simple QRP. I have to get smarter at getting in there.

I’ve not yet made a CW contact, just haven’t had time.

Have scheduled SSB testing this week with focus group who will turn their beams my way while trying SSB, PSK, FM, and CW.

My next addition is a 50-60 watt linear with band filters. BTW, the SDRSTick TX2 does not require filters, it’s very clean.

Regards to the Fun Cube. It’s a good jump into SDR concepts if you don’t know what it’s all about. Relatively inexpensive. It’s a learning SDR radio to give some working experience with SDR. It will not wow you with performance, but then it’s not in that quality class of radio. It’s still amazing what that little dongle can hear.

For about the same price as Fun Cube is the BeRadio by Arrow. It’s a small FPGA SDK with a broadcase radio card.

Soft Rock radios are SDR kits. Mostly IF SDR. But use the same software as Fun Cube.

Hi Jay,

There's a lot of stuff out there but if you want to see the latest check Chris Testa uTube latest talks. He's building a cell phone type SDR that will be able to cover something like 50-3000 MHz.

His stuff is all open source do the schematics, computer code, everything is available to download

Jay,

Be fun to have you join. SDR is a big topic and covers a lot of turf. I've followed the openHPSDR project (TAPR), and other threads on SDR development. It really is a subject everyone can find and apply something they are interested in. Operation of the radio is a real experience, it's different than analog radio's, the technique of tuning and what filters do. The language of SDR and Analog Radio use the same terms, like filter, tuner, DSP, but are accomplished totally differently. Yet, at the end of the day, it's all about making that contact. That's the same in both the digital or analog camp.

Begs the question: Is the universe Analog or Digital? I could debate from either perspective and can't draw a definitive answer.

I posted to Tom my cell, you're welcome to call.

Norm

Subject: RE: [Queen_Creek_Hams] funcube or other sdr users?

I've been working on a project for a few years. Have had some support from Microsemi, Linear Tech and a few others. Sourced a PCB manufacturer, etc. Don't have the funds or training in HDL to finish it off.

I actually spoke to someone at Zephyr back in 2011 but they wanted a large sum to do the design to my specs where I've been looking more for a semi-open source of support.

I tried doing a kickstarter campaign but they would not approve it because I did not have a working prototype.

I looked at out sourcing the FPGA code and doing the hardware but it all comes down to funding. I had something in the works but it hasn't come through and won't be tell next year now if it even does.

Anyway, was happy to see someone had been playing with it:)

I need to get my G11 back on the air. Have you seen them? Genesis out of Australia.

On Aug 2, 2014 8:54 PM, "'aa7oo' aa7oo.az@... <mailto:aa7oo.az@...> [Queen_Creek_Hams]" <Queen_Creek_Hams@yahoogroups.com <mailto:Queen_Creek_Hams@yahoogroups.com> > wrote:

Hi Tom,

I’m not an FPGA programmer by a long shot. When I went with the SDRStick / Hermes path with DDC and FPGAs, I thought it would allow me to explore the “tweaking” of source code. Get my hands dirty. So I purchased the Cyclone V SoC 5CSXFC6D6F31 with dual A9 ARMs and 2G RAM SDK several months ago. The SDK has some Labs. Used the Altera Quartus and DS5 development software’s.

I’ve done the Labs. I understand the architecture of writing code to various areas of the FPGA. After several days, I managed to get the LEDs to blink my call in CW!!!!!

What is it you are wanting to do?

Norm, aa7oo

Hi Norm,

How much have you played with the FPGA"s?

I have a DE2-115 (Cyclone 4) with high speed data converters and SMA inputs / outputs. I also have some other FPGA kits

but I don't have the HDL programming experience.

Hi Jay,

I’m assuming you’re taking about HF SDR. I didn’t hesitate too much on my decision to jump in, it just took me a while to decide which SDR to invest my meager radio budget.

I’ve been studying and playing with SDR for several years now. FlexRadio is way overpriced. ApacheLabs was at about the right price, became popular, and costs went up quickly. Hermes by TAPR is the basis for all the ham SDR radios (manufactures will debate, yet they were all in the Hermes project). Hermes is no longer in production, used ones are treasured (ApacheLabs has production rights to Hermes).

SDR is a convoluted acronym these days and covers a wide architecture of radios. DDC and DUC (direct down conversion, direct up conversion) is in my opinion (and others) the leading architecture.

I picked up an SDRStick radio. This is a DDC/DUC transceiver, meaning it converts RF directly to AF, there is no IF. See www.sdrstick.com <http://www.sdrstick.com> . It is based on the HERMES TAPR design which is the basis for FlexRadio, ApacheLabs, and many other commercial radios. Scott Cowling is making these in his spare time at his business located in Tempe. This is more for experimenters or someone wanting a high quality SDR on a low budget. Buy completed receiver board and/or transmitter board from SDRStick; and then purchase a high end FPGA SDK from Altera or Arrow.

I just got the transmitter online and working this past week. QRP at ½ watt all modes.

There are at least 6 or 7 open source software applications available. Open source makes it inexpensive to have 4 or 5 software applications that turn the hardware into a different radio.

I favor HDSDR software, but also use PowerSDR.

Something interesting about DDC radios is the bandwidth that “one” “software” radio can be detecting, 384Khz. That is for example the 20M band. Then launch another software radio on 40M, and then another and another, until your PC explodes. All at the same time. Yes, I can blow up my 1G Lan. That is my limitation on data bits from the hardware radio. My PC is at 98% CPU with the LAN port at 100%. Back off one receiver and the other recivers are working just fine. And yes, the transmitter can transmit to each of the tuned receiver frequency at the same time. All using the same hardware.

WSPR and the WJST modes are working, yes at ½ watt.

Having my challenges with PSK modes, just too many bleeding stations out there for simple QRP. I have to get smarter at getting in there.

I’ve not yet made a CW contact, just haven’t had time.

Have scheduled SSB testing this week with focus group who will turn their beams my way while trying SSB, PSK, FM, and CW.

My next addition is a 50-60 watt linear with band filters. BTW, the SDRSTick TX2 does not require filters, it’s very clean.

Regards to the Fun Cube. It’s a good jump into SDR concepts if you don’t know what it’s all about. Relatively inexpensive. It’s a learning SDR radio to give some working experience with SDR. It will not wow you with performance, but then it’s not in that quality class of radio. It’s still amazing what that little dongle can hear.

For about the same price as Fun Cube is the BeRadio by Arrow. It’s a small FPGA SDK with a broadcase radio card.

Soft Rock radios are SDR kits. Mostly IF SDR. But use the same software as Fun Cube.

Norm, aa7oo

East Valley Repeater Group
Monday August 4, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

From: Queen_Creek_Hams@yahoogroups.com
Topic: 3068 Message: 3068

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday August 4, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Hi Folks,

It looks like the next visible pass of the International Space Station is this evening and should be very good as long we have no clouds.

Time: Tue Aug 05 7:43 PMVisible: 5 minMax Height: 82 degreesAppears: SW, that's 225 degreesDisappears: NE, that's 45 degrees

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

The attached graphic will help you to find the ISS using the information above.

Regards,

Joe

From: Joe Sammartino
Topic: 3074 Message: 3074

Hello Everyone,

We are coming down to making a decision or two (e.g. portapotty rental) concerning the Radio on the Rim trip.

Dennis and I need to know by tomorrow who is definitely coming. Please respond and tell us how many in your party will participate and for how many days.

Thanks,

Joe, N2QOJ

>> Yep, we are doing it again!
>>
>> Dennis and I have planned for this event to be from Thursday, August 14th through Saturday, August 16th.
>>
>> Dennis is planning on arriving Thursday afternoon or so and I will probably arrive either around 9 PM or midnight, depending on my work schedule.
>>
>> Radios and VHF/UHF antennas usually go up Thursday evening with HF antennas erected early Friday morning.
>>
>> Come Thursday, come Friday, come when you can. We will clear out Saturday late afternoon.
>>
>> Accommodations and food are up to you. If we have enough firm commitments, we can rent a PortaPotty for the couple of days. We did that on our first trip and it worked out great. If not, I have a utilities tent for that purpose - just bring your toilet kit.

>>
>> So, let me and Dennis know asap if you can attend. We will have fun as always - radios and camping. This is the BEST venue for getting acquainted with HF for new hams and making worldwide QSOs for everyone. Dennis will be bringing his famous Go-Box and I will be bringing a complete HF Station as well. We will have reliable simplex and repeater coverage back to the Valley. Talk-in, drive-in, and camp frequencies will be announced.
>>
>> The location will be the same camp area as in the past. There will be a formal announcement to the QCARC and QCECG Yahoo Groups in a day or so with details.
>>
>> In the meantime, here are directions to the general vicinity:
>>
>> We plan on using the original Field Day camp site #27, or one close by if #27 is taken, for this event. Once Someone gets up there and claims a camp site, I'll announce it to all of you and the Yahoo Groups.
>>
>> A PDF attachment of the directions and corresponding map is attached to this email. (It is recommended that you print out and bring with you.) There is also a JPEG file showing a bit more detail of the local area.
>>
>> If you have a navigation unit, input the following coordinates: 34.340134, -110.986129 (These coordinates are in DD.dddddd format, that means degrees and decimal.)
>>
>> Do not depend on your Smartphone for navigation if you do not have local maps installed in the phone. Coverage is spotty and you may end up a creek without a paddle.
>>
>> Map Link: http://tinyurl.com/QCFieldDay2013
>>
>> Example Directions:
>>
>> Driving directions to Camp Site #27 turn off--- 3D
>>
>> Sky View Ranch
>> 4632 E Germann Rd
>> Gilbert, AZ 85297
>>
>> 1. Head west on E Germann Rd toward S Fenceline Way
>> 0.1 mi
>> 2. Take the 1st right onto S Fenceline Way
>> 0.2 mi
>> 3. Take the 2nd right toward S Posse Trail
>> 0.1 mi
>> 4. Turn left onto S Posse Trail
>> 0.1 mi
>> 5. Take the 3rd right onto E Los Altos Rd
>> 0.2 mi
>> 6. Take the 2nd left onto S Power Rd

3078. Another way to monitor our local repeaters

Yahoo group: Queen_Creek_Hams

From: Joe Sammartino
Topic: 3078 Message: 3078

Folks,

Did you know that you can listen to the Ocotillo and QC repeaters without a radio?

Well, you can. You need a computer, laptop, tablet, or smartphone.

Just navigate to this link with your browser:

http://www.broadcastify.com/listen/feed/10544/web/?rl=rr

It is near real time. There is a 30 second delay.

Regards,

Joe

3083. Re: [Queen_Creek_Hams] Radio on the Rim - UPDATE

Yahoo group: Queen_Creek_Hams
Date: 2014-08-11 00:24:46 UTC
From: Joe Sammartino
Topic: 3083 Message: 3083

Folks,

We have received approval for use of the call sign "N7Q <http://www.n2qoj.com/n7q.htm>" as a special event call sign for the upcoming radio camping trip to the Rim later this week.

We will be offering a certificate commemorating this special event to all radio stations that log a QSO with us.

In preparation, a special event web page has been put together describing the Mogollon Rim and event details. This page will be updated with event frequencies and other information as necessary.

You can view it at: Radio On The Rim <http://www.n2qoj.com/n7q.htm>

Feel free to refer anyone with an interest in this event to that link. If you can't join us on site, try to log a QSO with us during the event so you can request your commemorative certificate.

Regards,

Joe, N2QOJ

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday August 11, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

3086. Arizona Emergency Net - Maricopa, 8/11/2014, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-08-11 15:01:14 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3086 Message: 3086

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday August 11, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Hi Folks,

One final check with all of you....

I need a final count on *who is coming*. The last time I asked, I got a pretty good response from the people that are* not* coming!

This last time, I would like to hear from only the folks who are coming. Please include how many in your party, when you plan to arrive/leave, etc.

Thank you in advance,

Joe, N2QOJ

3091. Important - Replying to Messages

Yahoo group: Queen_Creek_Hams
Date: 2014-08-13 18:39:00 UTC
From: Joe Sammartino
Topic: 3091 Message: 3091

Hi Folks,

Some of you are new to YAHOO Groups so I thought I would clarify about replying to messages from a YAHOO Group.

For example, when one of you sends a message (or posts online) to the YAHOO Group at qccomgroup@yahoogroups.com, your message is distributed to the entire membership. That is exactly what is supposed to happen.

If you setup your membership to receive individual messages from the Group, you will receive each message from "qccomgroup@yahoogroups.com". If you want to reply to that message and have it distributed to the entire membership, then all you have to do is hit your "reply" button in your mail client/app.

HOWEVER, if you want to reply only to the original person who posted that message to the Group, then, after you select "reply", you MUST CHANGE your addressee in the TO: line from qccomgroup@yahoogroups.com to the personal email address of that original poster. Of course, if you compose an original email to the person directly, then you will avoid any chance of inadvertently replying to the entire Group.

Follow the same protocol for any YAHOO Group message that you may receive.

Keeping this in mind, this will avoid the entire Group from reading something you intended to be private to one individual.

If you have any questions about how to you the Groups email distribution, let me know.

Regards,

Joe, N2QOJ - Queen_Creek_Hams and QCCOMGroup Owner

Joe Sammartino
480.381.2993 Mobile
jsammartino@...

P.S. - If you have your membership set to "Digest" mode, then the same advice applies.

3093. Important - To All QCECG Members - I need your info for a test asap

Yahoo group: Queen_Creek_Hams
Date: 2014-08-13 18:53:16 UTC
From: Joe Sammartino
Topic: 3093 Message: 3093

Folks,

I am putting together an emergency alert test system for our QCECG members.

Here is what I need from you:

- Name
- Call Sign
- 10 digit cell phone number
- Name of your cell carrier (Sprint, TMobile, AT&T, Boost, Cricket, etc.)

And here is how I would like you to provide it to me, just reply to me directly (*Change the TO: address line to jsammartino@... <jsammartino@...>*) and format the information in a one line response just like this example:

Joe Sammartino, N2QOJ, 4803812993, TMobile

If all goes well, when complete, we will have an automated alert text system with the capability to also automate your response information.

More on that later.

If you get this email or request more than once, sorry. Unfortunately, not all QCECG members have signed up to the QCCOMGroup YAHOO Group. If you still need to do that, send me a private email.

Thank you,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling
Sunday August 17, 2014
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Arizona Emergency Net - Maricopa
Monday August 18, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Joe,
over this weekend I will be operating W1AW/1 in Maine for a total of about 30 hours from Friday until Tuesday. I am hoping that I could get a sked list from any of the folks in the club who need Maine for the W1AW award. I will be 20m ssb 17m ssb 40m ssb and some wsjt65 on 20/17/40.

with the pileups that these stations have been generating, I figured I could help out the QC crowd snag Maine.

Jay

Several Maricopa and Pinal county hams snagged us on 17 and 20 meters
yesterday. I made a point to ask QTH locations when I saw Pinal county in
the logging software, even a few in San Tan Valley were confirmed.
About 840 voice qsos (17/20 meters) and about 100 jt65 qsos (17/20/40
meters) are confirmed in our log right now. (Steve KD1O and are are the
only two in Maine doing JT65 for W1AW/1).. I am teaching him how to use the
WSJT software this weekend as well as the finer principles of the
SIgnallink USB. When better then when 5 out of the 8 stations you can
print on the screen are calling YOU! hi hi!

Today we will be on 17/20 and 40, SSB and JT65. The goal is to break 1500
total qsos total qsos, with a total weekend goal (including Monday) of over
2000. I will send another email out when I start hearing W7s again, as well
as post on the DX clusters W1AW/1 with my call N1RWY to maximize the
chance for you all to work W1AW/1 when Steve or I are at the rig.

Btw, the FTdx 1200 rig from Yaesu is an amazing radio. Great DSP and
filters, internal tuner, two HF antenna ports, voice keying module and
keypad.. the rig hears amazing. *sigh, looks like I might have to
upgrade...

See you on the air...
Jay N1RWY

Hi folks,

This article was written for CQ magazine by my friend Gordon, W2TTT, back in New Jersey.

http://hsmm.wikispaces.com/file/view/HSMM-MESH+-+Networking+in+Em+Comm+Applications.pdf

It is also attached to this message.

Gordon has become quite a celeb in the area of ham mesh networks.

This article highlights use at the Fairlawn NJ fireworks event - an event that I worked a couple of times.

I hope to have Gordon join our Group soon and maybe arrange a web presentation for all of us.

Regards,

Joe, N2QOJ

East Valley Repeater Group
Monday September 8, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

Arizona Emergency Net - Maricopa
Monday September 8, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Joe Sammartino
Topic: 3133 Message: 3133

Folks,

The Ocotillo Repeater is experiencing less than optimal performance characteristics.

That geek speak means that the repeater is not working correctly. Until the issue is resolved, please use the QC repeater at 449.475 (-) and PL of 136.5 Hz.

An announcement will be made when all is well again with the repeater.

Regards,

Joe, N2QOJ

I believe this is what our friends from ARRL / ARES were alluding to during their presentation to the QC Com Group a while back:

1. Statewide Interoperability Exercise - Listening outside the bands
Posted by: "Mike Pulley" mike.j.pulley@... wb4zka
Date: Mon Oct 6, 2014 8:52 pm ((PDT))

Now that we can competently pass messages for served agencies, now let's listen in on their radio traffic.

The entire state is preparing for an "Interoperability Communication Drill" in November. The official role of Amateur
Radio is being figured out, but we can prepare and exercise.

WHAT DOES INTEROP MEAN FOR HAMS?

Our role is twofold --

1. Pass messages from one agency to another, when the agency requests, using Amateur frequencies.
2. Monitor non-Amateur frequencies to learn their protocols and stay abreast of developments.

HOW CAN I PREPARE TO MONITOR NON-AMATEUR FREQUENCIES?

Many of us have radios that can receive outside the Amateur bands. Let's put those to good use.

Here's where we look to our scanner enthusiast buddies. Ask them for the active frequencies in your area. But you can
find many by just Googling on the web.

Non-Amateur frequencies fall into several broad categories. The details are specific to your location.

* Aircraft, civilian; guard channel; airports; flight service stations; intercoms (AIRCIV)
* Aircraft, military; guard channel (AIRMIL)
* National Forest Service, Bureau of Land Management, National Park Service (FEDLAND)
* State and federal wildfire management, air tankers, spotter aircraft, hotshot crews (WILDFIRE)

* First responders - fire, rescue, ambulance (FIRSTRESP)
* Law enforcement - police, sheriff, DPS, FBI, others (LEO)
* Search and rescue (SAR)
* AZ Interagency Radio System (AIRS)
* Commercial, such as campground host radios (COMMER)
* Railroads (RAIL)
* Marine band (MARINE)
* Citizen's Band, class D (CB)
* Family Radio Service, General Mobile Radio Service (FRS/GMRS)
* Multi-Use Radio Service (MURS)
* Civil Air Patrol (CAP)
* Military Auxiliary Radio Service (MARS)

[ ] PREPARE: By October 31, find at least three (3) non-Amateur radio services you can monitor with equipment you already have. Work with your ARES DEC for help, if needed.
[ ] PREPARE: By October 31, monitor those services for local activity. Note which frequencies are active and what kind of traffic you hear.

[ ] INTEROP: Sign "Interop" after your call sign when you're on the air. (In my case, it would be "WB4ZKA, Interop".) That shows you're preparing to help knit agency communications together for the state-wide exercise.

Next, we'll put these two interop skills together.

3147. Radio Communication Trivia

Yahoo group: Queen_Creek_Hams
Date: 2014-10-10 14:45:58 UTC
From: Joe Sammartino
Topic: 3147 Message: 3147

Good day folks -

Here is some interesting trivia about radio communications that you are probably not aware of.

Enjoy,

Joe, N2QOJ

==========

What Peculiar Objects Were Launched Into Space During the 1960s to Facilitate Military Communication?

Prior to the advent of modern satellite communication networks, global communication were carried out either by lengthy undersea cables or by bouncing communications off the Earth's ionosphere. During the height of the Cold War, the US Military became increasingly concerned that Soviet agents would damage undersea cables, leaving them dependent on the less-than-predictable ionosphere as their primary mode of international communication.

In the 1960s, the US Military enlisted the help of researchers at MIT's Lincoln Laboratory to help craft an artificial ionosphere around the planet that could be used for consistent military communications–the project was known as Project West Ford.

To create the artificial ionosphere necessary for the project a series of rocket launches ferried 480 *million* tiny 1.78 cm copper needles into orbit. These needles were disbursed at an elevation of around 2,500 miles and functioned as tiny dipole antennas.

While such an ambitious project seems like it would be destined for failure, the copper-based artificial ionosphere actually worked. For several months the military was able to successfully bounce communication signals off the massive ring of copper needles. Eventually the needles began to spread out and the effectiveness of the system was compromised.

Despite the success the project was shelved after the initial launch and deployment for two primary reasons: advances in satellite technology was rapidly rendering the radio/ionosphere communication model obsolete and there was widespread protest in the scientific community over the potential impact of tampering with the atmosphere. These protests ultimately led to the Outer Space Treaty of 1967 which outlined, among other things, prohibitions against the militarization of space.

3148. RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

Yahoo group: Queen_Creek_Hams
Date: 2014-10-10 15:28:32 UTC
From: Joe Sammartino
Topic: 2818 Message: 3148

RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB
- and replicate this recipe several times over in the Valley at the same time

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio.

Where and When? (Queen Creek and Mesa)

October 11th, 2014, From 10 AM till 2 PM.

We have two local RUSS / RITP planned. Dennis, KF7RYX will host his event at the picnic pavilion at Remington Heights park near the intersection (just East) of South 198th Street and East Emperor Road. Here is a link to a map of the location:

http://tinyurl.com/KF7RYX-RITP <http://tinyurl.com/KF7RYX-RITP>

If you are looking for an event to visit closer to MESA, Doug, WB7TUJ, will host RUSS / RITP in Mesa at the same time.

Here is a link to a map of Doug's location - Emerald Park Lake, Mesa -

East Valley Repeater Group reminder
When: Monday, 13 October 2014 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3153. Arizona Emergency Net - Maricopa, Monday, 13 October 2014

Yahoo group: Queen_Creek_Hams
Date: 2014-10-13 15:01:07 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3153 Message: 3153
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 13 October 2014 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 19 October 2014 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Would you like your videos seen all over Arizona?

I'm thinking of starting a HAM Radio and/or Home Video night on HAM TV.

It would be best if there is no music but my XCVR does have an Audio Off Switch if necessary.

If you have any Home Videos that have a descriptive audio track that would be super.

I can use both VHS tapes and DVDs.

My address is good in qrz.com

Thanks

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Jon et al,

Thanks
for all the time you and your committee put into the Tri-Stake
Emergency Preparedness Fair yesterday. I was a great event. I look forward to next year.

Here is a
link to the aerial video I took at today's.

Cc:

Joe,

As I mentioned during previous breakfasts, we are doing the communications for the Cystic Fibrosis Foundation's Cycle for Life tomorrow. However, we had a volunteer cancel, so we need one more person to run an HT in one of their support vehicles. We will provide the radio, so if you know anyone that would be able to help, have them send me an email.

We will be meeting at 18501 N Thompson Peak Parkway, Scottsdale, AZ 85225 at 7AM tomorrow morning.

Thanks,
Zach Burnham

It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Joe Sammartino
Topic: 3182 Message: 3182

---------- Forwarded message ----------
From: Bruce Barnes <qcecgaz@...>
Date: Wed, Nov 12, 2014 at 2:27 PM
Subject: Queen Creek Holiday Festival and Parade
To:

Greetings Hams,

The annual Queen Creek Christmas parade is coming up on December 6. We have supported this event for the last few years and have been requested again.

This event is fun to attend and we're kept pretty busy on the radio for the entire event. You'll really feel like you contributed.

The event this year will be in the afternoon. We've been requested between noon and 7PM on that Saturday.

We'll need six operators. Please check your calendars and let me know if you can help out.

Thanks,
Bruce

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 16 November 2014 06:00 AM to 10:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

3186. A discussion of Baofeng pedigree or "Baofeng 101"

Yahoo group: Queen_Creek_Hams
Date: 2014-11-17 00:36:36 UTC
From: Joe Sammartino
Topic: 3186 Message: 3186
Attachments: 2 described; binary payloads are missing from this source WARC

My inspiration to generate useful (hopefully) reference material for my QCARC and QCECG friends comes from you.

I was recently asked by Ron, K7RWE, about the newer Baofeng GT-3 radio. Not having any personal experience, I did some research and decided to roll it into one reference document.

It is attached to this email and will be posted to the YAHOO Groups file section as well.

Any feedback is always welcome and appreciated. Negative feedback is also very useful to amplify my signal with increased stability. [?]

And I did include a link to GT-3 reviews as an example of where to get such reviews on most any piece of ham gear.

Regards,

Joe, N2QOJ

3190. Arizona Emergency Net - Maricopa, Monday, 17 November 2014

Yahoo group: Queen_Creek_Hams
Date: 2014-11-17 16:01:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3190 Message: 3190
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 17 November 2014 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3191. Today! RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

Yahoo group: Queen_Creek_Hams
Date: 2014-11-22 13:27:50 UTC
From: Joe Sammartino
Topic: 3191 Message: 3191

RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB
- and replicate this recipe several times over in the Valley at the same time

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio.

Where and When? (Queen Creek and Mesa)

November 22 , 2014, From 10 AM till 2 PM.

We have two local RUSS / RITP planned. Dennis, KF7RYX will host his event at the picnic pavilion at Remington Heights park near the intersection (just East) of South 198th Street and East Emperor Road.

If you are looking for an event to visit closer to MESA, Doug, WB7TUJ, will host RUSS / RITP in Mesa at the same time at Emerald Park.

Here is a link to a map of both locations:

http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP_Den%2Ca%2FRUSS_Doug&timerange=3600&tail=3600

3203. QCARC Field Day 2914 Results

Yahoo group: Queen_Creek_Hams
Date: 2014-12-08 05:12:37 UTC
From: Joe Sammartino
Topic: 3203 Message: 3203

Folks,

We participated as Class 2A under the club name of Queen Creek Amateur Radio Club and our contest call sign was the special event call sign of N7Q.

Of the total 2,686 entries, we ranked at number 963 by point score with a total score of 1922. That puts us at almost the 72 percentile of ALL entries! NOT TOO SHABBY!

Here is an interesting observation: Of the 392 small clubs operating as Class 2A (i.e. 2 contest stations using off-grid power), we ranked 195th by total score. We had a total of 452 confirmed contacts compared to only 249 last year.

My take away from this is that not only did we have a great time playing radio, contesting, and teaching -- but we also earned a very respectable score while having a ton of fun.

Thanks to all our operators - 13 of them compared to 8 last year.

In summary, we ranked higher overall, earned more points, ranked higher in our class, and provided a test session producing new hams! That is outstanding since we are still a young group.

Here are the 2013 and 2014 results for comparison:

2013 Field Day Results
Total Number of Entries - 2538
Number of Class 2A Stations - 399
QCARC Results as N2QOJ in Points - 1388
QCARC Contest Ranking - 1246
QCARC 2A Ranking - 274
QCARC Number of Contacts - 249
Made Number of Ops - 8

2014 Field Day Results
Total Number of Entries - *2686*
Number of Class 2A Stations - *392*
QCARC Results as N2QOJ in Points - *1922*
QCARC Contest Ranking - *963*
QCARC 2A Ranking - *195*
QCARC Number of Contacts - *452*
Made Number of Ops - *13*

Thank you go all of our volunteer operators, KF7RYX for supplying most of the antennas, power, and GO-BOX GOTA station, KF7E for his radio equipment support.

Here's an excerpt from the FD 2014 highlights email sent after the event:

Highlights:

- Over 400 Contacts were made throughout world. About 300 of them were in phone mode and the remainder (that's almost 100) were made in CW exclusively by Jim, KF7E. All radio station equipment was provided by Dennis - KF7RYX, Jim - KF7E, and Joe - N2QOJ. Dennis also provided most of the antenna systems, the emergency power generator (and gas), antenna masting, and just about all the glue that held the event together.

- Two Field Day Stations and one GOTA (Get-On-The-Air) station were in operation continuously. (BTW, Icom (IC-735), Kenwood (TS-570), and Yaesu (FT-897, FT-350) were all represented. Our special event 1X1 call sign of "N7Q" was a hit. We will look to use this call again for "Radios on the Rim" and more.

- All contacts were logged via laptop. The Field Day wireless network was installed and maintained by Rick, KF7MCA. This network allowed networked laptops to log to a central file system. The software we use is N3FJP's ARRL Field Day Contest Log Version 4.2.

- A lot of the event was streamed live via USTREAM. Some of the archived video can be found at: http://www.ustream.tv/channel/arizona-joe <http://www.ustream.tv/channel/arizona-joe>

- Brad, N7LZD, provided a fully functional Direct TV system for use during the event. Sunday breakfast was also sponsored by Brad - thank you!

- Janet, KF7SLQ, stopped by to log, operate, and also provided a very tasty pasta dinner for the crew on Saturday evening.

- Janell, KF7WWJ, provided a brief - but complete - presentation of the phonetics to be used during Field Day operations. Thanks to Janell's OM, Jim, KC7QPI, for his temporary repair of our front door.

- Our QCECG member Brad, KF5AZH, stopped for a visit after rock climbing certification and made (sponsored too!) a pizza run for us Saturday afternoon - thank you!

- Cole, KD7YHT, provided excellent setup support especially with his 48 foot boom bucket truck and expertise.

- Bruce, KF6EZT, and Karen, KF6ODI visited with (7) grand-kids, and (2) daughters (didn't see any pets). His visit allows us to claim some additional points for our FD application since Bruce is the director of our Queen Creek Emergency Communications Group and Town liaison.

- Turn out for setup and operation was exceptional - Thank you! Visitors included new hams, old hams, non-hams, friends, family and several hams that were looking to join in the Field Day fun close to home and found us on the ARRL Field Day Locator page.

- John, W1AI, and Kristina, KT1NA, owners of Ham Test Online <http://www.hamradiolicenseexam.com/> , not only visited and operated our stations, but also brought some nice giveaways - pens and bumper stickers - perfect for our public service event. Visit their site for online training information: http://www.hamradiolicenseexam.com/ <http://www.hamradiolicenseexam.com/> .

- Fred, AB7JF, of the East Valley VE TEAM, once again generously provided his time and service to provide a testing session for technician licensing. We had eight (8) passes. Congratulations to these new hams.

- The announcement for our FD was carried by several news organizations including a nice article by Independent News Media: http://arizona.newszap.com/eastvalley/133074-114/queen-creek-radio-hams-to-host-overnight-field-day <http://arizona.newszap.com/eastvalley/133074-114/queen-creek-radio-hams-to-host-overnight-field-day>

- And in between all these activities, Dennis, KF7RYX, had time to demonstrate some handheld radio functions and also check out a radio or two for some folks.

- The Youth Center facility provided by the Town of Queen Creek was a great place to host our event. We thank Joe LaFortune, Emergency Manager for the Town of Queen Creek, for his fantastic and continued support of our local ham community and sponsorship of the Queen Creek Emergency Communications Group.

*We had folks taking photos and videos and will make them available at our Youtube <https://www.youtube.com/user/QueenCreekARC> channel and Facebook <https://www.facebook.com/pages/Queen-Creek-Amateur-Radio-Club/190785887681041> page.
At some point, I'll post a list of all the folks who participated with setup, logging, operating, take-down, and more. But, in the meantime, Dennis and I thank each of you very much. You all made this a great success for our local community and the greater ham community. As we say in ham radio - fine business.*

Regards,

Joe, N2QOJ

3204. Arizona Emergency Net - Maricopa, Monday, 08 December 2014

Yahoo group: Queen_Creek_Hams
Date: 2014-12-08 16:01:11 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3204 Message: 3204
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 08 December 2014 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Folks,

Good news! Assuming cloud cover is minimal, you can spot the station tonight for 4 minutes:

Time: Tue Dec 09 at 5:50 PM
Visible: 4 min
Max Height: 82 degrees
Appears: SW (from 225 degrees)
Disappears: NE (from 45 degrees

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe

Hi Joe and the group,

John, W1AI and had a great time operating and logging and hanging out with everyone. Very well done, nice to have an inside venue away from the Arizona Orb :)

Thanks for the great report, Joe!

73,
Christina, KT1NA

East Valley Repeater Group reminder
When: Monday, 15 December 2014 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3217. The Ocotillo Repeater

Yahoo group: Queen_Creek_Hams
Date: 2014-12-21 01:18:56 UTC
From: Dave Gorevin
Topic: 3217 Message: 3217

Unfortunately it has become necessary to temporarily disable the Ocotillo repeater. We replaced the power supply on Friday afternoon, and it appears to be causing the repeater transmitter to transmit a few spurious signals that could be heard in multiple places across the 440 band. I don’t have a time frame for a trip to the site, and the timing couldn’t have been more inconvenient with Christmas this week.

(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3223. Arizona Emergency Net - Maricopa, Monday, 22 December 2014

Yahoo group: Queen_Creek_Hams
Date: 2014-12-22 16:02:22 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3223 Message: 3223
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 22 December 2014 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3241. Saturday ! ! ! - RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

Yahoo group: Queen_Creek_Hams
Date: 2015-01-10 04:24:02 UTC
From: Joe Sammartino
Topic: 3241 Message: 3241

RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB (7.158 Mhz also)
- and replicate this recipe several times over in the Valley at the same time

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio while exercising emergency communications via simplex and off-grid.

Where and When? (Queen Creek and Mesa)

January 10, From 10 AM till 2 PM.

We have two local RUSS / RITP planned. Dennis, KF7RYX, will host his event at the ball field pavilion behind the Queen Creek West Stake Center (19730 East Ocotillo Road) located near the intersection (just West) of Hawes Road and Ocotillo Road.

If you are looking for an event to visit closer to Mesa, Doug, WB7TUJ, will host RUSS / RITP in Mesa at Emerald Park.

If you can't visit the sites, please check in via the frequencies listed above.

Here is a link to a map of both locations:

East Valley Repeater Group reminder
When: Monday, 12 January 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

3245. Arizona Emergency Net - Maricopa, Monday, 12 January 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-01-12 16:01:07 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3245 Message: 3245
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 12 January 2015 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 18 January 2015 06:00 AM to 10:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

3257. RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP

Yahoo group: Queen_Creek_Hams
Date: 2015-01-29 17:01:11 UTC
From: Joe Sammartino
Topic: 3257 Message: 3257

RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB (7.158 Mhz also)
- and replicate this recipe several times over in the Valley at the same time

What is the objective?

- Engage in as many contacts as possible across the Valley using a VHF simplex frequency of 146.460 Mhz. while operating off grid power, If possible.

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio while exercising emergency communications via simplex and off-grid.

Where and When? (Queen Creek and Mesa)

February 14th, From 10 AM (10:00) till 2 PM (14:00).

We have two local RUSS / RITP planned. Dennis, KF7RYX, will host his event at the ball field pavilion behind the Queen Creek West Stake Center (19730 East Ocotillo Road) located near the intersection (just West) of Hawes Road

and Ocotillo Road.

If you are looking for an event to visit closer to Mesa, Doug, WB7TUJ, will host RUSS / RITP in Mesa at Emerald Park.

If you can't visit the sites, please check in via the frequencies listed above.

Here is a link to a map of both locations:

http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600

Check out the website links below for more information about local ham radio activity in the Queen Creek and San Tan Valley area.

East Valley Repeater Group reminder
When: Monday, 02 February 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3260. Arizona Emergency Net - Maricopa, Monday, 02 February 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-02-02 16:01:18 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3260 Message: 3260
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 02 February 2015 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3270. Volunteer for the Ragnar Overnight Relay Race

Yahoo group: Queen_Creek_Hams
Date: 2015-02-16 05:07:00 UTC
From: Joe Sammartino
Topic: 3270 Message: 3270

Volunteers are still needed to provide communications support. If you are interested, please contact Joe Bakas asap. Joe is from Gilbert CERT and is the Team Echo leader.

The goal is to have a team of two at each station so a new volunteer will not be alone trying to run a station for the first time. Put your communications skills to good use and volunteer if you can.

The first Team Echo stations will report just after midnight Friday night and the latest stations will report about 0400 Saturday morning. Shifts will be about 8 or 10 hours depending on the location and the delay in waiting for the last runners.

Here is Joe Bakas's contact email address: fireboss@...

Regards,

Joe, N2QOJ

3274. RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP, March 21 @ 10AM

Yahoo group: Queen_Creek_Hams
Date: 2015-02-23 04:17:32 UTC
From: Joe Sammartino
Topic: 3274 Message: 3274

RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB (7.158 Mhz also)
- and replicate this recipe several times over in the Valley at the same time

What is the objective?

- Engage in as many contacts as possible across the Valley using a VHF simplex frequency of 146.460 Mhz. while operating off grid power, If possible.

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio while exercising emergency communications via simplex and off-grid.

**Where and When? (Queen Creek and Mesa)*March 21st, From 10 AM (10:00) till 2 PM (14:00).*

We have two local RUSS / RITP planned. Dennis, KF7RYX, will host his event at the ball field pavilion behind the Queen Creek West Stake Center (19730 East Ocotillo Road) located near the intersection (just West) of Hawes Road and Ocotillo Road.

BONUS: VE Testing will be provided from 11 AM (10:00) till 1 PM (13:00)

If you are looking for an event to visit closer to Mesa, Doug, WB7TUJ, will host RUSS / RITP in Mesa at Emerald Park.

If you can't visit the sites, please check in via the frequencies listed above.

Here is a link to a map of both locations:

http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600

Check out the website links below for more information about local ham radio activity in the Queen Creek and San Tan Valley area.

(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3280. QC Portable Repeater

Yahoo group: Queen_Creek_Hams
Date: 2015-03-09 00:23:46 UTC
From: Joe Sammartino
Topic: 1860 Message: 3280

Folks,

The Queen Creek Portable Repeater is up and running for the next few days.

We put this repeater online sometimes to verify its operation.

Give it a try:

448.225 Mhz
Negative shift (-5 Mhz)
PL = 136.5 Hz

Regards,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 15 March 2015 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 16 March 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Sorry for the late reply, it's a goof up with YAHOO.

An incorrect meeting event exists somewhere in the Group but have not been able to find it since YAHOO changed the Group structure.

Hi. Fred this little amp is really great it will be going to Alabama on a mission with me for sure.
thanks again I will learn how to do echo link to keep in touch if I don't pass the general test and I havent dad much time to study for it this week. We will be giving our farewell talks this Sunday at 2:00 in the Sossaman and Germann building.
Plus per MTC study assignments and looking for a better car and close it is getting to be a lot to do in a short time.
Thanks again KC7QPI Jim

3295. Radio in the Park / Radio Under Sun Shade, Saturday - March 21

Yahoo group: Queen_Creek_Hams
Date: 2015-03-19 17:23:43 UTC
From: Joe Sammartino
Topic: 3295 Message: 3295

RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB (7.158 Mhz also)
- and replicate this recipe several times over in the Valley at the same time

What is the objective?

- Engage in as many contacts as possible across the Valley using a VHF simplex frequency of 146.460 Mhz. while operating off grid power, If possible.

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio while exercising emergency communications via simplex and off-grid.

**Where and When? (Queen Creek and Mesa)*March 21st, From 10 AM (10:00) till 2 PM (14:00).*

We have two local RUSS / RITP planned. Dennis, KF7RYX, will host his event at the ball field pavilion behind the Queen Creek West Stake Center (19730 East Ocotillo Road) located near the intersection (just West) of Hawes Road and Ocotillo Road.

BONUS: VE Testing will be provided from 11 AM till 1 PM

If you are looking for an event to visit closer to Mesa, Doug, WB7TUJ, will host RUSS / RITP in Mesa at Emerald Park.

If you can't visit the sites, please check in via the frequencies listed above.

Here is a link to a map of both locations:

http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600

Check out the website links below for more information about local ham radio activity in the Queen Creek and San Tan Valley area.

Regards,

Joe Sammartino

East Valley Repeater Group reminder
When: Monday, 23 March 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

I will get my work done up north Tuesday and maybe Wednesday, and be looking at going on Thursday to HRO and or Fry to get some radio connecters. I Am going to miss Radio Shack. I will call you, it would be nice to have you come along.
If I get everything done and just do a turn around on Tuesday it might be Wednesday.

3301. Arizona Emergency Net - Maricopa, Monday, 23 March 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-03-23 15:24:56 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3301 Message: 3301
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 23 March 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3311. ANSR Balloon Launches this Weekend 11 March 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-04-10 18:11:04 UTC
From: aa7oo.az@...
Topic: 3311 Message: 3311

I don't normally follow ANSR. This notice came via email relay. Some of you may already be aware but have not seen anything on this group and know some of you are involved with APRS and Mesh.

Several Balloon launching are taking place this weekend in a global competition.

The ANSR launches are close to home, Arizona.

You can track balloons using APRS and watch live flight video over HAM MESH frequency 2.4Ghz, They will be testing the UofTcube sat.

Link to check quickly for more details.
https://groups.yahoo.com/neo/groups/Ballooning/info
https://groups.yahoo.com/neo/groups/Ballooning/info

The launch from Maricopa will be for altitude record. Check out the Google Earth links from above site to see flight path information and scheduled times of all launches.

Norm, aa7oo

East Valley Repeater Group reminder
When: Monday, 13 April 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3315. Arizona Emergency Net - Maricopa, Monday, 13 April 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-04-13 15:03:00 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3315 Message: 3315
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 13 April 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

Subject: Items for sale

Hello

My name is Ryan Cunningham (KG7COB) I am currently an in-active member of the group. I have fallen upon some hard time financially with medical bills for my expecting spouse, a loss of job on my part and a limited income on hers with the help of short-term disability that will be expiring soon. Because of my financial hardship I am selling a few items that might have the interest for a few of you within this group.

ASTRON RS-20A Power Supply $60.00

Communications GO_GOX with YEASU FT-800 $500.00

Custom Modified COBRA 148GTL CB Radio $40.00

Thank you

Ryan Cunningham

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 19 April 2015 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 17 May 2015 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

3344. Rick's Mobile Shack 2.0

Yahoo group: Queen_Creek_Hams
Date: 2015-05-26 05:47:58 UTC
From: KF7MCA
Topic: 3344 Message: 3344

The minivan I mounted my Kenwood TS-2000 and Tarheel screwdriver antenna in is now my daughter’s vehicle (the 4 wheeled rolling Honda generator as Joe calls it:). I’m now driving a Prius and need to rethink my ‘go box on wheels’ strategy.

The current plan is to make a go box for my TS-2000, use it in the house as a base station, but then wire up the Prius so I can easily drop in the go box in the trunk of the Prius so I can do some DX when I want. This means the Tarheel needs to be mounted somehow (I have some ideas). Included in this master plan is hopefully a new digital Yaesu TFM-400 properly mounted in the Prius, a mobile power solution for the TS-2000 and maybe some solar panels for off grid operation.

I’ll use this subject line to document and discuss my journey for those who are interested in listening, providing guidance or laughing at my insanity! :)

My next installment will be about setting up a charging system for my gel battery.

Rick,
kf7mca

The following is a link to a fully functional demo board from Linear Tech. 2 inputs. One solar with MPPT and one standard DC such as power outlet from car. Solar is priority, DC backup. It can charge a battery and part a load at the same time. Default config is approx 175 watt output.

Little pricey by might be able to get you a break, I deal with the factory Rep. And really considering power output and it is ready to go price isn't to bad. This was developed for military and backup comm.

W7ATN, Mesa AZ is operating in beacon mode. It is transmitting an NTSC video ID on 1289.25 MHz 24/7.

It is putting out about 15 watts of black and white video with no audio.

Point your antenna toward McDowell and Hawes Rds.

Contact rod@sbatv.org or call 805-722-8804 with reception reports.

Folks,

Good news! Assuming cloud cover is minimal, you can spot the station tonight for 6 minutes:

Time: Sun May 31 8:27 PM
Visible: 6 min
Max Height: 47 degrees
Appears: SSW (from 203 degrees)
Disappears: ENE (from 68 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe

East Valley Repeater Group reminder
When: Monday, 01 June 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3354. Arizona Emergency Net - Maricopa, Monday, 01 June 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-06-01 14:55:26 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3354 Message: 3354
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 01 June 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3365. Queen Creek Field Day 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-06-10 17:11:56 UTC
From: Joe Sammartino
Topic: 3365 Message: 3365

Folks,

Here is some early information regarding Field Day 2015
<http://www.arrl.org/field-day>.

The Queen Creek Amateur Radio Club and Queen Creek Emergency Communications
Group are holding their annual ARRL Field Day right in Queen Creek this
year.

When: June 27 - June 28, 2015

Where: Boys and Girls Club Center, Founders' Park

Address: 22411 S. Ellsworth Road, Queen Creek, AZ, 85142
<https://www.google.com/maps/place/22411+S+Ellsworth+Rd,+Queen+Creek,+AZ+85142/@33.2435837
,-111.6337742,19z/data=!4m2!3m1!1s0x872a4d171f1a9583:0xe8abd4dda68cfad6?hl=en>

Contact: Joe Sammartino, N2QOJ, jsammartino@..., 480.389.1426

or Dennis Lawrence, KF7RYX, kf7ryx@...

Field Day Event Details: (May change a bit)

Air Conditioned Community Center !

(2) Stations - 80M-10M, maybe more (digital, CW) *with Band filtering for
no interference between stations!*

(1) GOTA "Get On The Air" Station - 40 M, 2M, 70 cm

N3FJP Field Day Logging Software

100% Off Grid Stations, Generator and Solar/Battery

*VE Testing by East Valley VE Team - New and upgrade testing beginning at
Noon!*

Saturday 11 AM Start Time

- Saturday 7:00 AM - Equipment staging, Laptop setups, Logging software prep

Sunday 2 PM Stop Time

- Sunday 2 PM - Breakdown

This event will be streamed on the Internet live!
<http://www.ustream.tv/channel/arizona-joe>

Come help us setup, operate, breakdown, meet local hams, get on the air on
the HF bands! Bring family and friends. We'll be happy to provide

demonstrations. Groups are welcome, just let us know in advance.

Additional information will be available soon including a public press release.

Regards,

Joe

3368. Queen Creek Ham Radio Field Day 2015, June 27-28

Yahoo group: Queen_Creek_Hams
Date: 2015-06-11 16:04:30 UTC
From: Joe Sammartino
Topic: 3368 Message: 3368
Attachments: 2 described; binary payloads are missing from this source WARC

Folks,

Our *fourth* annual Field Day is coming up later this month at Founders' Park. The Town of Queen Creek is letting us use the Boys & Girls Center Building <https://www.google.com/maps/@33.2435901,-111.6336991,111m/data=!3m1!1e3?hl=en> which is *air conditioned and very comfortable. *We have purposely planned this year's Field Day to be local and within our community. This will allow you to better plan to participate, visit, etc. without the need to travel outside the area.

Please visit this link for more details: www.queencreekarc.org A News Release and information flyer describing this great event are attached to this announcement and also available to download from the link. Feel free to share this information with anyone interested.

We will once again have VE Testing available. This service will be provided by the East Valley VE Team, led by Fred, AB7JF, and assisted by our own local ham VEs.

Any local hams (non-hams can help too!) interested in assisting with setup, operating, and/or breakdown should contact Joe, N2QOJ or Dennis, KF7RYX. We need lots of participation to make this a successful event. All local area hams are invited to participate. We start setup on Saturday morning at about 7 AM, begin the Field Day formerly at 11 AM, conclude on Sunday at 2 PM, then breakdown the site. So, there is plenty of opportunity to come down and lend a hand, operate, bring visitors and family, etc. We will have two or three operating stations and a third station dedicated to "GOTA", that's "Get on the Air" for new hams and non-hams. This is your chance to operate HF across the US and Canada even if your license class is Technician. And if you do not want to operate a station, you can assist by logging the contacts. If you would like to *formerly participate*, please contact Joe by email or phone to schedule and let him know your specific interests: jsammartino@..., 480.270.4563.

If you plan on just visiting, please respond to Joe and Dennis directly (contact information below) to let us know about what time you can arrive and for how long. Also mention if you may be willing to operate, help with setup, help with take-down, or whatever combination you can provide assistance.

If you have a group such as a Boy Scout troop, prepper group, church group, etc. that would like to visit and receive demonstrations, please let us know in advance so we can be prepared. A copy of our flyer and press release is attached to this email. Feel free to distribute as necessary.

KF7RYX will be providing emergency power sources and loaning his state-of-the-art "Go-Box", designed for emergency communications and remote station communications, for the entire event. We will also have traditional ham gear for the other stations provided by Joe, N2QOJ, and Jim, KF7E. Jim is also providing HF band filters for each station to eliminate station interference.

*Important: * If you are a new ham, please don't pass up this opportunity to visit and get presentations and demonstrations, including hands on operation. Its the one event that covers most important aspects of our hobby - transceivers, antennas, alternate power sources, field setup and operating procedures. Bring your new handie-talkie and we will give you hints and tips on operation and programming. One-stop shopping. Our prime objective is to give our visitors and participants the opportunity to learn real ham radio techniques and skills.

Regards,

Joe, N2QOJ

East Valley Repeater Group reminder
When: Monday, 15 June 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3374. Arizona Emergency Net - Maricopa, Monday, 15 June 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-06-15 15:13:30 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3374 Message: 3374
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 15 June 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3376. Boy Scouts Electronic Swap Meet and Recycling, Sunday, 21 June 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-06-18 12:05:31 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3376 Message: 3376
Attachments: 1 described; binary payloads are missing from this source WARC

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 21 June 2015 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Folks,

Good news! Assuming cloud cover is minimal, you can spot the station tonight for 4 minutes:

Time: Sat Jun 20 8:28 PM
Visible: 4 min
Max Height: 61 degrees
Appears: NNW (from 337 degrees)
Disappears: ESE (from 113 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe

Use IPad app Skyview to follow the track of the ISS and other stuff in the sky.
It's a free app, the pay version shows more stuff.

This will be even more stunning as it will pass close by to the 'north' of the conjunction of Venus, Jupiter, and the moon.

Arizona Emergency Net - Maricopa reminder
When: Monday, 22 June 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3389. Another opportunity to spot the International Space Station tonight for 4 minutes

Yahoo group: Queen_Creek_Hams
Date: 2015-06-22 16:13:26 UTC
From: Joe Sammartino
Topic: 3389 Message: 3389
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

Good news! Another opportunity to spot the station tonight for 4 minutes:

Time: Mon Jun 22 8:18 PM
Visible: 4 min
Max Height: 43 degrees
Appears: W (from 270 degrees)
Disappears: SSE (toward 168 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

3393. Queen Creek Field Day Update, this upcoming weekend

Yahoo group: Queen_Creek_Hams
Date: 2015-06-24 19:43:41 UTC
From: Joe Sammartino
Topic: 3393 Message: 3393

For those kind souls interested in Field Day participation (or just visiting), here is some basic information:

1. We will start setup at the Boys & Girls club area on Saturday morning at about 7-7:30 AM. We must set up radio stations, logging computers, erect antennas, and off-grid power for stations to be ready for our 11 AM start time.

2. You don't need to bring any equipment, chairs, etc. We are providing all the stations and the facility has many chairs, tables, and a lounge area.

3. VE testing begins at Noon. Let people know we are testing!!!!

4. Any ham ticket holder can operate the Field Day stations. We will operate on Extra Class privileges of N2QOJ and our Special Event Call Sign is N7Q. ANYONE without a license can operate the "Get-On-The-Air" (GOTA) Station with our control operator. Any new ham - Technician or otherwise - licensed within the last year, can operate the GOTA station.

5. We will have experienced Field Day operators and not-so-experienced folks. This will be a perfect "Elmer" (that's mentoring) opportunity for new hams.

6. This is a continuous event from Saturday through Sunday at 2 PM. We break down around 1 to 2 PM and should be done by 3 to 4 PM. You can come at anytime of the day or night to observe, operate, etc. The facility will be manned continuously so if you can only come at 3 AM, then come!

7. Bring a snack for yourself just in case. We should have water. Our Food plans are not yet firmed up. We'll send another update on this topic.

8. Do let Joe and Dennis know if you can operate - email is fine - jsammartino@... and kf7ryx@....

9. Everyone is welcome for visiting and learning about ham radio - kids, grandparents, out-of-town family, aliens (legal, illegal, and extra-terrestrial), preppers, emergency preparedness officials - whatever! *And remember, the facility is air conditioned!*

10. Talk-in will be on the Queen Creek Repeater - 449.475 PL 136.5 Hz. Use this repeater for assistance when you're in the local area. Use the Ocotillo Repeater - 449.325 (100 Hz) - if you are anywhere in the East Valley and need assistance. If you don't have a radio and/or license, just call 480.270.4563 to get help by phone (there's no shame in using the public phone system).

If you have any questions, please ask now.

Thanks,

Joe, N2QOJ

3406. New(er) Hams and HF in Queen Creek

Yahoo group: Queen_Creek_Hams
Date: 2015-07-13 16:10:49 UTC
From: ambroinaz@...
Topic: 3406 Message: 3406

Hello QC Hams,

I have been having a few 2m/440 QSOs and doing a lot of Google'ing about getting my feet wet in HF. I have gotten some great advice from local Hams as well have been able to learn allot about HF gear, antennas, etc.

I've also watched alot of Youtube and am still not even sure I am going to like HF :)

But, even though I have been on the fence about it, I decided to pull the trigger and I bought some gear (currently in the mail on its way to me) to get me going on the air on HF.

So... with all this great research and conversation I am pretty confident I can get things wired up and can get to listening on my own without burning down my house or blowing up my gear in the monsoons.

But, what I think would be great is a "clinic" of sorts introducing newer QC Hams to the world of HF. Not to cover the basics that can (and should be done via internet research, etc) but more hands on tips and tricks and even a first time HF GOTA opportunity.

I realize that the Radios in the Park and RUSS events and field day are a natural opportunity for this, but was wondering if any QC elmers have thought about this? - and if they have - what are those thoughts?

Congrats on a good step up.

I did not see a name or callsign on this, but i will be pleased to talk to you about HF setup, standards, and fun.

YouTube content varies widely, and you can't ask the teacher questions.. :-)

Jim, KF7E

Andy,
HF provides a lot of options contesting, rag chews, nets, chasing DX, portable operations, SOTA, mobile, emergency prep, and digital "never-pick-up-a-mic-and-type" style communications. All a matter of what you are into. Antennas can be as cheap and as expensive as the budget allows.

What are you interested in?

Always use your callsign, unless your call is in your email, we don't know who you are.

Jim-KF7E is a good teacher. Know a lot about propagation, antennas, rigs, operating, etc.

Congrats on getting HF. You will have fun with it. Many a new ham has asked what they should spend their $ on....spend it on antenna systems. The best receiver in the world is pointless with a less than stellar antenna. Same with buying an amp. Amp is a waste if the antenna is acting like a dummy load.

Good luck.

Jay - I guess I am just not sure yet what I am interested in. But I was interested enough to spend a chunk of money to get going :). I suppose time will tell. Its hard for me to rule something out as not being interested, but quick dx chasing is probably not high on my list at this point since I do like to have conversation rather than just quick contacts. I decided to start simple with a 20m dipole since I have room for that antenna setup. I will give it a whirl on this band and will look to venture out afterwards.

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 19 July 2015 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Greetings Fellow Hams

The next Radios on the Rim is only a couple weeks away.

Dates: August 13-16 (come for any part or all)

Place: Carr Lake Campground (Mogollion Rim)

Map Link: http://tinyurl.com/QCFieldDay2013

Talk in Frequency: On the way to Payson use 146.920 (-) Pl 162.2 (Mt. Ord)

Close to camp you can go simplex on
146.500

Directions: From wherever you are go to Payson. Turn right on 260 East and go about 35 miles to the top of the Rim and turn left at Woods Canyon Lake. Take the Rim Road for about 3-4 miles to the Carr Lake Campground. Turn left and keep to the left. Follow the road around until you find the campsite with all the antennas.

I plan to be there early afternoon on Thursday and try to reserve a couple of camp sites. Everyone is responsible for their own accommodations and food. There is usually plenty of room for Tents, Trailers and Motorhomes.

This is a great opportunity to learn a lot more about ham radio and off grid portable operations. If you do not have any portable radio equipment, that is fine, there will be plenty of radios to use. I always set up several stations and everyone is welcome to use them. Since we will be operating under a Special Event Call Sign, everyone will have Extra Class privileges on the radio.

If you have any questions, give me a call on the radio.

Dennis Lawrence

Folks,

Good news! Another opportunity to spot the station tonight for 5 minutes:

Time: Sun Aug 02 7:46 PM
Visible: 5 min
Max Height: 82 degrees
Appears: SW (from 223 degrees)
Disappears: NE (toward 45 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 16 August 2015 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

I don't think so, Bil --- You have to bring the items to them -- and you have to pay on some items.

Here is there info from their blog at www.electronicfest.com:
http://www.electronicfest.com:

Electronics Recycling Disposal Fee for TV CRT, Monitor CRT and Rear Projection TV systems is required. All other recycled items are accepted as a donation free of charge. Boy Scouts will be charging the customers that drop off. Payments are made in cash only. Credit cards and checks are not accepted at this time.
CRT Televisions, CRT Monitors, and DLP Televisions 25 inches or less – Cost of $30.00 / Each CRT Televisions, CRT Monitors, and DLP Televisions 26 inches or more – Cost of $40.00 / Each Wooden Rear Projection Televisions and Wooden Rear Projection Televisions – Cost of $100.00 / Each Erase your hard drive. You are responsible for erasing your computer's harddrive before donating it to us.
For more information on erasing your hard drive click here.
http://pcsupport.about.com/od/toolsofthetrade/tp/erase-hard-drive.htm
We accept most items with a plug. In many cases, the electronics received are beyond repair, or have outdated technology, and have reach their End-of-Life. Our recycling vendor offers businesses an environmentally acceptable process to address these electronics and prevent landfill disposal. Westech accepts large numbers of End of Life electronics for recycling, that are then de-manufactured. The result of this process is the production of raw commodities (circuit boards, aluminum, plastic, steel, and precious metals) which can be reused.

http://electronicfest.com/services-2/electronics2/ACCEPTED MATERIALS Computers, Parts and Accessories:

3444. New Source for RG8X Coax, adapters, and pigtail adapters

Yahoo group: Queen_Creek_Hams
Date: 2015-08-16 14:40:42 UTC
From: Joe Sammartino
Topic: 3444 Message: 3444

Hi Folks,

We have a new source for your coax and antenna connector adapters right here in the East Valley.

Our QCARC member and QCECG friend, David, KG7NCV, can now supply RG8X and adapters for the same great prices that Wiredco.com in Scottsdale offers.

David is located in Mesa and you can have your order mailed or you can arrange pick-up.

Just give David a call anytime at:

(602) 539-4929

Be sure to check out the Mesa R U Prepared meeting site as well at:

*http://www.meetup.com/Mesa-R-U-Prepared/
<http://www.meetup.com/Mesa-R-U-Prepared/>*

Regards,

Joe, N2QOJ

From: Tycallsky
Topic: 3447 Message: 3448

Looks like the time stamp is off again. It says 7-8 instead of 8-9.

3450. HAM TV Test from Hayden Peak - overlooking Kingman

Yahoo group: Queen_Creek_Hams
Date: 2015-08-17 08:10:19 UTC
From: wmunsil@...
Topic: 3450 Message: 3450

Three ATVers took on the "Road from Hell" up to Hayden Peak in the Hualapai Mountains overlooking Kingman.

The object was to see if HAM TV signals could be relayed between White Tanks and Snow Peak overlooking Palm Springs,

Tests were successful until the 100-plus watt signal on 2.4 GHz FMTV was sent through the 50 watt microwave dish's feed horn.

OOPS!

Attachments: 1 described; binary payloads are missing from this source WARC

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 4 minutes.
It won't be at a very great height above but you should be able to see it
well enough at 45 max degrees elevation.

Time: Thu Aug 20 7:58 PM
Visible: 4 min
Max Height: 45 degrees

Appears: NNW (from338 degrees)
Disappears: ESE (toward 113 degrees)

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

3452. Fwd: FW: Radios on the Rim

Yahoo group: Queen_Creek_Hams
Date: 2015-08-21 00:30:05 UTC
From: Joe Sammartino
Topic: 3452 Message: 3452

Greetings Fellow Hams

The next Radios on the Rim is coming soon…end of September.

Dates: September 24-26 (come for any part or all)

Place: Carr Lake Campground (Mogollion Rim)

Map Link: http://tinyurl.com/QCFieldDay2013

Talk in Frequency: On the way to Payson use 146.920 (-) Pl 162.2 (Mt. Ord)

Close to camp you can go simplex on
146.500

Directions: From wherever you are go to Payson. Turn right on 260 East and go about 35 miles to the top of the Rim and turn left at Woods Canyon Lake. Take the Rim Road for about 3-4 miles to the Carr Lake Campground. Turn left and keep to the left. Follow the road around until you find the campsite with all the antennas.

I plan to be there early afternoon on Thursday and try to reserve a couple of camp sites. Everyone is responsible for their own accommodations and food. There is usually plenty of room for Tents, Trailers and Motorhomes. There are no public toilets, so plan accordingly.

This is a great opportunity to learn a lot more about ham radio and off grid portable operations. If you do not have any portable radio equipment, that is fine, there will be plenty of radios to use. I always set up a station and everyone is welcome to use mine. Since we will be operating under a Special Event Call Sign, everyone will have Extra Class privileges on the radio.

PLEASE SHARE THIS INVITATION WITH ANYONE WHO MIGHT BE INTERESTED.

If you have any questions, give me a call on the radio.

Dennis Lawrence

No fees, no Tonto pass - This is in Sitgreaves National Forest....first come, first serve for the camp sites. There are about 40 campsites in the area that we go to.

It's dry camping...you bring in everything, you take everything away.

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 4 minutes.
There are some clouds but you should be able to view for most of the pass.

Time: Sat Aug 22 7:49 PM
Visible: 4 min
Max Height: 60 degrees
Appears: WNW (from 293 degrees)
Disappears: SSE (toward 158 degrees)

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

3463. HF vertical antenna with ground radials

Yahoo group: Queen_Creek_Hams
Date: 2015-09-01 03:36:25 UTC
From: ambroinaz@...
Topic: 3463 Message: 3463

QC Hams,

I am hoping to get your opinion if you have one, on an HF vertical antenna with ground radials.

Here is the background:
I have settled on getting a fold down HF vertical antenna to cover 10/15/17/20/40m bands. The reason for this antenna selection is my limited space, my HOA restrictions, and the ability to raise it and lower it as needed easily. Plus I do have room to run a bunch of ground radials which should help its performance.

This past weekend I cemented in the 2" galvanized pipe at the antenna base location and installed an 8' ground rod next to the base of the antenna. So, basically the hard work is done. I've got a few blisters on my hands to prove it :)

Here is the question:

I am leaning toward the zero-five 27' HOA antenna linked below. It has great reviews on eham.com and it seems to fit my requirements well. Plus I talked with Tom over at zero-five and he has provided great pre-sales support.

However, there are several antennas similar to this one in the similar price range. So, before I pull the trigger on this one... does anyone have an opinion one way or the other on choosing between vendors on this type of antenna?

Thanks!

Andy
KG7KWG

27 FOOT HOA 10-40 METER NO RADIAL FOLDOVER MULTIBAND VERTICAL ANTENNA 5KW UNUN | ZEROFIVE-ANTENNAS http://www.zerofive-antennas.com/27-foot-hoa-10-40-meter-no-radial-foldover-multiband-vertical-antenna-5kw-unun

27 FOOT HOA 10-40 METER NO RADIAL FOLDOVER MULTIBAND VERTICAL ANTENNA... http://www.zerofive-antennas.com/27-foot-hoa-10-40-meter-no-radial-foldover-multiband-vertical-antenna-5kw-unun The 27 foot 10-40 meter Multi-Band Vertical antenna is a freestanding vertical element. This vertical antenna has no lossy traps or coils to burn out.

Andy,
I am always cautious with a vertical that advertises no radials needed... But 100' of coax recommended.. Which means to me radiation on the coax. I have run the Hustler vertical 5-BTV, which had a very small foot print, but I added a ton of verticals for each band which helped a great deal with the setup.
http://www.gigaparts.com/Product-Lines/HF-Vertical-Antennas/Hustler-5-BTV.html?gclid=CKT_hPv01McCFYdrfgodSZsCdw

Right now I running the Hygain av-640 (6- 40 meters)
http://www.hy-gain.com/Product.php?productid=AV-640

Having bought it used from a ham out on Thunderbird drive a few years ago.
It does not require any ground mounted verticals as it does have "some" on the antenna.
Works great for DX. Easy to setup tune and install.

3465. Re: [Queen_Creek_Hams] HF vertical antenna with ground radials

Yahoo group: Queen_Creek_Hams
Date: 2015-09-01 03:53:08 UTC
From: Jim KF7E
Topic: 3463 Message: 3465

There is nothing magic about 27 ft, 43 ft, or any of the popular
non-resonant length verticals. The secrets to performance are a GOOD
balun and coax, and good ground system..

I have one of the Zero-Five antennas (custom made heavy duty) and
I think the workmanship is tops. I also got a good balun from Balun
Designs. Contact me directly if you want the nitty-gritty.

I had first purchased a DX Engineering 43' model. It was clearly a
notch below the Zero -Five, but also less bucks.

But the same caveats apply to any brand vertical. You need to
minimize losses in the feed (balun) and in the ground system.

BTW, you can use either resonant radials, or a non-resonant
'counterpoise' system and get good results, but you have
to put some thought and work into it.

4 simple radials, as frequently seen in some advertising, is a poor
(lossy) solution.

A good radial system will pay off in the long run.

BTW, do not overlook safety. A good DC (earth) ground is mandatory
for lightning protection, especially where your coax enters the building.

Thanks Jay. I'll take a look at the Hustler 5-BTV as well. Ya, when speaking with zero-five, Tom stated that yes you can use their HOA 27 footer without radials, but that it will perform much better with a radial plate and a bunch of ground radials. Although, now I have a little concern about the 100' and radiation on the coax. Is that very abnormal in your experience? Andy KG7KWG

Jay is right.

Many of these antennas come with a suggestion of use with 100-150
ft of coax and a 4:1 balun. This is basically mirrors and smoke.

The long coax hides the losses and makes for the appearance of a
good antenna.

Bur it does not make the antenna radiate effectively.

A simplistic comparison would be a 50-Ohm 'dummy load'. It matches
well to the coax and transmitter, but really does not radiate well as an
antenna.

By using a long run of coax, a poor balun, and no (or few) radials,
the transmitter and antenna tuner may see a low VSWR, but that has
nothing to do with getting the most RF out into the ionosphere, where
you want it.

Other techniques can be used to match the antenna, and to reduce
losses.

Not magic... :-)

You can get the Zero-Five and we can help you make it work.

Jim

I also use a Hustler 5 BVT. My metal pool fence is my
grounding/non-resonant radial system. That means rf can ride the coax.

So, I have 10 turns of coax (6 inch diameter) at about 8 feet from the
antenna feed point and another 10 turns from the radio feed point.

Works well...I have worked dx from Apache Junction, Camp Verde, and other
exotic locales..... :-).

When I had that antenna back in Maine, I found that a lobster buoy was the perfect size for the 6" turns.. Hence the "buoy balun" was created and lived at the base of mine.

3473. HF vertical antenna - follow up question on QC permit/use

Yahoo group: Queen_Creek_Hams
Date: 2015-09-02 20:16:14 UTC
From: ambroinaz@...
Topic: 3473 Message: 3473

QC Hams,

This is a follow up to my previous post about the HF vertical...

I was checking the Town of QC website, etc, for rules and regs on permitted use of the vertical... My goal is to understand what the town says, and be in compliance with the town, before I deal with getting hassled by my HOA.

Near as I can tell from the below statement in the Article 6 Zoning Ordinance (linked below as well), is that as long as the antenna doesn't exceed the maximum building height for my zone (which I believe is 35'), then I shouldn't have an issue with the town.

Two questions:
1.) Am I interpreting the zoning ordinance correctly?
2.) Do I also need a permit from the town?

http://www.queencreek.org/home/showdocument?id=2974
http://www.queencreek.org/home/showdocument?id=2974

Here is the snip from the link above:
C. APPLICABILITY. 1. NEW TOWERS AND ANTENNAS. All new towers or antennas in the Town of Queen Creek shall be subject to these regulations. 2. EXCEPTIONS. a. Amateur Radio Station Operators/Receive Only Operations. This ordinance shall not govern any tower, or the installation of any antenna, that is under the maximum building height of the zoning district in which such structure is located and which is owned and operated by a federally-licensed amateur radio station operator or is used exclusively for receive only operations.

Thanks again,

Andy

I believe you are interpreting correctly. As for requiring a building permit, that is a different code. You are looking in the zoning regulations for your compliance check (good place to look). Development services/Building safety is where to go to check on permit and inspection requirements.
Good luck!
Brad

okay, to close the loop on this.... After describing the vertical antenna install, QC stated that no permit is required provided the antenna height doesn't exceed 35'. It falls into the same exemption as a flag pole or light pole. So, I should be in good shape as far as the town is concerned.
This was the response:
Thanks forcontacting our office, as discussed there is not required a permit for thisantenna installation and there are not prescriptive requirements in the codefor this specific installation.

Ordinance 539-1Exhibit "A" section 7.1.4.2.1 (14) Exempt from a permit flag polesand light poles no over 35 feet in height.

There should be another section of thet ordinance that states something to the effect ' the total height to the top of the structure (Amateur tower plus antenna) shall not exceed 75 feet'.

When the ordinance was written (and adopted), the wording included allowing 2 towers per lot of record, and smaller supports and antennas were limited not in number but could be no higher than 15' above the tallest part of the existing dwelling.

I do not have my copy in front of me, this is from memory.

But at the time it was written (2002 maybe?), I was very familiar with the wording. John Kross was City Manager, and Wendy Feldman was the Mayor, and I believe I was the first Q.C. Amateur to go thru the new process after the ordinance was adopted.

See if you can find this wording included in other paragraphs. From my memory, you should have no issue along this line with your proposed vertical.

Jim

With all this talk about vertical antennas I took some time Sunday morning to check on mine as it had been leaning from the winds we have seen as of recent. Come to find out several bolts were loose in both the mount to the mast as well as bolts that go through the fiberglass junction that separates the base and transmission box from the vertical element(s).
A few more hours later than planned- all tighten up and good as new and back to "vertical".

Just a friendly reminder to check your antennas. We don't see the ice and weather that we do back east, but the winds here can play havoc as well.

East Valley Repeater Group reminder
When: Monday, 07 September 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

Queen Creek Emergency Communications Group Net reminder
When: Sunday, 06 September 2015 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 449.325 (-) PL 100, 449.325 Simplex if Repeater Fails

Notes: The Queen Creek Emergency Communications Group will hold its weekly radio net Sunday evening at 2100 hours (9:00 PM). All are welcome to check-in on the first Sunday of the month. Only Regional Net NCS are required on all other Sundays of the month. The acting Net Control Station (NCS) will usually be announced in advance.

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station for 4 minutes.

If you are up and about at around 5:25 AM (condolences), you should be able
to see it very well at 71 max degrees elevation.

Time: Mon Sep 07 5:27 AM
Visible: 4 min
Max Height: 71 degrees
Appears: SW (from 225 degrees)
Disappears: ENE (toward 67.5 degrees)

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

1. Balloon Launch
Posted by: n5ib@... n5ib_2
Date: Sun Sep 6, 2015 11:54 am ((PDT))

The LSU HASP (High Altitude Student Platform) project expects to make a launch attempt in the early morning on Monday Sept 7 around 7:30 AM MDT. See http://laspace.lsu.edu/hasp/ http://laspace.lsu.edu/hasp/ for details.

This is a pretty big payload platform, using a 12 million cubic foot zero pressure balloon lifting about 2000 pounds to an altitude of about 125,000 ft.

Jack (W7JLC) and Bryan (W7BNW) from Embry-Riddle Aeronautical University have installed a cross-band repeater along with the assortment of science payloads.
Uplink: 145.560 MHZ, 162.2 tone access
Downlink: 445.525 MHz
When crossband is not active, APRS on 445.925 MHz

Launch is from Ft. Sumner NM, and the balloon will drift generally westward.
When it reaches its float alitude of 125,000 ft the radio footprint will be almost 1000 miles in diameter, reaching roughly from Dallas and San Antonio to Phoenix and up past Denver to Ft. Collins, and down to Chihuahua

in Mexico.
The flight duratio is expected to be 15 to 20 hours.

They invite hams to try it out. If you do and want to report back to me
n5ib@... mailto:n5ib@... I'll collect reports to forward to them.

Have fun, 73
Jim, N5IB

I picked up the APRS but nothing on the other two. The live feed is showing
it still up at approx 27 hours flight time.

3495. AFCI breakers tripping when transmitting? :(

Yahoo group: Queen_Creek_Hams
Date: 2015-09-12 16:26:50 UTC
From: ambroinaz@...
Topic: 3495 Message: 3495

QC Hams,

I've ventured into an area of troubleshooting that has allot of moving parts.. so hoping for some insights as I continue the troubleshooting...

Problem Statement:
When transmitting on HF at anything above approx 20 watts, I am tripping two Arc Fault Circuit Interrupter (AFCI) breakers in my house electric panel HF Equipment:

ICOM 718
MFJ deluxe versa tuner II (manual tuner)
Zero five multiband vertical antenna
MFJ 25 amp switching power supply Choke balun at point where coax enters the shack
Factors:

My shack is quite close the house electrical panel
My coax cable into the shack runs quite close to the house electric panel
My electric panel only has two of these AFCI breakers (a new code requirement for bedrooms in new homes apparently) The 110 outlet that I use for the equipment in the shack is fed by one of the AFCI breakers When transmitting on VHF/UHF at full power (different radio in shack & no tuner) the breakers do not trip The issue happened when I had a 20 meter dipole about 80 feet from the shack, and is also happening with the new vertical antenna which is closer to the shack The issue happened before I put a choke balun in place and still happens What I have done so far:

When this first occurred I assumed it was that I had a failure occurring in the switching power supply, so I borrowed KF7RYX's linear power supply (just a coincidence that it was linear) and when using that power supply I was able to transmit on 100watts HF and did not trip the breakers
So, I purchased a new power supply (switching) assuming I had a bad power supply as the issue, however the issue as returned when using the new power supply.
Since the issue returned I did a bunch of Googling about these AFCI breakers and SWOOSH, came across a whole bunch of posts about HAMs and non-HAMs having issues with these breakers. Some HAMs were saying it was due to RF interference (even causing neighbors AFCI breakers to trip).. while non HAMs were talking about computers, plasma tvs and other device's power supplies tripping their AFCI breakers.
What I plan to do:
Try and re-borrow KF7RYX's linear supply and see if it is the "switching" in the other power supplies that is causing the trip of these "Safety" breakers. This would be consistent with the issues non-HAMs are seeing with their desktop computer power supplies, however it doesn't explain why my other switching power supply that powers my FT-8800 in my shack doesn't trip the breakers at full power (70watts) Run an extension cord through my house to the kitchen to power the shack not from an AFCI breaker fed outlet to see if I still trip the breakers (if the breaker trips, this test would seem to point to RF interference being the issue rather than a switching power supply issue).
Things I cannot do:

move the shack
If you have any ideas beyond what I am planning please let me know. I really hope it is not RF interference, because that would mean moving the shack which is not going to happen due to limited space.

Thanks,

Andy KG7KWG

Topic: 3495 Message: 3497

If you can transmit into a dummy load I would think that might narrow it down to the coax run.

Can you or have you tried all HF bands that your radio can do?

The reason it might not be tripping on UHF or VHF is the higher frequencies.

Can you reroute the coax away from the panel and any interior outlets?

If using a different outlet works there might be a few other options to try.

Call / text if you would like. 480-822-9842

From: ambroinaz@...
Topic: 3495 Message: 3499

Here is how the grounding is handled:

In shack
Tuner and Radio are grounded to a copper pipe (ground bar) under the desk in the shack, which then has 8ga wire that routes out through the wall (through the same hole as the coax cable) to about 12' away (follows along side the coax cable) to a 8 foot 5/8 inch ground rod in the ground.

Antenna:
Directly connected to the same ground rod mentioned above with heavy gauge wire.

Is there a flaw in the system here that you can see?

Is there an issue with the coax running along side the ground wire?

I'm gonna do some experimentation tonight. I will see if I can route the coax a different way. I also will see what happens on different bands to see if the results differ. I also picked up that linear power supply to try and see if that makes any different. Arg, so many variables here...

3501. Re: [Queen_Creek_Hams] Re: AFCI breakers tripping when transmitting? :(

I did some tests on 20 meters with 25 watts...
I used an extension cord to power shack equipment from another circuit (not on the AFCI breaker) - it still tripped one of the AFCI breakers in the electrical panel (surprisingly not the AFCI that powers the shack but tripped the master bedroom breaker). I also used the linear power supply, and it also tripped the master bedroom AFCI breaker.
That rules out a few things.
Seems to me it is now either:
1. RFI from the antenna being sent direct into the electrical panel (since antenna is pretty close to panel)2. A ground issue3. A coax cable run issue
Guess I'll keep plugging away at it. and, I'll stop spamming your inboxes with this stuff since this could go on for longer than anyone really wants to see in their email.
Thanks for the advice,
Andy KG7KWG

Do not stop, this is good stuff - the anatomy of RFI resolution.

Isolate the antenna ground from the ac ground and see what happens.

3506. East Valley Repeater Group, Monday, 14 September 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-09-14 01:55:09 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3506 Message: 3506
Attachments: 1 described; binary payloads are missing from this source WARC

East Valley Repeater Group reminder
When: Monday, 14 September 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

Queen Creek Emergency Communications Group Net reminder
When: Sunday, 13 September 2015 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 449.325 (-) PL 100, 449.325 Simplex if Repeater Fails

Notes: The Queen Creek Emergency Communications Group will hold its weekly radio net Sunday evening at 2100 hours (9:00 PM). All are welcome to check-in on the first Sunday of the month. Only Regional Net NCS are required on all other Sundays of the month. The acting Net Control Station (NCS) will usually be announced in advance.

3508. Need Volunteers to Support Dennis, KF7RYX, September 19th - Community Preparedness

Yahoo group: Queen_Creek_Hams
Date: 2015-09-14 05:51:32 UTC
From: Joe Sammartino
Topic: 3508 Message: 3508

HELP !

Dennis has been asked to provide a ham radio communications exhibit at this upcoming event next Saturday.

It would be great to have 3-4 people to help him setup/take down and talk to people about ham radio. We realize this is short notice but the request and information just came today.

This is the event sponsored by Congressman Matt Salmon.

If you can help, please contact Dennis at kf7ryx@... <kf7ryx@...>.

Thanks,

Joe,, N2QOJ / QCECG

==========

Here is an excerpt from the official request to Dennis:

Dear Community First Exhibitors,

Thank you SO much for taking some of your precious time to help with this event.

Here are the details:

Date: Saturday, Sept 19, 2015

Location: Tri City Baptist, 2211 W. Germann Rd., Chandler

Set up time: 9:00 a.m. Event time: 10:00 a.m. to 1:00 p.m.

Civic, faith leaders, representatives of charities, and members of other churches will be there. It is a worthwhile community event, but not specifically church related.

We are organizing displays from LDS members and representatives about:

--Food Storage

--Gardening (Glen Hakes and Richard Vaterlaus)

--FamilySearch (Brita Beatty)

--Emergency Preparedness

--JustServe (Camille Taylor)

--Employment

--Ham Radio (Dennis Lawrence)

I was not able to do any tests last night due to lightening in the distance. I just didn't want to take a chance raising the vertical, not worth it.
However, I did disconnect the grounding setup on the radio and tuner in the shack and now only have antenna ground directly to the ground rod (isolation test). I also (per a recommendation I read online) moved the choke balen 50' away from the antenna. I had it right outside the wall of the shack to choke the RF before it enters the shack. But, it seems I dont really understand the different types of balens out there, but the one I built is for choking off the RF riding on the outside of the coax. The goal was to choke it before it enters the shack, however with my shack being so close the vertical antenna it may not be ideal placement where I had it. I'll keep experimenting... I also am investigating alternatives to these pesky new AFCI circuit breakers... Andy KG7KWG

Before reading K0NR blog this afterfnoon, I was leaning towards its a grounding issue. It sounds to me your grounding run is too long.

from K0NR blog....

You are probably familiar with the Ground Fault Circuit Interrupter (GFCI) <https://en.wikipedia.org/wiki/Residual-current_device>, also called Ground Fault Interrupter (GFI), Residual-Current Device (RCD) and a few other names. While doing some electrical work for a family member, I discovered Arc Fault Circuit Interrupters <https://en.wikipedia.org/wiki/Arc-fault_circuit_interrupter> (AFCIs) in the breaker box. Having a genuine Electrical Engineering degree (two, actually), I'd like to believe that I am reasonably up to date on basic house wiring. But somehow AFCIs had escaped my attention, even though they started appearing in the National Electric Code over 10 years ago.

A bit of searching on the internet revealed that these newfangled devices are intended to detect *arc faults *are below the trip level of a normal circuit breaker. Think in terms of a frayed extension cord that arcs over, creating a fire hazard, but not exceeding the 15 ampere rating of a typical house circuit. As usual, the Wikipedia entry <https://en.wikipedia.org/wiki/Arc-fault_circuit_interrupter> is a good place to start. AFCIs detect arcs by monitoring the current behavior throughout the 60 Hz cycle. There are characteristics in the waveform that indicate an arc condition exists, causing the AFCI to disconnect the circuit. This article goes into more technical detail if you are interested:

New Technology for Preventing Residential Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs) <http://www.cpsc.gov//PageFiles/108737/AFCIFireTechnology.pdf>

Just like GFIs, AFCIs are available for installation in the main breaker panel and for installation at the electrical outlet. The diagram below shows the block diagram of a typical single-phase AFCI. This is not your old school circuit breaker but a complex system that performs both arc and ground fault detection. As already mentioned, the arc detection is performed by sensing the current behavior. The ground fault detection senses the difference between the current leaving and returning to the device. If there is a significant mismatch between the two currents, a ground fault has occurred.
[image: From New Technology for Preventing Residential Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs)] <http://www.k0nr.com/wordpress/wp-content/uploads/2015/09/afci-circuit-diagram.jpg>

From “New Technology for Preventing Residential Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs)”

This post is just a quick introduction to AFCIs, with a USA perspective. Your local building codes are now or will soon be requiring AFCIs on new construction, so you’ll probably encounter them sooner or later. The National Electrical Manufacturers Association has a website with additional information: www.afcisafety.org. <http://www.afcisafety.org/index.html>

Good info.

A 'ground' is different things at DC (ok, even at 60 HZ) or RF (MHz).

A wire that is a a 1/4 wave long at some RF frequency (say 20
Meters about 17.5 feet) is not the same as a DC (or 60 HZ) ground.
Because such a wire (an odd multiple of 1/4 wavelength at whatever RF
frequency you are using) creates a high impedance and not the desired
low impedance, it can create high RF voltages (even at 100w) that can
easily fool the detection and logic circuits in this device.

RF grounding techniques are different than for DC (an 'Earth' ground).

It may take a bit of sleuthing, but I'll bet there is a resonant
'ground' wire somewhere in your setup that you should be able to
improve or bypass.

Jim and Jon,
I did have a fairly long ground from the station in my shack to the ground rod (probably ~15 feet). I have pulled that ground out and now my shack is ungrounded and only my antenna is grounded to a very close ground rod (1 foot away). I will test tonight. Cross those fingers! Of course if this works then I will figure out how to get the grounding done in the shack another way. Andy KG7KWG

Subject: Re: [Queen_Creek_Hams] Re: AFCI breakers tripping when transmitting? :(

Good info.

A 'ground' is different things at DC (ok, even at 60 HZ) or RF (MHz).

A wire that is a a 1/4 wave long at some RF frequency (say 20 Meters about 17.5 feet) is not the same as a DC (or 60 HZ) ground. Because such a wire (an odd multiple of 1/4 wavelength at whatever RF frequency you are using) creates a high impedance and not the desired low impedance, it can create high RF voltages (even at 100w) that can easily fool the detection and logic circuits in this device.

RF grounding techniques are different than for DC (an 'Earth' ground).

It may take a bit of sleuthing, but I'll bet there is a resonant 'ground' wire somewhere in your setup that you should be able to improve or bypass.

On 9/14/2015 8:56 PM, Jon Goering n7az.jon@... [Queen_Creek_Hams] wrote:

Before reading K0NR blog this afterfnoon, I was leaning towards its a grounding issue. It sounds to me your grounding run is too long.

from K0NR blog....

You are probably familiar with the Ground Fault Circuit Interrupter (GFCI), also called Ground Fault Interrupter (GFI), Residual-Current Device (RCD) and a few other names. While doing some electrical work for a family member, I discovered Arc Fault Circuit Interrupters (AFCIs) in the breaker box. Having a genuine Electrical Engineering degree (two, actually), I’d like to believe that I am reasonably up to date on basic house wiring. But somehow AFCIs had escaped my attention, even though they started appearing in the National Electric Code over 10 years ago. A bit of searching on the internet revealed that these newfangled devices are intended to detect arc faults are below the trip level of a normal circuit breaker. Think in terms of a frayed extension cord that arcs over, creating a fire hazard, but not exceeding the 15 ampere rating of a typical house circuit. As usual, the Wikipedia entry is a good place to start. AFCIs detect arcs by monitoring the current behavior

throughout the 60 Hz cycle. There are characteristics in the waveform that indicate an arc condition exists, causing the AFCI to disconnect the circuit. This article goes into more technical detail if you are interested: New Technology for Preventing Residential Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs) Just like GFIs, AFCIs are available for installation in the main breaker panel and for installation at the electrical outlet. The diagram below shows the block diagram of a typical single-phase AFCI. This is not your old school circuit breaker but a complex system that performs both arc and ground fault detection. As already mentioned, the arc detection is performed by sensing the current behavior. The ground fault detection senses the difference between the current leaving and returning to the device. If there is a significant mismatch between the two currents, a ground fault has occurred. From “New Technology for Preventing Residential Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs)” This post is just a quick introduction to AFCIs, with a USA perspective. Your local building codes are now or will soon be requiring AFCIs on new construction, so you’ll probably encounter them sooner or later. The National Electrical Manufacturers Association has a website with additional information: www.afcisafety.org. 73, Bob K0NR

I had trouble doing that too when I moved here from Texas. Getting my FRN
set up and password was the only issue for me. Here's a link to where I
got it changed:
http://wireless.fcc.gov/services/index.htm?job=cft&id=amateur&page=cft_change_address
If you still have trouble, let me know and I'll backtrack through the steps
I took to get mine changed.

Maybe try tiring your water pipe feed (breaker box ground) to your ground rod if you haven't done that. To equipoise the ground potential. Just a shot in the dark

From: Andrew Ambrosia
Topic: 3495 Message: 3517

Yeah, that might be a good test as well. After thinking about this some more, I decided my next test will be to completely move my operating position to rule out RFI following the coax feedline back so close to the electrical panel. So, the plan is to move my radio, tuner and power supply to the backyard on a temporary table and run the 100' of coax directly to the grounded antenna. If the breakers still trip, I think I can be reasonably certain that it is an issue with the antenna being close to the electrical panel and the RFI being over the air rather then over the ground or coax. At least I think...

Jim and Jon,

I did have a fairly long ground from the station in my shack to the ground rod (probably ~15 feet). I have pulled that ground out and now my shack is ungrounded and only my antenna is grounded to a very close ground rod (1 foot away). I will test tonight. Cross those fingers! Of course if this works then I will figure out how to get the grounding done in the shack another way.

Good info.

A 'ground' is different things at DC (ok, even at 60 HZ) or RF (MHz).

A wire that is a a 1/4 wave long at some RF frequency (say 20 Meters about 17.5 feet) is not the same as a DC (or 60 HZ) ground. Because such a wire (an odd multiple of 1/4 wavelength at whatever RF frequency you are using) creates a high impedance and not the desired low impedance, it can create high RF voltages (even at 100w) that can easily fool the detection and logic circuits in this device.

RF grounding techniques are different than for DC (an 'Earth' ground).

It may take a bit of sleuthing, but I'll bet there is a resonant 'ground' wire somewhere in your setup that you should be able to improve or bypass.

from K0NR blog....

You are probably familiar with the Ground Fault Circuit Interrupter (GFCI) (https://en.wikipedia.org/wiki/Residual-current_device), also called Ground Fault Interrupter (GFI), Residual-Current Device (RCD) and a few other names. While doing some electrical work for a family member, I discovered Arc Fault Circuit Interrupters (https://en.wikipedia.org/wiki/Arc-fault_circuit_interrupter) (AFCIs) in the breaker box. Having a genuine Electrical Engineering degree (two, actually), I'd like to believe that I am reasonably up to date on basic house wiring. But somehow AFCIs had escaped my attention, even though they started appearing in the National Electric Code over 10 years ago.

A bit of searching on the internet revealed that these newfangled devices are intended to detect arc faults are below the trip level of a normal circuit breaker. Think in terms of a frayed extension cord that arcs over, creating a fire hazard, but not exceeding the 15 ampere rating of a typical house circuit. As usual, the Wikipedia entry (https://en.wikipedia.org/wiki/Arc-fault_circuit_interrupter) is a good place to start. AFCIs detect arcs by monitoring the current behavior throughout the 60 Hz cycle. There are characteristics in the waveform that indicate an arc condition exists, causing the AFCI to

disconnect the circuit. This article goes into more technical detail if you are interested:

New Technology for Preventing Residential Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs) (http://www.cpsc.gov//PageFiles/108737/AFCIFireTechnology.pdf)

Just like GFIs, AFCIs are available for installation in the main breaker panel and for installation at the electrical outlet. The diagram below shows the block diagram of a typical single-phase AFCI. This is not your old school circuit breaker but a complex system that performs both arc and ground fault detection. As already mentioned, the arc detection is performed by sensing the current behavior. The ground fault detection senses the difference between the current leaving and returning to the device. If there is a significant mismatch between the two currents, a ground fault has occurred.

I used an extension cord to power shack equipment from another circuit (not on the AFCI breaker) - it still tripped one of the AFCI breakers in the electrical panel (surprisingly not the AFCI that powers the shack but tripped the master bedroom breaker). I also used the linear power supply, and it also tripped the master bedroom AFCI breaker.

That rules out a few things.

Seems to me it is now either:

1. RFI from the antenna being sent direct into the electrical panel (since antenna is pretty close to panel)

2. A ground issue

3. A coax cable run issue

Guess I'll keep plugging away at it. and, I'll stop spamming your inboxes with this stuff since this could go on for longer than anyone really wants to see in their email.

Thanks for the advice,

I was reading the info on AFCI's. Did you check the manufacture of your breakers to see if they were the defective one's made by Eaton? In some cases they were tripping their neighbors houses that had the same part number breaker. The work the ARRL Lab did with Eaton matches you're problem exactly.

3519. How to get a paper copy of your FCC license

Yahoo group: Queen_Creek_Hams
Date: 2015-09-15 18:55:46 UTC
From: Joe Sammartino
Topic: 3519 Message: 3519

So, you are a new ham and just learned that the FCC does not send out paper licenses any more.....bummer.

But, you still want one for your shack wall, your car, your wallet, or your pride (for shame!).

Here are the steps to download an official copy of your license (authorization).

1. Go to the FCC ULS database at:

http://wireless.fcc.gov/uls/index.htm?job=home

2. Log in with your FRN number and password by clicking on the "LOG IN" button,
next to "ONLINE FILING".

(you can find your FRN number on the QRZ.com details tab for your call sign)

3. After logging in, click on "Download Electronic Authorizations" in the left-hand column.

4. Enter your callsign and click search. Your license will appear in the left box titled "My Authorizations". Click the "ADD" button, to add it to the list of Authorizations to download.

5. Scroll to the bottom of the page, and click on the "DOWNLOAD" button in the lower right hand corner. Your computer should then prompt you to "open or save" the PDF file.

Of course, this process works for any licensed ham that needs to download an official copy of their FCC amateur license. This will work for GMRS and whatever other FCC license may be attached to your FRN number.

3522. Re: [Queen_Creek_Hams] Re: AFCI breakers tripping when transmitting? :(

Yahoo group: Queen_Creek_Hams
Date: 2015-09-15 19:39:36 UTC
From: Jay Baack
Topic: 3495 Message: 3522

Without changing everything at once, can you
Just run a new coax from the current shack to the antenna (even out a window)
To see if the proximity of the feed line to the panel box is the issue or the location of the RF source is the issue.

If it still trips with the coax relocated.. Then move the shack.

Question about the coax:
Overall length? Factory terminated ends or did you do it?
Any adapters used? I had my entire 1000w 143 MHz EME station (multiple antennas, seperate tx and rx lines, sequencers, inline preamps..) go crazy all from a bad 6" coax jumper.

>
> Yeah, that might be a good test as well. After thinking about this some more, I decided my next test will be to completely move my operating position to rule out RFI following the coax feedline back so close to the electrical panel. So, the plan is to move my radio, tuner and power supply to the backyard on a temporary table and run the 100' of coax directly to the grounded antenna. If the breakers still trip, I think I can be reasonably certain that it is an issue with the antenna being close to the electrical panel and the RFI being over the air rather then over the ground or coax. At least I think...

From: Andrew Ambrosia
Topic: 3495 Message: 3523

Thanks for the effort you have put in helping me here Tom. It is much appreciated. Yes, I (and my whole neighborhood) have the defective Eaton AFCI breakers feeding each bedroom. I was working that route with Eaton/AARL in parallel to the tests I have been doing with my setup. Coincidentally, I just heard back via email this morning from the Eaton contact that has been working with the AARL on the issue. This is what he said:
"Every breaker built after Jan 1, 2015 has the fix for HAM radio implemented into the design. I can send you replacements if needed. Are both of the breakers 15 amp and where can I ship them to?"
 So, I have two new breakers from Eaton being shipped to me. My friend is an electrician and he said he'd install them for me. I am hoping this is the fix, but will continue to do some tests as well. In the threads I read about the new Ham friendly breakers, is that they weren't flawless, but that they were less susceptible to RFI. I still have to find out if my neighbors Eaton breakers are tripping from my RFI. Andy KG7KWG

Subject: Re: [Queen_Creek_Hams] Re: AFCI breakers tripping when transmitting? :(

  I was reading the info on AFCI's. Did you check the manufacture of your breakers to see if they were the defective one's made by Eaton? In some cases they were tripping their neighbors houses that had the same part number breaker. The work the ARRL Lab did with Eaton matches you're problem exactly.

Subject: Re: [Queen_Creek_Hams] Re: AFCI breakers tripping when transmitting? :(

Good info.

A 'ground' is different things at DC (ok, even at 60 HZ) or RF (MHz).

A wire that is a a 1/4 wave long at some RF frequency (say 20 Meters about 17.5 feet) is not the same as a DC (or 60 HZ) ground. Because such a wire (an odd multiple of 1/4 wavelength at whatever RF frequency you are using) creates a high impedance and not the desired low impedance, it can create high RF voltages (even at 100w) that can easily fool the detection and logic circuits in this device.

RF grounding techniques are different than for DC (an 'Earth' ground).

It may take a bit of sleuthing, but I'll bet there is a resonant 'ground' wire somewhere in your setup that you should be able to improve or bypass.

Subject: Re: [Queen_Creek_Hams] How to get a paper copy of your FCC license

  Thanks for the info. I may need to paper my wall now. Janet

On Sep 15, 2015, at 11:55 AM, Joe Sammartino jsammartino@... [Queen_Creek_Hams] <Queen_Creek_Hams@yahoogroups.com> wrote:

  So, you are a new ham and just learned that the FCC does not send out paper licenses any more.....bummer.
But, you still want one for your shack wall, your car, your wallet, or your pride (for shame!).
Here are the steps to download an official copy of your license (authorization).
1. Go to the FCC ULS database at:
http://wireless.fcc.gov/uls/index.htm?job=home
2. Log in with your FRN number and password by clicking on the "LOG IN" button,next to "ONLINE FILING".
(you can find your FRN number on the QRZ.com details tab for your call sign)
3. After logging in, click on "Download Electronic Authorizations" in the left-hand column.
4. Enter your callsign and click search. Your license will appear in the left box titled "My Authorizations". Click the "ADD" button, to add it to the list of Authorizations to download.
5. Scroll to the bottom of the page, and click on the "DOWNLOAD" button in the lower right hand corner. Your computer should then prompt you to "open or save" the PDF file.
Of course, this process works for any licensed ham that needs to download an official copy of their FCC amateur license. This will work for GMRS and whatever other FCC license may be attached to your FRN number.

From: Tom Hurst
Topic: 3495 Message: 3525

Glad you have the replacements and someone to replace them. I read the same thing that they had problems with some of the updated design.

I don't remember the name of the company but it was in one of the posts. A different manufacture that did not suffer from the same issues.

I spent about 25 years working on commercial aircraft. Chasing wires, intermittant faults were always the most challenging but the most rewarding. I came across a problem that took about a month to get fixed. Over the next several years I came across the same problem. However the aircraft had undergone a overhaul at a third party repair station and in each occurrence I did not find out the details untell the aircraft were over a week late. In both cases I was able to provide the name and location of the part that was causing the problem and they were fixed and released for service within 12 hours.

Long story but problems like that and the one your having always help out in the end especially when the information is shared as much as possable. I've learned alot from your posts on this.

I'll end on this note....I think it was brought up already at least in part? but putting a ground rod by your service panel and connecting it per code to your panel ground. Than having your equipment to the same rod or one close the where your cables exit the shack. I was also wondering if you have a lightning arrestor on your feedline at the antenna? I might be wrong but my thinking is it would help keep your feedline clean since it would be an additional ground at the antenna?

I was reading the info on AFCI's. Did you check the manufacture of your breakers to see if they were the defective one's made by Eaton? In some cases they were tripping their neighbors houses that had the same part number breaker. The work the ARRL Lab did with Eaton matches you're problem exactly.

Jim and Jon,
I did have a fairly long ground from the station in my shack to the ground rod (probably ~15 feet). I have pulled that ground out and now my shack is ungrounded and only my antenna is grounded to a very close ground rod (1 foot away). I will test tonight. Cross those fingers! Of course if this works then I will figure out how to get the grounding done in the shack another way. Andy KG7KWG

Good info.

A 'ground' is different things at DC (ok, even at 60 HZ) or RF (MHz).

A wire that is a a 1/4 wave long at some RF frequency (say 20 Meters about 17.5 feet) is not the same as a DC (or 60 HZ) ground. Because such a wire (an odd multiple of 1/4 wavelength at whatever RF frequency you are using) creates a high impedance and not the desired low impedance, it can create high RF voltages (even at 100w) that can easily fool the detection and logic circuits in this device.

RF grounding techniques are different than for DC (an 'Earth' ground).

It may take a bit of sleuthing, but I'll bet there is a resonant 'ground' wire somewhere in your setup that you should be able to improve or bypass.

from K0NR blog....

You are probably familiar with the Ground Fault Circuit Interrupter (GFCI), also called Ground Fault Interrupter (GFI), Residual-Current Device (RCD) and a few other names. While doing some electrical work for a family member, I discovered Arc Fault Circuit Interrupters (AFCIs) in the breaker box. Having a genuine Electrical Engineering degree (two, actually), I’d like to believe that I am reasonably up to date on basic house wiring. But somehow AFCIs had escaped my attention, even though they started appearing in the National Electric Code over 10 years ago. A bit of searching on the internet revealed that these newfangled devices are intended to detect arc faults are below the trip level of a normal circuit breaker. Think in terms of a frayed extension cord that arcs over, creating a fire hazard, but not exceeding the 15 ampere rating of a typical house circuit. As usual, the Wikipedia entry is a good place to start. AFCIs detect arcs by monitoring the current behavior throughout the 60 Hz cycle. There are characteristics in the waveform that indicate an arc condition exists, causing the AFCI to disconnect the circuit. This article goes into more technical detail if you are interested: New Technology for Preventing Residential

Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs) Just like GFIs, AFCIs are available for installation in the main breaker panel and for installation at the electrical outlet. The diagram below shows the block diagram of a typical single-phase AFCI. This is not your old school circuit breaker but a complex system that performs both arc and ground fault detection. As already mentioned, the arc detection is performed by sensing the current behavior. The ground fault detection senses the difference between the current leaving and returning to the device. If there is a significant mismatch between the two currents, a ground fault has occurred. From “New Technology for Preventing Residential Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs)” This post is just a quick introduction to AFCIs, with a USA perspective. Your local building codes are now or will soon be requiring AFCIs on new construction, so you’ll probably encounter them sooner or later. The National Electrical Manufacturers Association has a website with additional information: www.afcisafety.org. 73, Bob K0NR

On Sat, Sep 12, 2015, 21:01 Andrew Ambrosia ambroinaz@... [Queen_Creek_Hams] Queen_Creek_Hams@yahoogroups.com> wrote:

I did some tests on 20 meters with 25 watts...
I used an extension cord to power shack equipment from another circuit (not on the AFCI breaker) - it still tripped one of the AFCI breakers in the electrical panel (surprisingly not the AFCI that powers the shack but tripped the master bedroom breaker). I also used the linear power supply, and it also tripped the master bedroom AFCI breaker.

That rules out a few things.
Seems to me it is now either:
1. RFI from the antenna being sent direct into the electrical panel (since antenna is pretty close to panel) 2. A ground issue 3. A coax cable run issue
Guess I'll keep plugging away at it. and, I'll stop spamming your inboxes with this stuff since this could go on for longer than anyone really wants to see in their email.
Thanks for the advice,
Andy KG7KWG

The saga continues... test #478 failed with same results. I moved the radio, tuner, and PS, into the yard doing a little "radios in the park" style. Listened in on 40meter for awhile... then tuned up and transmitted. Pop, both Eaton breakers tripped. I think I'll take a break for a bit till the new breakers arrive, and will give all of our email boxes a rest. Andy KG7KWG

Subject: Re: [Queen_Creek_Hams] Re: AFCI breakers tripping when transmitting? :(

Good info.

A 'ground' is different things at DC (ok, even at 60 HZ) or RF (MHz).

A wire that is a a 1/4 wave long at some RF frequency (say 20 Meters about 17.5 feet) is not the same as a DC (or 60 HZ) ground. Because such a wire (an odd multiple of 1/4 wavelength at whatever RF frequency you are using) creates a high impedance and not the desired low impedance, it can create high RF voltages (even at 100w) that can easily fool the detection and logic circuits in this device.

RF grounding techniques are different than for DC (an 'Earth' ground).

It may take a bit of sleuthing, but I'll bet there is a resonant 'ground' wire somewhere in your setup that you should be able to improve or bypass.

Before reading K0NR blog this afterfnoon, I was leaning towards its a grounding issue. It sounds to me your grounding run is too long.

from K0NR blog....

You are probably familiar with the Ground Fault Circuit Interrupter (GFCI), also called Ground Fault Interrupter (GFI), Residual-Current Device (RCD) and a few other names. While doing some electrical work for a family member, I discovered Arc Fault Circuit Interrupters (AFCIs) in the breaker box. Having a genuine Electrical Engineering degree (two, actually), I’d like to believe that I am reasonably up to date on basic house wiring. But somehow AFCIs had escaped my attention, even though they started appearing in the National Electric Code over 10 years ago. A bit of searching on the internet revealed that these newfangled devices are intended to detect arc faults are below the trip level of a normal circuit breaker. Think in terms of a frayed extension cord that arcs over, creating a fire hazard, but not exceeding the 15 ampere rating of a typical house circuit. As usual, the Wikipedia entry is a good place to start. AFCIs detect arcs by monitoring the current behavior throughout the 60 Hz cycle. There are characteristics in the waveform that indicate an arc condition exists, causing the AFCI to disconnect the circuit. This article goes into more technical detail if you are interested: New Technology for Preventing Residential

Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs) Just like GFIs, AFCIs are available for installation in the main breaker panel and for installation at the electrical outlet. The diagram below shows the block diagram of a typical single-phase AFCI. This is not your old school circuit breaker but a complex system that performs both arc and ground fault detection. As already mentioned, the arc detection is performed by sensing the current behavior. The ground fault detection senses the difference between the current leaving and returning to the device. If there is a significant mismatch between the two currents, a ground fault has occurred. From “New Technology for Preventing Residential Electrical Fires: Arc-Fault Circuit Interrupters (AFCIs)” This post is just a quick introduction to AFCIs, with a USA perspective. Your local building codes are now or will soon be requiring AFCIs on new construction, so you’ll probably encounter them sooner or later. The National Electrical Manufacturers Association has a website with additional information: www.afcisafety.org. 73, Bob K0NR

3529. Re: [Queen_Creek_Hams] How to get a paper copy of your FCC license

Yahoo group: Queen_Creek_Hams
Date: 2015-09-17 23:40:38 UTC
From: kt1na@...
Topic: 3519 Message: 3529

They still send out paper licenses.

There are a number of ways a license holder can obtain an official copy of their license. The official license will display the FCC logo and the watermark "Official Copy" will be printed across each page of an official authorization from FCC.

1. Download and Print License: The licensee can log into the FCC ULS License Manager System http://wireless.fcc.gov/uls/ http://wireless.fcc.gov/uls/ with their FRN and password to ‘Download the Electronic Authorization’ of the official license. On the ‘Download Authorizations’ page the license holder will add their call sign to the ‘Authorizations to Download’ and then click download. The PDF of the license can be saved to a computer and printed later or the file can be opened and printed immediately.

2. Login and Set Paper Preferences: The licensee can log into the FCC ULS License Manager System http://wireless.fcc.gov/uls/ http://wireless.fcc.gov/uls/ with their FRN and password and set their own paper authorization preferences for future mailings. This option determines whether a user will receive paper authorizations (printed license and FRN information) from the FCC. The license holder would select either YES or NO and then click SAVE. By selecting YES, you will continue to receive paper authorizations printed and mailed by the FCC. By selecting NO, you will not receive authorizations printed and mailed from the FCC. This preference will affect all granted authorizations on this FRN.

3. Receive License via email: When modifying, renewing or requesting a duplicate copy of the license, a licensee who already has an FCC Registration Number (FRN) and provides a valid e-mail address under “Applicant Information” while logged in to the ULS system will receive an official ULS-generated electronic authorization via e-mail.

The action of adding a valid e-mail address into the FCC system can also be performed by a VEC filing new, upgraded, modified or renewed licenses on behalf of applicants. All exam applicants should include a valid email address on their NCVEC 605 form, in order to receive their license electronically.

4. Contact FCC: Licensees may contact FCC Support via the web, by telephone (1-877-480-3201) or by mail to request paper licenses. Please note that FCC recently stopped using distinctive paper stock to produce hard copy licenses and has been printing these on “standard, white recycled paper.” The Bureau noted that the distinctive paper stock it had used was six times more expensive than the plain recycled paper it now uses.

3530. Boy Scouts Electronic Swap Meet and Recycling, Sunday, 20 September 2015

Yahoo group: Queen_Creek_Hams
Date: 2015-09-18 11:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3530 Message: 3530
Attachments: 1 described; binary payloads are missing from this source WARC

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 20 September 2015 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

East Valley Repeater Group reminder
When: Monday, 21 September 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

From: Joe Sammartino
Topic: 3534 Message: 3535

Folks,

We are short 2 volunteers for the 4-7PM slot and 3 volunteers for the 7-10PM slots.

Response has been minimal and we need more help. We will take all volunteers even if you are not QCECG members. Any local ham that would like to volunteer will have fun and perform a great service for our Town. You will have great support from QCECG.

If you can help, send me an email TODAY at jsammartino@.... Just let me know which time slot you can work or both. All the details are below.

Thanks,

Joe, N2QOJ
QCECG

3536. International Space Station Visible Friday Morning at 5:52 AM

Yahoo group: Queen_Creek_Hams
Date: 2015-09-25 06:59:09 UTC
From: Joe Sammartino
Topic: 3536 Message: 3536
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

Good news! Another opportunity to spot the station for 4 minutes. It won't be at a very great height above but you should be able to see it well enough at 47 max degrees elevation.

Time: Fri Sep 25 5:52 AM
Visible: 4 min
Max Height: 47 degrees
Appears: NW *(from 315 degrees)*
Disappears: ENE *(toward 113 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Hi Andy,

You can use metal screen as an RF shield. The size of the screen openings can be varied depending on the freq range (wave length) you want to block. The lower the freq the larger the mesh openings can be and still be just as effective.

There are also materials sold through places such as Digikey to block or absorb RF but that's more expensive and generally aimed at microwave freq's.

http://www.amazon.com/Disaster-Preparedness-Attacks-Storms-Expanded/dp/1478376651/ref=asap_bc?ie=UTF8

The book above has some good info and can download for approx 6 dollars. They did actual tests using an RF lab that gives some good insight to household and other items that can be used. It's meant more towards EMP and Solar events but the information still applies.

Andy:

Shielding the breaker panel won't hurt (unless you short something out!), but I would opine that the RF is getting in via AC wires that are outside the box and acting as antennas.

If so, shielding the panel won't keep those RF voltages off the wires.

Aluminum screening may have benefits for EMP, as the booklet Tom mentions claims. But that is more of a Faraday shield technique, and if the AC wires already have brought RF voltages into the breaker, the only way to moderate that probably requires RF chokes on the wires acting like antennas at your operating frequency.

Please keep posting the blow-by-blow accounts. RFI problems are vexing and plentiful, and what you find out will be a valuable addition to the local 'knowledge base'.

3541. Queen Creek Emergency Communications Group Activation Drill Preparation

Yahoo group: Queen_Creek_Hams
Date: 2015-09-26 17:44:33 UTC
From: Joe Sammartino
Topic: 3541 Message: 3541
Attachments: 1 described; binary payloads are missing from this source WARC

**** If you are not a QCECG member but would like to become a member, contact Joe, N2QOJ, at jsammartino@... <jsammartino@...>. ****

Folks,

As we all know, it is not possible to monitor your radio for QCECG drill or emergency activation all the time. That is why we have a text alerting system for all of you and it works quite well.

It's time to update the emergency alert test system for our QCECG members and to add new member contacts as well.

If you are not already a QCECG member, but want to be, please let me know that when you respond. I've also attached a one page description of the Queen Creek Emergency Communications Group for your review (pass it along to interested parties).

Here is what I need from you (if the info we have for you has changed or if you are a new addition):

- Name
- Call Sign
- 10 digit cell phone number
- Name of your cell carrier (Sprint, TMobile, AT&T, Boost, Cricket, etc.)

And here is how I would like you to provide it to me - just reply to me directly (email directly to jsammartino@...) and format the information in a one line response just like this example:

Joe Sammartino, N2QOJ, 4803812993, TMobile

Please do not reply to this email.

If you get this email or request more than once, sorry. Unfortunately, not all QCECG members have signed up to the QCCOMGroup YAHOO Group. If you still need to do that, send me a private email.

Thank you,

Joe, N2QOJ

Good News! After installing the two new Eaton breakers in my electric panel, I am able to transmit at 100 watts on 20m and 40m and the breakers are not tripping. In fact, I just made my first couple of HF contacts on 40 meters - and that was pretty fun. :)

Yahoo group: Queen_Creek_Hams
Date: 2015-10-07 00:05:07 UTC
From: Joe Sammartino
Topic: 3555 Message: 3555

Hi Folks,

This month's meeting agenda:

- All about NVIS - Near Vertical Incident Skywave: What is it and why it is important to emergency communications.

- Portable antennas - VHF, UHF, HF - show and tell of portable antennas, mounts, and setup

- And more ! (empty teaser)

Best regards,

Joe, N2QOJ

Folks,

Our very own Dennis Lawrence graces the cover of the September issue of "The Beehive"..

The story on self-reliance features Dennis and his wife, Mimi.

It has been uploaded to the online QCComGroup <https://groups.yahoo.com/neo/groups/qccomgroup/info> (you need to be signed in) at:

https://xa.yimg.com/df/QCComGroup/Beehive+Sept+2015+Self-Reliance.pdf?token=_vUFMv54ahSF6RWRGOxSAsPn1QsCkn2E6nYW2J3ADlkix7jozcqy6oEMxxx3uKJUp4fdvCCjpwrxQFIKuFM-xkl_PhiRLwEIQ1a_JeW_LXoKURU7uagC-cwU2mhkVlQlZ65Ihwd3UHI&type=download

It is also attached to this announcement.

I'm getting my autographed copy soon!

Regards,

Joe, N2QOJ

3567. QCECG Volunteers needed for Town of Queen Creek Trunk or Treat, October 24th

Yahoo group: Queen_Creek_Hams
Date: 2015-10-13 21:00:11 UTC
From: Joe Sammartino
Topic: 3567 Message: 3567

QCARC Members and friends:

We have received a request from the Town's Recreation Services Division for volunteers to assist with communications and the shuttle buses for the "Trunk or Treat"Founders' event on *Saturday, October 24, 2015*. Volunteers will be needed from *4 - 10 pm*.

Here is a link to the event page on the Town's website, *http://www.queencreek.org/departments/parks-recreation/special-events/trunk-or-treat <http://www.queencreek.org/departments/parks-recreation/special-events/trunk-or-treat>*

Recreation Services will employ four (4) shuttle buses to move citizens from the parking area at the Library to the event at Desert Mountain Park.

Four (4) QCECG members will be at the parking location to assist with parking, guide people to the shuttle bus pick up/drop off location and communicate with the shuttle buses. There will be one (1) QCECG member on each bus to communicate with the members at the parking location.

We would like to operate two shifts of 8 volunteers each:

1st Shift: 4 - 7 pm

2nd Shift: 7 - 10 pm

We need to support our Town's request and exercise our communications skills. We need a total of 16 volunteers - 8 for each shift. More would be even better.

If you are not a QCECG member, we can still use your help. Any local ham with an HT and desire to serve our community will be welcome.

Please consult your personal calendars and contact me asap via direct email (noted below).

Thank you,

Joe Sammartino, N2QOJ

3570. Videos From Last Saturday's "Radio in the Park" event in Queen Creek

Yahoo group: Queen_Creek_Hams
Date: 2015-10-14 06:16:07 UTC
From: Joe Sammartino
Topic: 3570 Message: 3570

Folks,

Last Saturday's Radio in the Park in Queen Creek was very interesting.

Three portable HF stations were demonstrated. Each of them offered their own special features.

Videos describing the stations has been posted to the Queen Creek Amateur Radio Club Facebook page at:

https://www.facebook.com/Queen-Creek-Amateur-Radio-Club-190785887681041/

Enjoy,

Regards,

Joe, N2QOJ

3571. Community Emergency Preparedness Fair, Saturday, October 17, 7AM

Yahoo group: Queen_Creek_Hams
Date: 2015-10-16 04:21:55 UTC
From: Joe Sammartino
Topic: 3571 Message: 3571

There will be a Community Emergency Preparedness Fair at the Higley Stake Center this coming Saturday, October 17th. This event is a tri-stake event and one of the area's largest and most attended.

A free pancake breakfast is provided (while the food lasts). *It was attended by over 2000 people last year*. There will be over 100 booths covering all topics of self reliance and preparedness.

The Queen Creek Emergency Communications Group has been asked to exhibit regarding emergency communications.

This event is open to the public.

Here is the information page: http://www.iwillprepare.com/fair.htm

Here is an aerial view of last year's event: drone video
<https://www.dropbox.com/s/jfsen9jth8e1s42/141101%20EP%20Fair.mp4?dl=0>

Here is the location, time, and parking info:

Date: October 17, 2015

Time: 7 AM to 11 AM

Place Higley Stake Center, 1865 S Higley Rd, Gilbert, AZ 85295

Higley, South of Ray and across from the Williams Field High
School

Parking: Parking will be across the street at Williams Field High School.

Regards,

Joe, N2QOJ <http://www.n2qoj.com>

QCARC <http://www.queencreekarc.org>

Folks,

We need more volunteers for "Trunk or Treat" on October 24th......

We have a total of (8) so far and we need at least another (8), mostly for
the 2nd shift from 7 PM till 10 PM.

Please contact me to volunteer your services at jsammartino@....

Thanks,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 18 October 2015 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

East Valley Repeater Group reminder
When: Monday, 19 October 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

I'm in the process of putting up a 2m repeater in STV and looking for a Duplexer (20-50 watt). If anyone has any reliable sources please let me know.

I've been checking various websites but thought some of the folks here might have some info.

SB QST @ ARL $ARLB031
ARLB031 Radio Amateurs in Mexico Prepare as Powerful Hurricane
Patricia Nears Landfall

ZCZC AG31
QST de W1AW
ARRL Bulletin 31 ARLB031
>From ARRL Headquarters
Newington CT October 23, 2015
To all radio amateurs

SB QST ARL ARLB031
ARLB031 Radio Amateurs in Mexico Prepare as Powerful Hurricane
Patricia Nears Landfall

An emergency net has been established on 7060 kHz (LSB) from Manzanillo in the Mexican state of Colima, in anticipation of the powerful Hurricane Patricia, which is threatening Mexico's Pacific Coast. According to Zian Aguirre, XE1ATZ, the emergency net will also be using 14,120 and 21,120 kHz, and he asked the Amateur Radio community to keep all three frequencies clear for emergency traffic. States of emergency are in effect for three Mexican states.

Omar Alvarez, XE1AO, a faculty member at the University of Colima, initially activated the net on 7060 kHz from the University, which has its own amateur station. He said other stations had checked in from the capital city of Colima.

"We don't have any damage at the moment, just rain since yesterday evening," Alvarez told ARRL. "We are expecting the first effects at 1500 local time. Now I am at home. In the last hour I have had nine stations report in on HF and three on VHF, but without any emergency reports."

He further reported that major grocery outlets in Manzanillo were closing this morning, although they would remain open in Colima, where other economic activity has been shut down. After 1300 local time, the water supply in Manzanillo would shut down as well. "Most of the tourists were evacuated from all the coastal hotels," he said.

The National Hurricane Center in Miami is calling the Category 5 storm "potentially catastrophic," as it heads toward landfall in southwestern Mexico. As of 1500 UTC, the storm was located about 125 miles southwest of Manzanillo and 195 miles south of Cabo

Corrientes, Mexico. Evacuation of some 60,000 residents in the storm's path is under way.

The International Amateur Radio Union (IARU) Region 2 Area C Emergency Coordinator Arnie Coro, CO2KK, has alerted emergency coordinators within Amateur Radio range of Mexico that Hurricane Patricia is packing winds of up to 200 MPH. "Preparations to deal with the huge storm should be completed by now," he said. "I expect Mexican radio amateurs to be operating in the area of 40 meters used for emergency traffic. Please be on the alert in the frequency range between 7050 and 7100 kHz for possible emergency related traffic from Mexico."

The National Hurricane Center said in its 1500 UTC summary, "On the forecast track, the center of Patricia should cross the coast in the hurricane warning area late this afternoon or early this evening. After landfall, the center of Patricia is expected to move quickly north-northeastward across western and northern Mexico."

Hurricane Patricia is the most powerful storm ever recorded by the National Hurricane Center. The storm is expected to generate torrential rains and flooding. The storm is moving to the north at about 10 MPH. The National Hurricane Center has reported that the minimum central barometric pressure is at an extraordinary 25.99 inches.

East Valley Repeater Group reminder
When: Monday, 26 October 2015 07:00 PM to 08:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3589. Re: [Queen_Creek_Hams] HF vertical antenna with ground radials

Yahoo group: Queen_Creek_Hams
Date: 2015-10-29 16:01:50 UTC
From: Jay Baack
Topic: 3463 Message: 3589

As more hams in the area are getting on HF, did we want as a group to map put some "local" 40m 60m 80m frequencies that we could gather? I was not thinking of starting a new net or anything like that, just a set of frequencies that we might want to throw into a memory or be sure to check when we are on that specific band.

Thinking out loud..

WB7TUJ and local friends hang out at 7.158 Mhz every week day starting at 10 am or so. That's AE area. They do go to 80 meters due to conditions sometimes.

Doug, chime in if you can.

Regards,

Joe

3591. updates to web sites

Yahoo group: Queen_Creek_Hams
Date: 2015-10-29 20:35:31 UTC
From: Joe Sammartino
Topic: 3591 Message: 3591

Hi Folks,

The QCARC <http://www.queencreekarc.org/> website has been updated a bit. Most notably, it now has a link for folks interested in obtaining their ham license.

The link on the home page is on the left navigation menu and is entitled, "Get Your Ham License <http://queencreekarc.org/index_files/Page1462.htm>".

Or, you can click on the home page featured link entitled, "How Do I Get Licensed as a Ham <http://queencreekarc.org/index_files/Page1462.htm>?".

Visit the QCARC <http://queencreekarc.org/index.htm> web site at http://queencreekarc.org/ to check out the updates.

Be sure to share the links with anyone that might be interested. It's got all the information they need, including study materials that can be downloaded.

Have you seen the new QCECG <http://www.qcecg.org/> web site? Its only one simple page of information for now but will easily guide someone who is interested in the Queen Creek Emergency Communications Group <http://www.qcecg.org/>.

And for news, photos, and videos about local ham activity, visit the QCARC Facebook <https://www.facebook.com/Queen-Creek-Amateur-Radio-Club-190785887681041/> page or YouTube Channel <https://www.youtube.com/user/QueenCreekARC>.

Would you like to listen to the Ocotillo repeater or Queen Creek repeater with just your PC, laptop, or tablet? Then just follow this link <http://www.broadcastify.com/listen/feed/10544/web/?rl=rr> and you will be monitoring in near real-time with about a 30 second delay. This is also a great way to check your own audio to see if you are punching through loud and clear. The Ocotillo repeater announces the time on the half hour.

Regards,

Joe, N2QOJ <http://www.n2qoj.com>

3598. Upcoming License Exam Testing, Gilbert and Tempe

Yahoo group: Queen_Creek_Hams
Date: 2015-11-11 03:36:10 UTC
From: Joe Sammartino
Topic: 3598 Message: 3598

Hi Folks,

If you are looking to upgrade your license, or, if you have a friend or family member that is ready for to take the exam, here are a few dates for upcoming AMATEUR RADIO LICENSE testing.

Tuesday, November 17, 6:30 PM
LDS Church, 1865 S Higley Rd, Gilbert, AZ 85206
<http://maps.google.com/maps?q=1865%20S%20Higley%20Rd%2C%20Gilbert%2C%20AZ%2085206>

This testing session is administered by the East Valley VE Team and session manager, Fred, AB7JF <fredbollinger@...>. The sponsoring organization is Higley Stake Emergency Preparedness, led by Rick Harston, WG7V, Assistant Higley Stake Emergency Preparedness Specialist, and Jon Sherman, KE7TPD <Iwillprepare@...>, Higley Stake Emergency Preparedness Specialist. Visit Jon's excellent preparedness website at www.iwillprepare.com.

Saturday, November 21, 11 AM
LDS Church, 1111 E. Knox Road, Tempe , Az. 85284
<https://www.google.com/maps/place/1111+E+Knox+Rd,+Tempe,+AZ+85284/@33.3267677,-111.9244087,17z/data=!4m2!3m1!1s0x872b06ebefd47849:0xedab9d33e5891542?hl=en>

This testing session is also administered by the East Valley VE Team and session manager, Fred, AB7JF <fredbollinger@...>. The sponsoring organization is ARIZONA EMERGENCY RESPONSE COMMUNICATIONS <http://az-erc.weebly.com/> and the event is their Regional Emergency Communications Conference <http://az-erc.weebly.com/>. AERC <http://az-erc.weebly.com/> is led by Steve, K7DAD <K7DAD@...>.

*Details about what to bring to an exam session is listed below. Be sure to bring **the following with you:*

· $15.00 Exam Fee

· Photo ID – Driver’s License, Student ID, or Any government issued photo ID

Your Social Security Number is required for the FCC application. *However, if you register with the FCC in advance, you can receive an FRN, which is an FCC Registration Number. You can use that on your application instead of the SSN. *

Here’s the link to get your own FRN number: FCC FRN Registration <http://wireless.fcc.gov/uls/index.htm?job=about_getting_started#d36e21>. I strongly recommend that you register with the FCC and get your FRN number in advance.

If you need to download study guides and smart phone apps, follow this link <http://queencreekarc.org/index_files/Page1462.htm>.

Hi Christie and Group:

I've attached the complete ANLI line of products as a pdf file. (Page 18 of the catalog file or page 20 of the pdf for the antenna and page 25/27 for the window antenna mount.

Here are two sources for the ANLI-800 dual band telescopic antenna:

PRYME at: http://www.pryme.com/index.php?l=product_detail&p=2155

Advanced Specialties at: http://www.advancedspecialties.net/

And their Amazon ad:

http://www.amazon.com/ANLI-AL-800-Telescopic-Amateur-Connector/dp/B0053ZAK9S/ref=sr_1_1?ie=UTF8&qid=1447462925&sr=8-1&keywords=anli-800

Remember, these products connect via BNC <https://en.wikipedia.org/wiki/BNC_connector> (interesting history).

If the attached ANLI pdf file is problematic, download from here <https://dl.dropboxusercontent.com/u/4721475/QCARC/QCECG/QCECG%20Meeting_11_12_2015/ANLI.pdf>
:

https://dl.dropboxusercontent.com/u/4721475/QCARC/QCECG/QCECG%20Meeting_11_12_2015/ANLI.pdf

Here's a high gain (5/8 wave @ 9 db) 2 meter telescopic antenna from Diamond Antennas: Link <http://www.dxengineering.com/parts/dmn-rh205?seid=dxese1&gclid=Cj0KEQiAsZayBRCrioKRkYetvc0BEiQAI70-Aw9Ogjyp90TUKXlNVSXWvjW8X8YWFiD9Lxdm9vaoBh0aAjxI8P8HAQ>

And another from MFG - 1/2 wave (no ground plane needed) - link <http://www.mfjenterprises.com/Product.php?productid=MFJ-1714>.

There are many options. Just search for "ht telescoping antenna" <http://lmgtfy.com/?q=ht+antenna+telescoping>.

3604. Recording of AEN-MAR Net of 11/09/15 Reviewing HAMEX

Yahoo group: Queen_Creek_Hams
Date: 2015-11-15 05:52:30 UTC
From: Joe Sammartino
Topic: 3604 Message: 3604

For those of you who might be interested to listen to the AEN-MAR net from last Monday evening, here is a link to the mp3 recording:

Use this link to listen online:

https://dl.dropboxusercontent.com/u/4721475/QCARC/QCECG/QCECG%20Meeting_11_12_2015/aen-mar-net_11-09-15.mp3

Use this link to download and listen offline:

https://dl.dropboxusercontent.com/u/4721475/QCARC/QCECG/QCECG%20Meeting_11_12_2015/aen-mar-net_11-09-15.mp3?dl=1

It's a 28 Mbyte file so please download it. It will remain available from this link for a week or so, then removed.

It is about 77 minutes long. The first station to make a report that participated in HAMEX is Dennis, KF7RYX, at the 29 minute 39 second mark.

As an aside, it's interesting to note how clear and strong Dennis' audio is on the net compared to Net Control and the other stations. The Net Control operator's signal into the repeater is constantly dropping and not holding the repeater. You know the old saying, "garbage in, garbage out".

Regards,

Joe, N2QOJ

3605. Queen Creek Holiday Festival and Parade, December 5th, 11:30 AM till 9 PM

Yahoo group: Queen_Creek_Hams
Date: 2015-11-16 02:54:18 UTC
From: Joe Sammartino
Topic: 3605 Message: 3605

Folks,

We'll have more details such as shifts, etc. in the next few days.

In the meantime, the Town has requested at least (6) communications volunteers to support this event. It runs from 11:30 AM till 9 PM.

I think we will need at least 10-12 QCECG volunteers to cover this request on a shift basis. You will need to be appropriately dressed - it can get cold.

We welcome those who have never assisted with such an event. It is a great way to learn how to shadow event personnel and ensure reliable communications.

Please let me, Dennis, or Ron know if you can participate.

Regards,

Joe, N2QOJ

East Valley Repeater Group reminder
When: Monday, 16 November 2015 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Folks,

Please find attached, Dave, KG7NCV, brochure regarding the "Fast Mast" system he presented.

The brochure describes many FAST MAST offerings with omni VHF/UHF, HF, or directional VHF/UHF antenna options.

3609. More info on Car Windo Clip Mount for Your HT Antenna

Yahoo group: Queen_Creek_Hams
Date: 2015-11-16 03:32:56 UTC
From: Joe Sammartino
Topic: 3609 Message: 3609

Folks,

The unit I showed during the meeting was made by ANLI. I think it might be very difficult to find these days.

However, all is not lost. These two options from MFJ will also do the job:

BNC: http://www.mfjenterprises.com/Product.php?productid=MFJ-310

SMA: http://www.mfjenterprises.com/Product.php?productid=MFJ-310S

Adding a 19 inch or 20 inch "Tiger Tail" to these mounts should really improve the performance of the connected antenna. Remember, then intent with this kind of mount is to help you get your HT antenna outside the vehicle.

The photo/graphic at the MFJ site above is really poor and does not give you a good view of the entire mount and antenna lead.

This link gives a much better view of the product:

http://www.amazon.com/MFJ-Enterprises-Original-MFJ-310-Handheld/dp/B00OAHD2LS

IMPORTANT - Be sure you compensate for the BNC or SMA connectors on the mount with appropriate adapters for your radio and antenna.

Regards,

Joe, N2QOJ

Holy Cow!

Looks like Nagoya makes window clip mounts too!

http://www.ebay.com/itm/NAGOYA-RB-CLP-Window-Clip-Mount-RG-174-U-3m-Cable-SMA-M-for-Radio-Antenna-Track-/361175094123?hash=item5417b6936b:g:SmsAAOxyOlhSwMlk

And it looks like you shouldn't need any adapters for the ubiquitous
Chinese radios....

Regards,

Joe

3611. Reminder: Ham License Testing Tonight at Higley Stake

Yahoo group: Queen_Creek_Hams
Date: 2015-11-17 18:36:37 UTC
From: Joe Sammartino
Topic: 3611 Message: 3611

Hi Folks,

If you are looking to upgrade your license, or, if you have a friend or family member that is ready for to take the exam, there is testing tonight in Gilbert at the Higley Stake Center.

Tuesday, November 17, 6:30 PM
LDS Church, 1865 S Higley Rd, Gilbert, AZ 85206
<http://maps.google.com/maps?q=1865%20S%20Higley%20Rd%2C%20Gilbert%2C%20AZ%2085206>

This testing session is administered by the East Valley VE Team and session manager, Fred, AB7JF <fredbollinger@...>. The sponsoring organization is Higley Stake Emergency Preparedness, led by Rick Harston, WG7V, Assistant Higley Stake Emergency Preparedness Specialist, and Jon Sherman, KE7TPD <Iwillprepare@...>, Higley Stake Emergency Preparedness Specialist. Visit Jon's excellent preparedness website at www.iwillprepare.com.

I will be there assisting and look forward to meeting you.

3620. Portable psk31

Yahoo group: Queen_Creek_Hams
Date: 2015-11-22 22:39:33 UTC
From: Jay Baack
Topic: 3620 Message: 3620

So, for some of you know I like to play with the digital side of ham radio- jt65, aprs, psk31 etc. At the same time I do enjoy SOTA and other portable style operation.

Knowing I was going to have some downtime (aka alone time) on my family Thanksgiving vacation, I packed my portable gear and headed back east.

Ever since Joe had mentioned at one of the Saturday ham breakfast meetings that there was FLDIGI software for Android, I started looking for an Android tablet to try FLDIGI as well as some PSK31 via other Android software. I wanted something small and lighter than my laptop - I ended up with a Walmart 7" Nextbook Android tablet for $65.

Since I was thinking that I could use this for some SOTA activity as well, I knew I would need an interface to cable connect the tablet to the radio as an attempt to capture audio via the mic on the tablet with mountaintop wind noise would fail.

I ended up with the $40 WOLPHILINK interface that can be used with iOS, Android and Windows tablets, all via the 4 pin mic / speaker jack. Full TX/RX control via this one cable and interface between the CAT interface on the back of the radio. Very slick. This interface is very small, as in about the size of a 9v battery small.

So, I brought it all out here to Maine, and spent a few minutes in 34 degree weather getting it all setup.

Yaesu FT817 (non ND) 5w QRP
Buddistick antenna mounted on 4' tripod.
Nextbook Android 7" tablet
Droid PSK software
Wolphilink interface.

Now, it should be noted, this is a contest weekend, aka a lot of stations on the air running a lot of power, some of it not very clean. (Disadvantage)

Conditions were poor for 20m.
(Disadvantage)

I was operating at 5w, QRP level.
(Disadvantage)

I was operating with a "compromise" antenna 4' off the ground, right next to the side of the house.
(Disadvantage)

It was 33 degrees out setting this all up.. (BIG Disadvantage)

Yet with all these disadvantages..

First QSO: Cuba

Why did I bother composing this email? A lot of hams think that unless you have a beam or massive wire array or 700+ watts of power, "you can't" make contacts. My interest in ham radio in general is to experiment and learn. I had several things "against" me, from a compromise antenna, qrp power levels, and poor band conditions, but made contacts none the less. I am not the strongest signal by any means, yet having fun working stations. With some refinements I think this setup might be work packing and then humping up a mountain for some SOTA work.

So - anyone need Maine (FN54) on PSK31? I have time tomorrow (and tonight for that matter..)

Jay N1RWY/1

I wanted something small and lighter than my laptop - I ended up with a Walmart 7" Nextbook Android tablet for $65.
>
> Since I was thinking that I could use this for some SOTA activity as well, I knew I would need an interface to cable connect the tablet to the radio as an attempt to capture audio via the mic on the tablet with mountaintop wind noise would fail.
>
> I ended up with the $40 WOLPHILINK interface that can be used with iOS, Android and Windows tablets, all via the 4 pin mic / speaker jack. Full TX/RX control via this one cable and interface between the CAT interface on the back of the radio. Very slick. This interface is very small, as in about the size of a 9v battery small.
>
> So, I brought it all out here to Maine, and spent a few minutes in 34 degree weather getting it all setup.
>
> Yaesu FT817 (non ND) 5w QRP
> Buddistick antenna mounted on 4' tripod.
> Nextbook Android 7" tablet
> Droid PSK software
> Wolphilink interface.
>
> Now, it should be noted, this is a contest weekend, aka a lot of stations on the air running a lot of power, some of it not very clean. (Disadvantage)
>
> Conditions were poor for 20m.

> I was operating at 5w, QRP level.
> (Disadvantage)
>
> I was operating with a "compromise" antenna 4' off the ground, right next to the side of

the house.
> (Disadvantage)
>
> It was 33 degrees out setting this all up.. (BIG Disadvantage)
>
> Yet with all these disadvantages..
>
> First QSO: Cuba
>
> Why did I bother composing this email? A lot of hams think that unless you have a beam or massive wire array or 700+ watts of power, "you can't" make contacts. My interest in ham radio in general is to experiment and learn. I had several things "against" me, from a compromise antenna, qrp power levels, and poor band conditions, but made contacts none the less. I am not the strongest signal by any means, yet having fun working stations. With some refinements I think this setup might be work packing and then humping up a mountain for some SOTA work.

I am interested in doing it. I think it would be fun. Anyone else? Do we have a location in place, or should we make one? I've still got a bit of Utah blood left in my veins as well as my winter coats, gloves, and shopka (Russian winter hat). It's good enough to go up to the mountains of Utah and shoot guns in January when it's -10F. All this to say, I am happy to gather in a park, at the top of a mountain, or in a warm house.

3628. Hamfest

Yahoo group: Queen_Creek_Hams
Date: 2015-12-04 23:34:11 UTC
From: Tom Hurst
Topic: 1545 Message: 3628

Is anyone going to the hamfest tomorrow?

I'm not going to be able to make it if anybody's going and doesn't mind I need some duplexer cans or a duplexer for a VHF repeater installation I can go up to about $500 depending on what it is and the condition.

If anybody spots anything if they don't mind calling me and then I could talk to the seller about purchasing.

The help would be greatly appreciated I'm trying to put up a VHF system fusion repeater which to my knowledge would be the only one in the valley. The only other option I have at this point is switching to UHF where the duplexers are much cheaper but there are already I think like 4-5 fusion repeaters on UHF.

Thanks in advance for anyones help or taking the time to read this message.

3632. Thursday's QCECG Meeting

Yahoo group: Queen_Creek_Hams
Date: 2015-12-09 16:15:06 UTC
From: Joe Sammartino
Topic: 3632 Message: 3632

"All Things Digital"

The theme for Thursday's meeting is "all things digital" communications.

Here are the key objectives for this portion of the meeting:

1. Train members to experiment with digital modes on their own by helping members get their Windows laptops and Android devices setup with software and working sound interfaces.

2. Demonstrate end-to-end digital transmission of keyboard-to-keyboard, file, and image communications WITH AUDIENCE PARTICIPATION.

3. Discuss the application of digital communications to day-to-day amateur radio ops, emergency comms, and net communications.

We will have dual presentation projectors so that everyone can see the demonstration dashboards on each end of the transmission.

What to bring?

1. Bring your Windows laptop, net book, or tablet. The device should have built-in sound with on board microphone. If your laptop has a sound system but no built-in microphone, bring an external microphone that can plug in to the device.

2. Bring your Android based smart phone or tablet. This should be a relatively recent device and version of Android.

3. To ease downloading of the apps to your devices, bring a thumb drive that we can load up. If you don't have one, not to worry.

We are going to have some really great fun!

Joe, N2QOJ

3637. Follow-up to "All Things Digital"

Yahoo group: Queen_Creek_Hams
Date: 2015-12-15 16:13:06 UTC
From: Joe Sammartino
Topic: 3637 Message: 3637

First, thanks to everyone who came out to learn about the use of digital communications.

Here are some resources for your own follow-up learning and experimentation:

- Download AndFlmsg for your Android device <http://www.w1hkj.com/vk2eta/AndFlmsg-1.2.0.apk>

- The User Manual for AndFlmsg <http://www.w1hkj.com/vk2eta/AndFlmsg%20-%20Flmsg%20with%20Fldigi%20Modems%20on%20Android%20-%20User's%20Manual%20V-1.2.0.pdf>

- Very good Youtube video describing Fldigi and Flwrap setup and usage <https://youtu.be/bN2QPZZzkn4> - This video will get you up and running on a Windows device.

- Nice description of Amateur Radio digital modes with example sound clips <http://wb8nut.com/digital/>

- Nice and short PowerPoint presentation on digital modes by George Heron, N2APB <https://dl.dropboxusercontent.com/u/4721475/QCARC/QCECG/QCECG%20Meeting_12_10_2015/Introduction%20to%20Digital%20Modes.pps>

- ARRL's resource page for digital modes <http://www.arrl.org/digital-data-modes>

Regards,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 20 December 2015 06:00 AM to 10:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Adam Sallet, the TV reporter who saw the robber return to the scene of the crime on live TV has an Arizona connection.

His uncle, Tom Sallet (602-992-8188) is one of our local Amateur (HAM) TV operators here in the Phoenix area.

Tom's call sign is KE7QK and he can be seen most every Wed and Sun night on the W7ATN HAM TV repeater on the White Tanks Mountain west of Luke Field.

I'm not an expert but I play one - on HAM TV.
Bil Munsil
K1ATV HAM TV
Mesa AZ
Hams should be seen as well as heard.
More than 30 years on and off HAM TV in Arizona

Yahoo group: Queen_Creek_Hams
Date: 2015-12-30 18:41:31 UTC
From: Joe Sammartino
Topic: 3645 Message: 3646

Just some background on what that map is showing and how it gathered the data:

This map shows actual radio propagation from stations operated near 144 MHz. It uses data gathered by
Automatic Packet Reporting System-Internet Service <'http://www.aprs-is.net> (APRS-IS) from packet stations
<http://en.wikipedia.org/wiki/Automatic_Packet_Reporting_System> in the amateur radio service <http://en.wikipedia.org/wiki/Amateur_radio>.

The map shows activity that has happened in the past hour. Paths are combined to create color-coded
footprint indicating the distance VHF signals are likely to be traveling. Packet stations typically run
low power into small vertical antennas. Better equipped stations should exceed the the distances these
stations report. The map is updated automatically, typically several times per minute.

The map is created using positions (latitude and longitude) reported by nodes in the packet radio system
and the hops from node to node that the data travels. By correlating the hops with the position of each
end of the hop, the distance can be inferred.

The following is a typical packet that illustrates the process:

APN391,K0SUN-10,AI4GI-3,N5ALC-3*,qAS,KE5NOB:3916.93N09454.35WhPHG7330

In this packet, station STJOHN reports its position as 39 deg;16.93' north and 94 deg;54.35' west.
The packet took the path STJOHN, K0SUN-10, AI4GI-3, N5ALC-3. If we previously received and recorded the locations
of each of these stations, then we know the distance it traveled between each of the station pairs:

(STJOHN, K0SUN-10), (K0SUN-10, AI4GI-3), (AI4GI-3, N5ALC-3).

Errors can be present in the data used to create the map. Some stations operate on HF frequencies, which
result in much longer distances than VHF typically supports. Occasionally a packet radio station on a high
altitude balloon or satellite appear. Some stations incorrectly report their position, often by hundreds of miles,
causing local communication to be misrepresented.

3655. QCECG Meeting, Thursday, January 12th @ 7 PM

Yahoo group: Queen_Creek_Hams
Date: 2016-01-11 04:16:28 UTC
From: Joe Sammartino
Topic: 3655 Message: 3655

Folks,

At this month's meeting, we will have a presentation and a very comprehensive demonstration of ham radio mesh networking, also known as broadband hamnet.

You can do some advance reading here:

http://www.broadband-hamnet.org/

Brad, N7LZD, and Jay, N1RWY, will be the presenters and demonstrators. The demonstration will include a network of several nodes that you can access in real time with your own laptop, smart devices. So, please bring your laptops or smart device.

A broadband-hamnet mesh network allows hams to pass information, stream video/audio, connect to intranet email services, and much more - all at very fast speeds.

Regards,

Joe, N2QOJ

The Queen Creek Emergency Communications Group Monthly Meeting
Thursday, January 14th, 7 PM, Queen Creek Town Hall

Description:

For this month's meeting on Thursday evening, a couple of our members will be presenting Amateur Radio Mesh Networking, aka Broadband Hamnet, and demonstrating such a network. Some background information here <http://www.broadband-hamnet.org/>.

They will demonstrate a working multi-node net with IP telephony, real-time streaming video, and email service through MS small business server. Our members have been asked to bring their laptop and smart devices so they could connect as part of the demonstration. The mesh hardware will consist of UBIQUITI Bullet devices and CISCO/Linksys devices with MS SB Server.

Brad Heck, N7LZD, and Jay Baach, N1RWY will be your presenters.

Dennis, KF7RYX, and Ron, K7RWE, of QCECG will be your hosts for this OPEN meeting.

*Directions at www.qcecg.org <http://www.qcecg.org> or this link <http://www.mapquest.com/maps?2a=22350+S+Ellsworth+Rd&2c=Queen+Creek&2s=AZ&2z=85242-9311> . . . *

3661. K2 Energy Lithium Iron Phosphate Batteries

Yahoo group: Queen_Creek_Hams
Date: 2016-01-17 09:20:40 UTC
From: thomasinaz@...
Topic: 3661 Message: 3661

Hi Everyone,

I've received my first shipment from from K2. I have two stores setup. The link below is for ebay.

K2 http://www.ebay.com/cln/tom_grey/k2/267613723013

http://www.ebay.com/cln/tom_grey/k2/267613723013

K2 http://www.ebay.com/cln/tom_grey/k2/267613723013 collection created by tom_grey

View on www.ebay.com http://www.ebay.com/cln/tom_grey/k2/267613723013
Preview by Yahoo

If interested contact me, I'll offer a club discount and explain on how to apply it to ebay upon checkout.

If you haven't heard of these yet as a quick comparison a 12.8v 9.6Ah LiFePO4 battery is approx 50% lighter and has 25% more power than a standard 12v 7Ah SLA Battery and can put out a higher amperage cable of running 25-50 Watt radio.

The 12.8v batteries have a battery management system built in so you can hook them directly to a solar panel and your radio.

The 3.2v cells are great for making packs for cell phones, tablets, HT's, etc.

The datasheets will be in the files section also which break down min / max values, cycle life and the rest of the pertinent details.

Thanks,

Tom Hurst

East Valley Repeater Group reminder
When: Monday, 18 January 2016 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3679. Tower in Maricopa County

Yahoo group: Queen_Creek_Hams
Date: 2016-01-26 03:21:33 UTC
From: w6ocl@...
Topic: 3679 Message: 3679

Are there any hams which live in a Maricopa county island which have recently installed an tower? I've applied for a permit to install my 72' tower with my 4 element SteppIR and was declined due to the turning radius of the antenna and how it encroaches into the setback regions.

I'm interested in knowing what others have gone through and whether anyone has been successful.

thanks,
O.C - W6OCL

-7.6

-13? http://www.heavens-above.com/images/moon-icon.png

By comparison, for those who have seen and wondered at
a ISS pass, the ISS is seldom brighter than -3.

Using this scale, a difference of 1 indicates an
apparent brightness of 2.5 times. Thus a -4 is 2.5 times the brightness
of a -3. So a -7.5 is really bright.

The flares are very brief, perhaps 15 seconds. So set
your watches accurately.

From: Jim KF7E
Topic: 3684 Message: 3688

I pulled them about 3PM today. SHould make no difference since the
ephemeris didn't chande.

Maybe a slight difference in location?

Ill have a look tomorrow.

3690. Re: [Queen_Creek_Hams] Iridium flares [1 Attachment]

Yahoo group: Queen_Creek_Hams
Date: 2016-01-27 02:50:16 UTC
From: Jim KF7E
Topic: 3684 Message: 3690

Not sure what lat/long you used but the 'distance to flare center'
is different. With the small reflecting surfaces that create these
flares (about the size of the side of a phone booth), a 6 KM difference
in location can make a big difference.

Here is a table for tomorrow night, for the default Queen Creek
lat/long:

Flare Details
Date: 27 January 2016
Time: 19:18:57
Brightness: -8
Altitude: 35°
Azimuth: 169°
Satellite: Iridium 81
<http://www.heavens-above.com/satinfo.aspx?satid=25468&lat=33.2487&lng=-111.6343&loc=Queen
+Creek&alt=428&tz=Arizona>

Distance to satellite: 1245 km
Angle off flare centre-line: 0.0°
Distance to flare centre: 1 km
Flare producing antenna: right
Sun altitude: -18.0°
Angular separation from Sun: 100.3°

-2.2

3691. Re: [Queen_Creek_Hams] Iridium flares

Yahoo group: Queen_Creek_Hams
Date: 2016-01-27 03:52:46 UTC
From: Arturo G Codina
Topic: 3684 Message: 3691

That's a very good point. I did it quickly on my phone and just chose Phoenix so you're probably right. Iridium flares do have a fairly small footprint. I just redid the query and the magnitude is much higher now for tomorrow's flare (-6.4 compared to your -7). My house is in SE Gilbert close to the QC boundary so that probably accounts for the minor difference.

Hopefully I can see it tomorrow! I missed it today by a minute or so.

3693. Re: [Queen_Creek_Hams] Iridium flares

Yahoo group: Queen_Creek_Hams
Date: 2016-01-28 03:56:18 UTC
From: Jim KF7E
Topic: 3684 Message: 3693

It was right on time (thanks to those that 'fly' the birds), but it did not seem as bright as -7. But considering the size of the reflective panel (about 74" x 34") and and an altitude of about 485 mi, I am always impressed.

The visibility 'footprint' is only about 30 miles wide.

3694. Re: [Queen_Creek_Hams] Iridium flares

Yahoo group: Queen_Creek_Hams
Date: 2016-01-28 04:05:36 UTC
From: Arturo G Codina
Topic: 3684 Message: 3694

I brought my four year old outside to watch it and all he could say was, "WHOOOOAAAAAA!!!"

It was pretty bright but like you said, definitely not a -7.

Sent from my iPhone

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 5 minutes.

It won't be at a very great height above but you should be able to see it
well enough at 47 max degrees elevation unless there is cloud coverage.

Time: Sun Jan 31 6:52 PM
Visible: 5 min, Max Height: 47°
Appears: 10° above SSW (from 206 degrees)
Disappears: 23° above ENE (toward 68 degrees)

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

3702. QCECG Meeting Dates and Locations

Yahoo group: Queen_Creek_Hams
Date: 2016-02-01 02:40:59 UTC
From: Joe Sammartino
Topic: 3702 Message: 3702

Folks,

The QCECG <http://www.qcecg.org> monthly meetings are held on the second Thursday of the month.

We normally meet in the large room known as the "Town Hall Founders' Room" in the Town Hall Building.

This year, several of the meetings will be held at other locations. You will find below a schedule of dates and locations for this year's meetings:

Date, Location

January 14, Town Hall Founders Room

February 11, Town Hall Founders Room

March 10, Queen Creek Library Zane Gray Room

April 14, Town Hall Council Chambers

May 12, Town Hall Founders Room

June 9, Town Hall Founders Room

July 14, Town Hall Founders Room

August 11, Queen Creek Library Zane Gray Room

September 8, Town Hall Founders Room

October 13, Town Hall Founders Room

November 10, Town Hall Founders Room

December 8, Town Hall Founders Room

3715. RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP

Yahoo group: Queen_Creek_Hams
Date: 2016-02-12 06:33:52 UTC
From: Joe Sammartino
Topic: 3257 Message: 3715

RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB (7.158 Mhz also)
- and replicate this recipe several times over in the Valley at the same time

What is the objective?

- Engage in as many contacts as possible across the Valley using a VHF simplex frequency of 146.460 Mhz. while operating off grid power, If possible.

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio while exercising emergency communications via simplex and off-grid.

Where and When? (Queen Creek and Mesa)

February 13th, From 10 AM (10:00) till 2 PM (14:00).

We have two local RUSS / RITP planned. Dennis, KF7RYX, will host his event at the ball field pavilion behind the Queen Creek West Stake Center (19730 East Ocotillo Road) located near the intersection (just West) of Hawes Road

and Ocotillo Road.

BONUS: VE Testing will be provided from 11 AM till 1 PM

If you are looking for an event to visit closer to Mesa, Doug, WB7TUJ, will host RUSS / RITP in Mesa at Emerald Park.

If you can't visit the sites, please check in via the frequencies listed above.

Here is a link <http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600> to a map of both locations:

ISS HamTV used for school contact
The UK Space Agency noted that the HamTV Digital Amateur Television (DATV) transmission by Tim Peake GB1SS from the ISS was a 'World First'

On Thursday, February 11, 2016, at approximately 18:11 UT, an ARISS contact took place between UK astronaut Tim Peake GB1SS and students at the Royal Masonic School for Girls GB1RSM in Rickmansworth, Herts.

The ARISS team of licensed UK Radio Amateurs achieved a world first by receiving live video from the ISS during the contact. Using the HamTV transmitter, which has recently been commissioned on board the ISS, Tim Peake was the first astronaut to use this equipment during a two way schools contact.

As well as building a vehicle based HamTV receive system, which was installed at the school on the day of the contact, the ARISS UK team also installed equipment at the Goonhilly Earth Station in Cornwall to receive the 2395 MHz HamTV transmissions from the ISS, this was then streamed via the web to the school.

On the Expert Panel at the historic contact were Libby Jackson of the UK Space Agency, Sian Cleaver of Airbus, Frances Wray of QinetiQ, Stephanie Fernandes Engineering Skills Policy Specialist at the IET, Matt Cosby of QinetiQ and Chris Bridges 2E0OBC of the Surrey Space Centre.

3719. Queen Creek Emergency Communications Group Net, Sunday, 14 February 2016

East Valley Repeater Group reminder
When: Monday, 15 February 2016 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 449.825 (-) PL 100

Notes: We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

3721. Arizona Emergency Net - Maricopa, Monday, 15 February 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-02-15 15:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3721 Message: 3721
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 15 February 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3722. I have free TVs

Yahoo group: Queen_Creek_Hams
Date: 2016-02-19 04:30:20 UTC
From: Joe Sammartino
Topic: 3722 Message: 3722

Folks,

Before I get rid of 3 analog TVs, 19-20 inch units, I wanted to see if anyone needed them for anything. Yes, they work. You never know!

They are free for the taking. Or, they are on the curb March 1st for bulk pick-up.

Regards,

Joe, N2QOJ

I use a Pactor modem I bought in 2002 or so. Did you use the "F8" key, or propagation table from the "View" drop down list? I found that when helping a lot of people cruising that they are not use this tool. Without it, it's VERY hard to make contacts. GregGreg & Jill Delezynski S/V Guenevere

From: Scott Reeves
Topic: 3722 Message: 3732

I need to put up some antennas at my new place. Anybody got a 40ft ladder I can borrow?

Thanks!

Scott

3733. Queen Creek Emergency Communications Group Net, Sunday, 21 February 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-02-22 02:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3733 Message: 3733
Attachments: 1 described; binary payloads are missing from this source WARC

Queen Creek Emergency Communications Group Net reminder
When: Sunday, 21 February 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 449.325 (-) PL 100, 449.325 Simplex if Repeater Fails

Notes: The Queen Creek Emergency Communications Group will hold its weekly radio net Sunday evening at 2100 hours (9:00 PM). All are welcome to check-in on the first Sunday of the month. Only Regional Net NCS are required on all other Sundays of the month. The acting Net Control Station (NCS) will usually be announced in advance.

3734. Arizona Emergency Net - Maricopa, Monday, 22 February 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-02-22 15:55:04 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3734 Message: 3734
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 22 February 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3735. San Tan Valley System Fusion Repeater

Yahoo group: Queen_Creek_Hams
Date: 2016-02-23 05:22:08 UTC
From: thomasinaz@...
Topic: 3735 Message: 3735

Hi everyone,

I have my repeater up and was wondering if anyone could try and get in. I have it hooked up to my only antenna and I also want to see how far out people can get in.

Output Freq: 145.170
Input Freq: 144.570

Pl 77.0

If your able to hit it or hear the station ID I would be great full if you could respond with your location and tx power. Once everything up and running good I will increase the output power and please feel free to use it. Its currently set at a 1 min tot and it's rated for continuous duty. I will have battery and solar backup hooked up after I get the verification done.

Thanks to anyone who's able to help me verify the operation and approx range.

Tom, is it digital only? I was not able to raise your repeater. Antenna is probably 35 feet up and I'm running 50 watts. Hmmm.

Bruce

Hi Bruce,

It was keying up a few minutes ago but didn't hear any audio. It's set to auto analog / digital so it will match whatever it receives. I'd have to look on the map. Not sure if there is terrain between us. If you have a chance to try again in the next 20-30min I'll keep an eye on the display to see signal strength. I'll turn the sql down some also.

3740. Special Meeting of RECON (Radio Communication Operation Network), Tonight

Yahoo group: Queen_Creek_Hams
Date: 2016-02-28 16:46:35 UTC
From: Joe Sammartino
Topic: 3740 Message: 3740

The Tri-Stake Emergency Preparedness Group consisting of Higley, Williams Field, and San Tan Lakes Stakes of the LDS Church is hosting this first monthly meeting of RECON.

All members of QCECG are invited. Dennis and I will be in attendance this evening and we ask for those who can to please attend as well.

Thanks, Joe, N2QOJ

Here are the details: *Talk-in 147.52 simplex*

The RECON Team (Radio Emergency Communication Operations Network) invites you to attend the first monthly Community EmComm meeting to be held Sunday 2/28/16 at 7pm in the Higley Stake Center of the Church of Jesus Christ of Latter-day Saints, 1865 S Higley Rd, Gilbert, AZ <https://www.google.com/maps/place/1865+S+Higley+Rd,+Gilbert,+AZ+85295/@33.3150375,-111.7224207,17z/data=!3m1!4b1!4m2!3m1!1s0x872bac498f6f781d:0x86994cbaecd27674?hl=en> 85295, on Higley Road south of Ray Road and across from the Williams Field High School. It is hosted by the Tri-Stake Emergency Preparedness Group consisting of the Higley, Williams Field, and San Tan Stakes of the LDS Church. This is an interactive community meeting intended for anyone in our community who might be interested in Ham radio.

This will be a monthly meeting where we discuss ham radio service opportunities and other ham-related topics, so that we can get to know each other as a community, get new hams on the air, and keep everyone radioactive. We're inviting many brand-new hams to these meetings, but we're planning to present topics that will be interesting to hams of all experience levels.

This month, we'll have Steve Petrie (K7DAD) speak to us about regional ham radio operations, and the role of an individual ham station in large-scale emergencies. It is his callsign that we hear announced from the two open repeaters at the Bishop’s Storehouse. The VHS repeater is 146.720, minus offset, PL tone 100.0. The UHF repeater is 449.375, minus offset, PL tone 100.0. We will meet in the Relief Society room of the Higley Stake Center as detailed above. Please help us get the word out to others in your circle of influence. You may forward this email to anyone in the community.

Please direct questions to Alan Broadbent KF7TPF, the EmComm Specialist for the Higley Stake. We hope to see a lot of you at our first meeting. Your suggestions will help us develop this meeting as it evolves over the next several months.

Alan Broadbent KF7TPF

3741. QCECG ID Badges

Yahoo group: Queen_Creek_Hams
Date: 2016-02-28 17:57:50 UTC
From: Joe Sammartino
Topic: 3741 Message: 3741
Attachments: 1 described; binary payloads are missing from this source WARC

To all QCECG members, active and non-active:

In preparation for new and updated ID Badges, please provide an updated photo.

It should be a portrait shot of head and shoulders. Send the image to me directly. Follow these guidelines:

IMPORTANT

1. If you have an ID badge and are no longer interested to be an active member of QCECG, then you should turn in the badge to me. Contact me at 480-270-4563 and I will arrange to pick-up / drop-off etc.

2. If you are an active member with a CURRENT ID badge, do nothing.

3. If you are an active member but need an updated ID badge, tell me and send a new photo image ONLY if you want to change your present photo.

4. CURRENT = Valid by Date, "needs to be updated" means it is has an expired date

5. I've attached an example photo.

Please send me your photo images by 3/4/16 or sooner.

Joe Sammartino

3742. Spring Into Queen Creek Event, Saturday, March 19th

Yahoo group: Queen_Creek_Hams
Date: 2016-02-28 18:14:42 UTC
From: Joe Sammartino
Topic: 3742 Message: 3742

Ladies and Gentlemen of QCECG:

We are needed again!

QCECG has received a request from our Emergency Management Officer, Joe LaFortune, for volunteers to assist with communications and the shuttle buses for the Spring Into QC <http://queencreek.org/departments/parks-recreation/special-events/spring-into-qc> event on *Saturday, March 19, 2016*. Volunteers will be needed from *9 a.m. - 3 p.m*.

Here is a link to the Spring Into QC <http://queencreek.org/departments/parks-recreation/special-events/spring-into-qc> event
page on the Town's website.

Recreation Services will employ three (3) shuttle buses to move citizens from the parking area at the Library to the event at Desert Mountain Park (DMP).

We will need the following volunteers:

One (1) QCECG at the Library parking location to communicate with the shuttle buses.
One (1) QCECG member *on each bus (x3)* to communicate with the parking and event locations.
Two (2) QCECG members at the Library parking location to assist with parking, guide people to the shuttle bus pick up/drop off location.
Two (2) QCECG members at the Desert Mountain Park location to assist with loading and unloading the shuttle bus pick up/drop off location.

We would like to operate two shifts of at least 8 volunteers each:

1st Shift: 9 a.m. - Noon

2nd Shift: Noon - 3 p.m.

In addition to the volunteers, we will need to assign a QCECG coordinator for each shift.

Here are some details for the event:

1. Meeting Location

Recreation Annex
<https://www.google.com/maps/place/21802+S+Ellsworth+Rd,+Queen+Creek,+AZ+85142/@33.2503019,-111.6376619,17z/data=!3m1!4b1!4m2!3m1!1s0x872a4d3c3ab79273:0x2627f11c862d85ca?hl=en>
21802 S. Ellsworth Road

It is located on the southeast corner of the Queen Creek Library.

2. The Parks Division will provide an ice cooler with water at the shuttle bus pick-up/drop-off location.

3. Queen Creek Fire and Medical Department will provide snacks.

4. If there is a "script" available from the Parks Division, it will be provided and will describe all of the events and information that we may need to answer for the public.

5. Will will have a Parks Division Point of Contact.

6. We will let you know in advance if the Parks Division will be providing lunch for the volunteers.

7. If you are not a member of QCECG but would still like to volunteer, contact me directly.

Please check your schedules and respond with your availability ASAP to me directly at the email address below or qcecgaz@....

Thank you,

Joe, N2QOJ

3746. Arizona Emergency Net - Maricopa, Monday, 29 February 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-02-29 15:55:04 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3746 Message: 3746
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 29 February 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Brad,

I am the very same. I finally got my call sign last friday. I'm quite excited about it. I am pretty much on the Ocotillo repeater all day. When at work, it's a little difficult to talk but I still have my radio on. Did DJ get that merit badge counselor training set up?

Thank you,

Cameron

Welcome to the world of ham radio :0
Joe Sammartino is the one to contact about becoming part of QCECG. He monitors this yahoo group often so he'll probably pick up on this, but if not, his email is jsammartino@... I'm sure you could contact him directly. My email is qcsbrad@... so feel free to contact me too.
Be sure to check in this coming Sunday night on the Ocotillo repeater at 9:00 PM for the QCECG net. When they ask for stations reporting from region/district 5, call in then following the pattern you will observe.
Good luck, 73s and hope to hear you Sunday night!
Brad

Topic: 3741 Message: 3751

We are getting a new HAM TV repeater at Culver and Hawes here in Mesa.

Here are the current HAM TV repeaters in Arizona
http://azrepeaters.net/index.php?n=RepeaterMaps.ATV
http://azrepeaters.net/index.php?n=RepeaterMaps.ATV

If anyone would like more information concerning Fast Scan Amateur Television drop me a line off list.

I'm not an expert but I play one - on HAM TV.
Bil Munsil
K1ATV HAM TV
Mesa AZ
wmunsil@cox.net
Hams should be SEEN as well as heard.
More than 30 years on and off HAM TV in Arizona.

PS - Future plans are to link into the ATN-CA network in SoCal.

Hi Terry,

Congratulations on receiving your license.

This ID Badge is for the Queen Creek Emergency Communications Group - see www.qcecg.org.

If you would like to become a volunteer, fill out the attached membership request form and return it to me.

Regards,

Joe, N2QOJ

International Space Station visible this morning...

Folks,

Good news! Another opportunity to spot the station Friday morning for 5 minutes. You should be able to see it well enough at 60 max degrees elevation.

Time: Fri Mar 04 6:04 AM
Visible: 5 min
Max Height: 60°
Appears: 11° above SW (from 225 degrees)
Disappears: 25° above ENE (toward 68 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

Joe,
Do you still need volunteers? I would like to help in some way even though I still do not know my radio.

Chuck KF7WMR

On Sunday, February 28, 2016 11:15 AM, "Joe Sammartino jsammartino@... [Queen_Creek_Hams]" <Queen_Creek_Hams@yahoogroups.com> wrote:

  Ladies and Gentlemen of QCECG:
We are needed again!

QCECG has received a request from our Emergency Management Officer, Joe LaFortune, for volunteers to assist with communications and the shuttle buses for the Spring Into QC event on Saturday, March 19, 2016. Volunteers will be needed from 9 a.m. - 3 p.m.
Here is a link to the Spring Into QC event page on the Town's website.
Recreation Services will employ three (3) shuttle buses to move citizens from the parking area at the Library to the event at Desert Mountain Park (DMP).
We will need the following volunteers:
One (1) QCECG at the Library parking location to communicate with the shuttle buses.One (1) QCECG member on each bus (x3) to communicate with the parking and event locations.Two (2) QCECG members at the Library parking location to assist with parking, guide people to the shuttle bus pick up/drop off location.Two (2) QCECG members at the Desert Mountain Park location to assist with loading and unloading the shuttle bus pick up/drop off location.

We would like to operate two shifts of at least 8 volunteers each:
1st Shift: 9 a.m. - Noon
2nd Shift: Noon - 3 p.m.
In addition to the volunteers, we will need to assign a QCECG coordinator for each shift.
Here are some details for the event:

1. Meeting Location
        Recreation Annex   21802 S. Ellsworth Road
        It is located on the southeast corner of the Queen Creek Library.
  2. The Parks Division will provide an ice cooler with water at the shuttle bus pick-up/drop-off location.

3. Queen Creek Fire and Medical Department will provide snacks.
4. If there is a "script" available from the Parks Division, it will be provided and will describe all of the events and information that we may need to answer for the public.
5. Will will have a Parks Division Point of Contact.
6. We will let you know in advance if the Parks Division will be providing lunch for the volunteers.
7. If you are not a member of QCECG but would still like to volunteer, contact me directly.
Please check your schedules and respond with your availability ASAP to me directly at the

email address below or qcecgaz@....
Thank you,
Joe, N2QOJ

3767. Arizona Emergency Net - Maricopa, Monday, 14 March 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-03-14 15:55:23 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3767 Message: 3767
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 14 March 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3768. Spring Into Queen Creek Event - Saturday, March 19th

Yahoo group: Queen_Creek_Hams
Date: 2016-03-15 19:38:17 UTC
From: Joe Sammartino
Topic: 3768 Message: 3768

Thank to those who have volunteered.

We still need to fill 2-3 assignments per shift.

These assignments are for guiding and assist with loading of bus passengers.

Please consider volunteering your services for this event. Send your
private email to me at:

jsammartino@... or qcecgaz@...

Thank you,

Joe, N2QOJ

3769. "Spring Into Queen Creek" Event, Saturday, March 19th

Yahoo group: Queen_Creek_Hams
Date: 2016-03-16 07:34:25 UTC
From: Joe Sammartino
Topic: 3769 Message: 3769

Hello Volunteers!

We have now filled all the assignment slots to support the event on Saturday.

However, if you have never volunteered for such an event and you would still like to participate, let me know. We can always pair you up with a volunteer so you can learn the ropes.

Regards,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 20 March 2016 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

A great rig for mobile, General HF or digital work. Mine has seen duty is the truck, portable out and about at RUSS style events. Field Day, VHF contests, and now has worked all 50 states and 70 countries at a whopping 8w on JT65 sitting in the shack.

Easy to use, and Joe even has the slick upgraded hand mic for it.

Great rig.

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 4 minutes

It won't be at a very great height above but you should be able to see it
well enough at 49 max degrees elevation as long as there are no clouds.

Time: Fri Apr 01 7:19 PM
Visible: 4 min
Max Height: 49°
Appears: 38° above W (from 270 degrees)
Disappears: 11° above NE (toward 45 degrees)

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

3792. Arizona Emergency Net - Maricopa, Monday, 04 April 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-04-04 15:55:04 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3792 Message: 3792
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 04 April 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Jay Baack
Topic: 3795 Message: 3796

I have not used one, however have done a ton of research on the antenna as it is a very popular SOTA , RUSS style antenna.

Very easy to setup on a tripod, and "hears" about as well as the MP1 without the need for radials. It does need to be peaked for QSY changes in the same band.

Several SOTA folks swear by them.

3800. New 10 Meter Repeater in Tucson

Yahoo group: Queen_Creek_Hams
Date: 2016-04-11 06:37:29 UTC
From: Joe Sammartino
Topic: 3800 Message: 3800

Do you have 10 Meter capability? If so, the Radio Society of Tucson is sponsoring a new 10 Meter repeater at 29.670 Mhz with PL of 110.9 Hz. Don't forget the minus 100Khz offset. Report back to the Group with your experience with it.

It presently has an EIRP <http://www.csgnetwork.com/antennaecalc.html> of 50 watts but will soon be upgraded to an effective 200 watts.

Thanks to KD7UIZ for providing this information.

Regards,

Joe, N2QOJ

3801. RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP, April 16th

Yahoo group: Queen_Creek_Hams
Date: 2016-04-11 06:46:22 UTC
From: Joe Sammartino
Topic: 3801 Message: 3801

RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB (7.158 Mhz also)
- and replicate this recipe several times over in the Valley at the same time

What is the objective?

- Engage in as many contacts as possible across the Valley using a VHF simplex frequency of 146.460 Mhz. while operating off grid power, If possible.

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had many of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio while exercising emergency communications via simplex and off-grid.

Where and When? (Queen Creek and Mesa)

April 16th, From 10 AM (10:00) till 2 PM (14:00).

We have two local RUSS / RITP planned. Dennis, KF7RYX, will host his event at the ball field pavilion behind the Queen Creek West Stake Center (19730 East Ocotillo Road) located near the intersection (just West) of Hawes Road

and Ocotillo Road.

If you are looking for an event to visit closer to Mesa, Doug, WB7TUJ, will host RUSS / RITP in Mesa at Emerald Park.

If you can't visit the sites, please check in via the frequencies listed above.

Here is a link <http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600> to a map of both locations:

3803. RECON Community EmComm meeting Sunday evening April 24th at 7pm

Yahoo group: Queen_Creek_Hams
Date: 2016-04-13 15:46:46 UTC
From: Joe Sammartino
Topic: 3803 Message: 3803

Question: "What is the most reliable direct communications over a 200 mile radius?"

Answer: Find out April 24th!

Context: Not all repeaters have indefinite backup power or any backup power at all. Competing for repeater access in a real regional emergency may become impossible or full of delays. Reliable, direct communication via voice and data is already here and not dependent on any infrastructure or third party relay/repeater.

Please attend the RECON Community EmComm meeting Sunday evening April 24th at 7pm in Relief Society room of the Higley Stake Center, 1865 S Higley Rd, Gilbert, AZ 85295, on Higley Road south of Ray Road and across from the Williams Field High School.

Joe Sammartino N2QOJ <http://www.n2qoj.com> from Queen Creek Emergency Communications Group <http://www.qcecg.org> will teach us about NVIS for EmComm in emergency situations. This meeting is open to anyone in the community. We have invited several CERT EmComm groups and you may invite anyone else that you want.

We'll see you on the 24th.

Rick WG7V

Radio Under Sun Shade / RITP reminder
When: Saturday, 16 April 2016 10:00 AM to 02:00 PM
(GMT-07:00) Arizona

Where: Queen Creek and Mesa, 146.460 Mhz

Notes: Go off the grid and participate in contacting other hams via simplex. This exercise helps us sharpen our field radio skills and maintain our equipment. *Here is a link to a map of both locations:*

http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600

Dennis, Kf7RYX, hosts the Queen Creek location and Doug, WB7TUJ, hosts the Mesa location.

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 17 April 2016 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

3809. Where to Find Repeaters and other Frequencies

Yahoo group: Queen_Creek_Hams
Date: 2016-04-19 15:20:48 UTC
From: Joe Sammartino
Topic: 3809 Message: 3809

Hello Folks:

During our last QCECG meeting, we reviewed some interesting web sites that could help you plan a radio active road trip, a visit to another area, or just satisfy that terminal condition we call ham radio curiosity. Give these web sites a try:

www.azfreqcoord.org - The official frequency coordination organization for our area. Good band plans and up to date repeater database. Each band listing can be downloaded as a PDF file.

www.azrepeaters.net - Very good source of repeater and linked system information for our area. Also has some good new ham reference material. Recommended.

www.k5ehx.net - Not very user friendly but interesting. Can plot driving routes with repeaters and has calculated propagation charts for some repeaters. Look in the top right corner of the default map for the little floating "menu" button then select the "road" symbol to start your route research.

www.repeaterbook.com - Has phone apps. Good reference source. Their description: "We have comprehensive repeater data for repeaters utilizing IRLP, Echolink, AllStar, WIRES, D-Star, DMR, NXDN, Yaesu System Fusion, and P-25. This is your one-stop shop for repeater data. We cross-reference EchoLink, IRLP, and AllStar status and offer many export functions for Google Maps, Google Earth, Excel, CHIRP, G4HFQ, RT Systems, Kenwood, and other programming software platforms."

www.artscipub.com <http://www.artscipub.com/repeaters/> - They sell a repeater map book too. You can sort lists by each column. Dependent on user support.

<goog_1222803858>
www.radioreference.com <http://www.radioreference.com/apps/db/> - This is the worst for Amateur Radio listings but the excellent standard for public safety, government and other non-amateur frequency reference. Has excellent free phone apps for monitoring streaming audio from all over the country. Our own Ocotillo Repeater, QC Repeater, and local 146.500 MHz simplex activity is streamed from this site at http://www.broadcastify.com/listen/feed/10544/web/?rl=rr . Enjoy!

Some of these sites offer a free membership which gives you additional features. Some require a paid membership for more in-depth features. You can do very without paying a dime.

Regards,

Joe, N2QOJ

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 4 minutes.
It will be at a very good elevation for viewing, 71*°!*

Time: Tue Apr 19 7:45 PM
Visible: 4 min
Max Height: 71°
*Appears: 36° above WNW (**from 293 degrees)*
*Disappears: 12° above SE **(**from 135 degrees)*

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

3815. Arizona Emergency Net - Maricopa, Monday, 02 May 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-05-02 15:55:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3815 Message: 3815
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 02 May 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Very likely it is illegal to hold it in front of your face. Must read the RF exposure rules more carefully. I think here is an exemption for low power HT radios of the 5W category.

If you are up at 4:30 AM in the morning this message is for you!!

International Space Station visible tonight (early morning)

Folks,

Good news! Another opportunity to spot the station tonight (tomorrow) for 4 minutes. It will be at a good height above and you should be able to see it well enough at 65 max degrees elevation.

Time: Sun May 08 4:38 AM
Visible: 4 min
Max Height: 65°
Appears: 19° above WSW (from 248 degrees)
Disappears: 27° above NNE (from 23 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3825. QCARC Breakfast - Flight Deck Cafe

Yahoo group: Queen_Creek_Hams
Date: 2016-05-11 15:50:11 UTC
From: Joe Sammartino
Topic: 3825 Message: 3825

Folks,

This month's QCARC breakfast will be at Flight Deck Cafe. This will be the last breakfast we have at the Cafe. I hope we will have a great turnout.

The Flight Deck Cafe will close its doors for the last time on Sunday, May 15th.

We normally schedule our breakfast for 8 am till whenever.

Please send to me your suggestions for our next breakfast meeting location.

Hope to see you there,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling reminder
When: Sunday, 15 May 2016 05:00 AM to 09:30 AM
(GMT-07:00) Arizona

Where: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes: Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

We invite you to attend our RECON Community EmComm meeting this Sunday 5/22/16 at 1900 in the Relief Society room of the Higley Stake Center. This is a broadcast message going to municipalities, groups, and individuals including new Hams. Everyone is invited. Group leaders, please forward this message to your group membership.

Dennis Lawrence KF7RYX from the Queen Creek ERC will present. He shares the following about his presentation *When the Lights Go Out*:

"Today we depend on electrical power for just about everything. In fact just about everything will stop working without electricity. While we cannot do much about everyone else, we have options. The presentation will focus on some of those options with an emphasis on power for Ham Radios. However, the power for your radio can power other things as well. We will be discussing Battery power, Generators, and Solar. One of the big questions I get asked about solar is “how many panels do I need”? My answer is “I have no idea”. The information we will discuss in the meeting will give you a much better idea as to how many panels you will need, and batteries or generator."

The Higley Stake Center is at 1865 S Higley Rd, Gilbert, AZ 85295, on Higley Road south of Ray Road and across from the Williams Field High School. Hope to see you there.

Announcement From Dave Martin, AC7FF ------ Joe, N2QOJ

APRS Beacon @
http://aprs.fi/#!mt=hybrid&z=19&call=a%2FRITP_DM&timerange=3600&tail=3600

Greetings All,

We will be doing our weekly Radio's In the Park this coming Wednesday evening starting at around 17:00hrs and going until we either get tired or kicked out of the park.

We usually have 3 stations set up 1 SSB, 1CW and 1 Digital station set up. Feel free to bring your own station and set up to get on the air. The weather is supposed to be a little cooler this week. I will bring and ice chest full of cold water.

Please feel free to bring what you would like and come hang out with us awhile. The only thing I would ask you to bring is a chair if you have one.

We will be in the very back of Desert Mountain Park next to the restroom. Hope to see you there on Wednesday evening.

73

3844. Arizona Emergency Net - Maricopa, Monday, 16 May 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-05-16 15:55:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3844 Message: 3844
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 16 May 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Tycallsky
Topic: 3846 Message: 3853

Thomas (and all),

We meet at Desert Mountain Park on the corner of Haws and Ocotillo most Wednesday's at around 4:30 or 5:00pm. We are usually there until the park closes (around 10:00pm). Feel free to bring your radios and set up. Your also welcome to use one of our radios if you would like.

If you are interested in coming, let me know. I will add you to an email group to let you know of we will be meeting, and any other special considerations (I.e. Announcements for other local events, or to let you know if the event won't be taking place that week.) we send an email out on Sunday's, generally.

Many people in the group enjoy QRP (low power- 5 watts or less) and CW (morse code). We call ourselves the East Valley QRP group, though we are not excluding people who want to use more power.

Feel free to come out and learn about solar, digital, CW, QRP, antennas, radios, batteries, contesting, etc. I was pleased so see a lot of people showing up last Wednesday, because it creates a huge pool of knowledge and experience that new hams can learn from.

Last thing, I promise. One of the founding members, Dave AC7FF, is a field examiner, so we can offer testing for licensure and upgrades, if you are interested.

We hope to see you there,

Tyler - Af7VP

3857. Fwd: When the Lights Go Out

Yahoo group: Queen_Creek_Hams
Date: 2016-05-22 16:57:17 UTC
From: Joe Sammartino
Topic: 3841 Message: 3857

We invite you to attend our RECON Community EmComm meeting this Sunday 5/22/16 at 1900 in the Relief Society room of the Higley Stake Center. This is a broadcast message going to municipalities, groups, and individuals including new Hams. Everyone is invited. Group leaders, please forward this message to your group membership.

Dennis Lawrence KF7RYX from the Queen Creek ERC will present. He shares the following about his presentation *When the Lights Go Out*:

"Today we depend on electrical power for just about everything. In fact just about everything will stop working without electricity. While we cannot do much about everyone else, we have options. The presentation will focus on some of those options with an emphasis on power for Ham Radios. However, the power for your radio can power other things as well. We will be discussing Battery power, Generators, and Solar. One of the big questions I get asked about solar is “how many panels do I need”? My answer is “I have no idea”. The information we will discuss in the meeting will give you a much better idea as to how many panels you will need, and batteries or generator."

The Higley Stake Center is at 1865 S Higley Rd, Gilbert, AZ 85295, on Higley Road south of Ray Road and across from the Williams Field High School. Hope to see you there.

3863. Arizona Emergency Net - Maricopa, Monday, 23 May 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-05-23 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3863 Message: 3863
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 23 May 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

The June edition of the Arizona Desert Air Waves (ADAW) is attached for your reading enjoyment.

Also, check out the Arizona Radio Council of Arizona website at:

http://www.arca-az.org/

I think you will find that website to be interesting and full of useful information.

Enjoy!

3875. Upcoming Fema Exercise will Utilize WinLink

Yahoo group: Queen_Creek_Hams
Date: 2016-05-31 13:27:58 UTC
From: Joe Sammartino
Topic: 3875 Message: 3875

Winlink to Play Role in 'Cascadia Rising' Exercise
<http://winlink.org/content/winlink_play_role_cascadia_rising_exercise>
[image: Cascadia Rising Logo]
<http://winlink.org/content/winlink_play_role_cascadia_rising_exercise>

"Cascadia Rising," the largest FEMA exercise of 2016, will get under way on June 7, and Oregon and Washington ARES/RACES organizations both will be heavily involved, with a significant investment in HF activity planned. The scenario will be an earthquake and tsunami disaster involving the entire Pacific Northwest, and the exercise will start with a blackout of all normal, regular communication systems. Amateur Radio will provide emergency/disaster alternate communication systems, and participants will include Maxim Memorial Station W1AW at ARRL Headquarters. The plan calls for W1AW to be active and monitoring, and possibly passing traffic, if necessary, W1AW Station Manager Joe Carcia, NJ1Q, said. ARRL Emergency Response Manager Mike Corey, KI1U, said Cascadia Rising will also involve the Emergency Response Team at ARRL Headquarters.

"Along with participation via Winlink and HF voice, we will use it as an opportunity to exercise the ARRL Headquarters Emergency Response Team," Corey said. "This team is called up to support the ARRL Field Organization during a major disaster, when support cannot be provided during normal business hours. The last activation of the team was during hurricane Irene in 2011."

According to FEMA, a 9.0 magnitude earthquake along the Cascadia Subduction Zone (CSZ), and the resulting tsunami would present the most complex disaster scenario that emergency managers and public safety officials in the Pacific Northwest could face; Cascadia Rising is an exercise to address that disaster. The exercise will conclude on June 10.

According to FEMA, emergency operations centers (EOCs) and emergency coordination centers (ECCs) at all levels of government and in the private sector will activate to conduct simulated field response operations within their jurisdictions and with neighboring communities, state EOCs, FEMA, and major military commands. The military departments in Washington and Oregon will activate.

"Conducting successful life-saving and life-sustaining response operations in the aftermath of a Cascadia Subduction Zone disaster will hinge on the effective coordination and integration of governments at all levels -- cities, counties, state agencies, federal officials, the military, tribal nations -- as well as non-government organizations and the private sector," FEMA said. "One of the primary goals of Cascadia Rising is to train and test this whole community approach to complex disaster operations together as a joint team."

Thanks to John Core, KX7YT, Oregon ARES District 1 Emergency Coordinator
for some information. Republished with permission by the ARRL.

3877. Flash Drill, Sunday June 5th, 2-3 PM

Yahoo group: Queen_Creek_Hams
Date: 2016-06-01 15:24:02 UTC
From: Joe Sammartino
Topic: 3877 Message: 3877

Members,

There is a flash drill planned for this coming Sunday from 2 PM to 3 PM.

Please reference the email below from Mike Pulley, WB4ZKA.

Just follow his instructions for sign up if you would like to participate.
This is open to all hams that are radio capable and available at that time.

If you do participate, please join us on the the QCECG net that evening at
9 PM (2100) and share your experience.

Regards,

Joe, N2QOJ
QCECG

==========

Fl@sh Dr!ll: Next one is Sunday, 5 June
Posted by: "Mike Pulley" mike.j.pulley@... wb4zka
Date: Tue May 31, 2016 7:18 am ((PDT))

We have a (simulated) massive thunder storm pounding the state next Sunday
afternoon.

5 June, 2pm - 3pm.

If you're ready to play, go sign up for the Fl@sh Dr!ll at www.MCECG.org
<http://www.mcecg.org/>.

As always, you'll be assigned to a role near your home.

A Fl@sh Dr!ll is a 1-hour disaster communication exercise designed to
challenge us to be better than we ever have
before. Everyone learns at their own pace. And we learn by doing.

During our drills last winter, we learned a LOT about how to organize the
first few minutes of an exciting drill. We
improved hugely as the drills unfolded! This time, we're applying the
lessons learned and giving ourselves more
challenges to try.

Who's with me? Go to www.MCECG.org <http://www.mcecg.org/> to sign up for
a role in your part of the Valley.

-- Mike

Mike Pulley, WB4ZKA

From: jsammartino@...
Topic: 3877 Message: 3878

Thanks, Joe.

The drill will have deployed (leaving home) and non-deployed (staying home) roles, so everyone can play. It gets intense, just like disasters tend to do. But we work together and learn more in one hour than in a month of other activities.

-- Mike

Hello Folks,

The video presentations (3 parts) from QCECG's presentation of Broadband - Hamnet are finally hitting theaters.

We thank Brad, N7LZD, and Jay, N1RWY, for a fine presentation and demonstration for our members.

And a big thanks to Dave, KG7NCV, for filming the event.

Enjoy,

Joe, N2QOJ

Folks,

As you all should know by now, our breakfast meeting location for the monthly QCARC breakfast must change since the Flight Deck Cafe is no longer in operation.

Our new location is IHOP located at 20710 E Victoria Ln, Queen Creek, AZ 85142. This location is just North of the QC Library and just South of the Discount Tires store. East Victoria Lane is located between South Ellsworth Road and South Ellsworth Loop.

Here is the Google Map locator:

<goog_875384910>
https://www.google.com/maps/place/IHOP/@33.2517455,-111.638556,17z/data=!3m1!4b1!4m5!3m4!1s0x872a4d3c1d21fed1:0x509e2b2e8c28a656!8m2!3d33.251741!4d-111.636362?hl=en

Until further notice, IHOP will be our monthly QCARC breakfast location on the second Saturday of each month.

Hope to see you there,

Joe, N2QOJ

3888. QCECG Meeting Agenda Incuding Field Day planning

Yahoo group: Queen_Creek_Hams
Date: 2016-06-08 18:47:00 UTC
From: Joe Sammartino
Topic: 3888 Message: 3888

Folks,

This month's meeting will feature three key items:

1. KF7RYX will present on the topic of off-grid Power Requirements with a ham radio focus - perfect for upcoming Field Day 2016.

2. QCARC / QCECG Field Day 2016 Planning

3. QCECG Badges - Hand out

** REMEMBER, QCECG ID Badges can only be received by attending a QCECG meeting. **

About Field Day 2016:

We will be participating in the ARRL 2016 Field Day event this year at the Mogollon Rim. We'll take time during the QCECG meeting to begin the planning.

If you are planning on attending Field Day, and/or are interested to learn more about this event, please join us. This is an important meeting since we will be reviewing the planned site and discussing the logistics of the event.

There is a lot to get done to make this event successful, so please attend. This event is open to all - hams and non-hams that want to see what ham radio and emergency radio communications are all about.

Event: QCECG Monthly Meeting

When: Thursday, June 9th at 7 PM

Where: Queen Creek Town Hall, 22350 S. Ellsworth Road,
<http://tinyurl.com/QCChambers>Queen Creek, AZ 85142
<http://tinyurl.com/QCChambers>

3896. Arizona Emergency Net - Maricopa, Monday, 13 June 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-06-13 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3896 Message: 3896
Attachments: 1 described; binary payloads are missing from this source WARC

Arizona Emergency Net - Maricopa reminder
When: Monday, 13 June 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 2 minutes. It will be at a good elevation for good visibility if there is no cloud cover.

Time: Tue Jun 14 9:05 PM
Visible: 2 min
Max Height: 63°
Appears: 29° above NNW (from 338 degrees)
Disappears: 41° above ESE (toward 113 degrees)

I've also attached an illustration that will help you determine how to use this information. I've added compass direction and bearing info in case you are interested.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 3 minutes.
It won't be at a very great height above but you should be able to see it
well enough at 41 max degrees elevation.

Time: Thu Jun 16 8:56 PM
Visible: 3 min
Max Height: 41°
Appears: 25° above WNW (from 293 degrees)
Disappears: 27° above S (toward 180 degrees)

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

3905. Arizona Emergency Net - Maricopa, Monday, 27 June 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-06-27 15:55:12 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3905 Message: 3905

Arizona Emergency Net - Maricopa reminder
When: Monday, 27 June 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3910. EchoLink Node N2QOJ-R

Yahoo group: Queen_Creek_Hams
Date: 2016-06-29 14:54:08 UTC
From: Joe Sammartino
Topic: 3910 Message: 3910

The Ocotillo EchoLink node will be shut down today and should be operational again by July 8th -- or sooner.

There will be an announcement when it is back on-line.

Joe, N2QOJ

It's not just good advice, it's the law. Amateur radio comes under the EPA restrictions
 which is coverd on section 0 of the exam questions

To: <QCComGroup@yahoogroups.com>
Cc:

Hello good folks,

Jay (N1RWY) and I (AF7VP) will be doing some early morning activations of local peaks on Saturday, July 2 as well as Sunday, July 3. They will be a little early, but we would greatly appreciate your contacts while we are on the summits. Our first activation is planned around 0600 local time. We will be doing 4 peaks throughout the day. We will be listening on 449.325 to the repeater, and we will make our VHF contacts on the local "SOTA frequency" of 144.410 FM. We will also be doing HF, but don't hesitate to work us on every band. We will need 4 contacts each. If you would like to work us, listen in on the Ocotillo repeater and 144.410FM, as well as pay close attention to SOTAWatch and look for our spots.

I have listed the mountains that we are going to climb below. If you don't know what SOTA is, please google it. It's a fantastic and amazingly fun program. I've also put some info on my QRZ page.

Here are the peaks:

Saturday, July 2

W7A/MN-138 Shaw Butte
W7A/MN-143 Scarlet Mt.
W7A/MN-144 Lookout Mt.
W7A/MN-147 Hedgpeth Hills

Sunday, July 3
W7A/AW-009 Pinal Peak

73 and thank you,

Tyler
AF7VP

3928. Re: [Queen_Creek_Hams] NU6E

Yahoo group: Queen_Creek_Hams
Date: 2016-07-11 03:17:53 UTC
From: Scott Moran
Topic: 3920 Message: 3928

Good Evening to all,

Went to see Chuck (NU6E) today, they will revaluate him tomorrow to see what if anything else is wrong with his heart. He had a total of 3 blockages and they were able to clear 2 of them and put in stints. They can't get to the other one, and don't believe he is a good candidate for open heart surgery. Seems to be in good spirits and was joking and laughing a little while I was there. He is in the ICU on the 5th floor at Banner Heart on Power Road. Will try and keep you updated as best as I can with going back to work.

I received a call from Sue yesterday evening that
Chuck had a mild heart attack on Tuesday. He is at Banner
Heart.

They will be doing a procedure sometime today. That's
about all I know for now.

3931. Arizona Emergency Net - Maricopa, Monday, 11 July 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-07-11 16:01:10 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3931 Message: 3931

Arizona Emergency Net - Maricopa reminder
When: Monday, 11 July 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

There is a regular monthly meeting of the Queen Creek Emergency Communications Group but all are always invited.

When: 7:00 PM to 9:00 PM.
Where: Founders Room at Town Hall Queen Creek. This is the former church building, where the town council now meets. It's directly across Ellsworth from Fire Station #1. Contact N2QOJ, KF7RYX, or K7RWE at qcecgaz@... with questions.

Kelly,
There are "two" groups that are in the Queen Creek area. Queen Creek Hams, we have the social breakfast once a month at IHOP. Then there is the Emergency Comms group. They have a monthly meeting on the Second Thursday of each week a d a weekly net at 9 pm on Sunday. Most folks in the QC hams group are members of the EM comm group and vice versa- but not always the case.

Tomorrow at the QC EM Comm meeting we will be talking about FD- as all the participants this year (minus 1) are part of this group as well.

Jay, N1RWY

3950. Arizona Emergency Net - Maricopa, Monday, 25 July 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-07-25 16:01:12 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3950 Message: 3950

Arizona Emergency Net - Maricopa reminder
When: Monday, 25 July 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

3951. Bicycle generator? Anyone. Built one?

Yahoo group: Queen_Creek_Hams
Date: 2016-07-28 15:37:59 UTC
From: Jay Baack
Topic: 3951 Message: 3951

Hey all- I am looking to build a bicycle generator with the purpose of using the bicycle to generate power to charge 12v batteries, as well as an excuse to get more exercise "with a purpose".

Anyone ever built one or know of one that is collecting dust is some hams garage or barn?

Thanks!
Jay N1RWY

3952. RE: [Queen_Creek_Hams] Bicycle generator? Anyone. Built one?

Yea, when I was a kid I had a bicycle with a generator on it. Flip it down on the tire and it would power up the headlight. Probably take you a long time to charge up a battery bank with that one.

I guess your design will come down to how hard you are willing to peddle for the amps you generate. The bigger the number the harder it will be to peddle. The easier it is to peddle the longer you will have to peddle.

Were you thinking of an actual generator or alternator?

Curious to see what you have in mind.

Dennis

Hello Jay,

Sounds like an interesting project. Are the hertz or the voltage or both dependent on pedal speed?

Would a generator used on a bicycle work to charge a battery?

At some point you need a DC voltage greater than 12.6 vdc the charge the battery?

Good luck.

Thinking you might want a flywheel with some weight in place of the wheel
to help keep the momentum going and a switch to disable the gen field that
might make it easier to get started.

Love the fact that folks replied to this!
This design would be to charge batteries- most likely using a 24v motor to a DC to DC charger - or a car alternator : designed to charge an automotive battery.

I realize that this will take a lot of effort - probably pushing some serious RPMs to get the voltage up to where it needs to be. Sweat fest- I know, a lot of effort.

I have been looking online and seen some designs with a flywheel to ease up the starting effort - however I am open to any and all options with this project.

My goals is for a fun build that is functional - realizing that I have to "work" for it to work!

Jay

3956. International Space Station visible tonight

Yahoo group: Queen_Creek_Hams
Date: 2016-07-28 18:44:14 UTC
From: Joe Sammartino
Topic: 3451 Message: 3956
Attachments: 1 described; binary payloads are missing from this source WARC

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 5 minutes. Assuming no cloud cover, you should be able to see it very well at 76 max degrees elevation.

Time: Thu Jul 28 7:50 PM
Visible: 5 min
Max Height: 76°
Appears: 16° above SW (from 225 degrees)
Disappears: 12° above NE (toward 45 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

Have you thought about using a buck / boost regulator to control the output to the battery? Than your actual voltage output would not matter as the regulator would take care of it.

You can can check out ic's on Linear Techs website. I have a working relationship with their sales and engineering staff. They do free design and PCB layout reviews for me before I try to have prototypes built.

They are one of the largest analog ic manufacturers in the world with a office in Tempe.

If you can find an alternator from a 80’s vintage Chevy/GMC, it has the regulator built in. You just need to connect the (+) & (-) and hook the sense wire to (+). you will have to figure out the mechanics of getting it attached to the bicycle.

Also a 16 volt super capacitor bank to store the voltage until you get high enough to charge the battery. Here is a link to one .....

Your welcome. If you decide to try a controller / charger from scratch I can help with the design and have the software to draw it up for manufacture or even building it up on breadboard. I just completed a ocean wave energy harvester I was contracted to do by a professor at stony brook university.

73,

Tom

I was planning such a project several years ago but it quickly proved to be too costly.

After allowing for the cost of a stand-by paramedic, it was not economically viable for me.

3968. QST .... Queen Creek Emergency Group Meeting, Thursday, 8/11/16

Yahoo group: Queen_Creek_Hams
Date: 2016-08-01 07:06:58 UTC
From: Joe Sammartino
Topic: 3968 Message: 3968
Attachments: 1 described; binary payloads are missing from this source WARC

QST . . . QST. . .

The Queen Creek Emergency Communications Group <http://www.qcecg.org/> is very happy to announce that at our next meeting on Thursday, August 11th, our guest speaker and presenter will be Zach Burnham, ZF7YRW.

Zach became a member of the Queen Creek Amateur Radio Club <http://www.queencreekarc.org/> while in high school and earned his Amateur Extra license very quickly. Not long after beginning his studies at ASU, Zach became the President of the not-so-active ASU Amateur Radio Society, W7ASU. Under his leadership, the ASU ARS has been revived and is quite active in many aspects of amateur radio <http://www.arrl.org/what-is-ham-radio>. Among them - emergency preparedness, campus communications liaison with public safety, high altitude balloon research, and portable operations. Today, Zach is Treasurer of the ASU ARS and leads many of their activities.

Zach will be speaking and presenting about the High Altitude Balloon (HAB) projects and their NASA Satellite projects <http://lunahmap.asu.edu/>. These are very interesting topics for not only ham radio operators but most technology minded folks.

The meeting starts at 7 PM and will be held at the Queen Creek Library <http://tinyurl.com/QCLIB> in the Zane Gray Room. Enter the library at the main entrance and turn left down the hallway to the last meeting room.

Here is a link to the meeting location: *http://tinyurl.com/QCLIB* <http://tinyurl.com/QCLIB>

Please pass this announcement on to your friends, ham clubs, and anyone that may be interested in learning about ASU’s involvement in these great activities.

*Need more info? Email at **qcecgaz@...* <qcecgaz@...>* or call 480.788.9035*

3969. Arizona Emergency Net - Maricopa, Monday, 01 August 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-08-01 15:55:10 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 3969 Message: 3969

Arizona Emergency Net - Maricopa reminder
When: Monday, 01 August 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

International Space Station visible tonight

Folks,

Here's a chance to test your spotting and timing skills

With only a 1 minute viewing window, there will be no time for errors. It's a great opportunity to improve your spotting skills.

If you are on the QCECG net at 9 PM, let us know how your spotting fared.

Good luck!

Time: Sun Aug 14 8:59 PM
Visible: 1 min
Max Height: 63°
Appears: 24° above NW (from 315 degrees)
Disappears: 63° above NW (toward 315 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

Also:

For those with 2 meter packet, the ISS will be in RADIO range for 5
additional minutes after it goes dark visually. on145.825 (it was
reported active at 2000 UTC (4 hours ago). It is quite fun to digipeat
thru RS0ISS.

One (of many) useful sites for ISS devotees is at
http://www.issfanclub.com/

Hi folks,

I am setting up an EchoLink node for a friend and need some testing.

Please connect to N2QOJ-L from your PC or smartphone and give it a try.

The RF side is 146.540 simplex but very limited.

Hope to hear from you over the next 30 minutes.

Thanks,

Joe, N2QOJ

From: jsammartino@...
Topic: 3985 Message: 3987

Testing is complete.

The new setup will be running as N2QOJ-R on the Ocotillo repeater for the next couple of days.

Thanks,

Joe, N2QOJ

I saw this this morning and wanted to give it a try. That's when I noticed your node was not showing up. No big deal, but I'm sure you would want to look in to it.

☢ Radio on the Rim V, September 15th through 17th ☢

It's that time again....

The "Radio on the RIM V" event will be from Thursday, September 15th
through Saturday, September 17th (some may stay through September 1th).

Check with Dennis - KF7RYX, Ron - K7RWE, or Joe - N2QOJ for details.

Info here also: https://www.qrz.com/db/N7Q

3992. Possible RIM VI (Oct 7-9)

Yahoo group: Queen_Creek_Hams
Date: 2016-08-25 15:15:18 UTC
From: Jay Baack
Topic: 3992 Message: 3992

Hey all,
I know that Field Day is 10 months away… However, we have another opportunity to take part in a RIM / ham radio event coming up on the weekend of Oct 7-9. This is the Arizona QSO Party weekend. Similar style to Field Day, however, being in AZ a lot of folks will be “looking” for us.

Contest Period: 2nd full weekend of October, 1600Z (9am MST) Saturday to0600Z Sunday (11pm MST Sat), and 1400Z (7am MST) Sunday to 2359Z (5pm MST) Sunday, 24 hours total. For 2016, the contest will be held October 8-9.

This is less of an event that FD, as you only operate 9 am – 11 Saturday and then 7 – 5 PM on Sunday.
It would be a great experience for those that want to try some high altitude/camping/remote/contesting.

I have proposed this to Dennis, who, I am sure is going to say… “Great.. YOU manage it”, which I am willing to do.
Is there any interest in folks doing this?

We would operate as a Multi transmitter, low power station (under 150w).
Folks could operate for an hour or the entire time, that is up to you. Everyone who wants to participate should plan on bringing their own gear, or get with someone who will be bringing gear. I am planning on my same setup that I took up for FD, however, I cannot speak for anyone else and what their plans are. We would use the N3FJP software which is VERY similar to the Field Day software.

Anyone interested in some jeans and sweatshirts operating up on the RIM in October? It would be a great learning experience to use all those knobs and settings that you have not played with yet on your radio(s).

- Jay N1RWY

3993. Queen Creek Emergency Communications Group Net, Sunday, 28 August 2016

3995. Founders' Day Festival, Saturday September 24th

Yahoo group: Queen_Creek_Hams
Date: 2016-09-04 23:54:10 UTC
From: Joe Sammartino
Topic: 3995 Message: 3995

QCECG Members,

We have been asked by our Town sponsor to provide communications services for the upcoming Founders' Day Festival

Here are the details:

QCECG volunteers are needed to assist with communications and the shuttle buses for the Founders' Day Festival event on *Saturday, September 24, 2016*. Volunteers will be needed from *4:30 - 9:30 pm*.

Here is a link to the event page on the Town's website, *http://queencreek.org/departments/parks-recreation/special-events/founders-day-festival <http://queencreek.org/departments/parks-recreation/special-events/founders-day-festival>*

Recreation Services will employ two (2) shuttle buses to move citizens from the parking area at the Queen Creek Library to the event at Founders' Park.

Here is a description of the volunteer roles for this event:

- One (1) QCECG member will be at the Library as net control.

- Two (2) QCECG members will be at the Library to assist citizens with loading/unloading the shuttle bus, and parking.

- One (1) QCECG member on each bus, for a total of two, to provide event information and communicate with net control.

- Two (2) QCECG members will be at Founders' Park to assist citizens with loading/unloading the shuttle bus.

We would also like to have available two *additional* QCECG members at the Library to assist citizens with loading/unloading the shuttle bus, and parking if necessary. These two volunteers can arrive at 6:00/6:30 p.m. and work until 8:30 p.m. If the volume is not there, we will cancel them.

We will operate in two shifts of 7-9 volunteers each:

1st Shift: 4:30 - 7:00 p.m.

2nd Shift: 7:00 - 9:30 p.m.

Please contact me directly at jsammartino@... or qcecgaz@... if you can assist us. This will be a great opportunity to provide service back to our sponsor and community. Plus, it is always a great learning experience. All you need is your handie-talkie and some water.

For those of you running the Sunday regional training nets, be sure to mention this important request.

Regards,

Joe, N2QOJ

I would like to volunteer for net control for either or both shifts. With my current setup and my experience at the park and doing QCECG net control, I believe I can fulfill the role.

Joe, Would you put this on the yahoo group for the emergency communications group. Thanks.

Our ward is putting on a preparedness expo. It is at the church on Barnes Parkway just north of Ocotillo. There is a light on Ocotillo at Barnes. Major cross streets are Ocotillo and Ironwood. It is this coming Saturday from 9:00 to 11:30 and all are welcome to attend. I will be doing a piece on solar ovens and alternative cooking sources.

4006. Inactive Yahoo Group

Yahoo group: Queen_Creek_Hams
Date: 2016-09-06 23:40:00 UTC
From: wmunsil@...
Topic: 4006 Message: 4006

Back in 2003 I started a Yahoo Group for descendants of James Chilton of the MAYFLOWER - Chiltons-Children.

I turned it over to someone else and he passed away shortly thereafter.

There are still 111 members in the group but no one has been able to access it since the moderator passed away about nine years ago.

About six years ago I started a replacement group which currently has 97 members.

Does anyone know how to contact Yahoo.com to get access to the earlier group - if possible?

Bil

Just contact Yahoo Group Support. You will find a category for missing or absent moderator. Explain just like you did here. They have a strict process they follow. There will be a poll to the group asking for you as the new moderator. Once that is complete, they will assign you as group moderator or not.

I've done this several times and it works.

Joe

This all assumes you are an active member of the group which it sounds like
you are not presently. You may have a different process to follow.

4010. RIM VI (Oct 7-9)

Yahoo group: Queen_Creek_Hams
Date: 2016-09-07 15:07:00 UTC
From: Jay Baack
Topic: 4010 Message: 4010

Not the be confused with RIM V coming up in a few weeks, RIM VI will be in October, the 7-9. The focus of RIM VI will be to work the AZ QSO party. Those interested in going and taking part in the Arizona QSO party weekend while up there as a combined effort- please let me know so we can coordinate gear, laptops for networking, filters, etc.etc. The QSO party will not be as busy as Field Day and shuts down each night, so no need to operate all night long.

If you want to come up and enjoy the cold weather without participating in the QSO party- that is great as well- just please let me know here on the list or by email who is planning and what the plans are.

ALL ARE WELCOME!

Thanks!
Jay N1RWY

I am very saddened to report that our friend Chuck, NU6E, passed away Tuesday evening at about 8:30 PM. Chuck had his family by his side as he passed.

Chuck attended our QCECG meetings and QCARC breakfasts - health permitting - and also manned our field day stations. Chuck was our stalwart net operator in district 5.

We will miss him. 73, Chuck.

Additional details will be posted as they become available.

4012. ☢ Operation On-Target, Boy Scouts ☢

Yahoo group: Queen_Creek_Hams
Date: 2016-09-07 20:16:22 UTC
From: Joe Sammartino
Topic: 4012 Message: 4012
Attachments: 2 described; binary payloads are missing from this source WARC

For those of you who may want to know a little bit more about Operation On-Target, visit this link:

http://www.bsaontarget.org/what-is-on-target

"ON TARGET is a national Venturing & Varsity Scout high adventure activity. Scout teams across the country will choose mountain peaks to climb and from there they will use mirrors to signal each other. They will also talk to each other with ham radios or cell phones, creating a link between them and other teams that are participating. They then plot these contacts on a map."

As some of you may know, the U. S. Army Signal Corps utilized Heliograph system (invented by British Army) as a way to communicate while chasing Geronimo in the Southwest region. Now you know why Heliograph Peak is named as such.

I've attached two docs that have additional information. Just contact me directly if you can't download the files.

Over the last few years, ham radio communications has been used by the Scouts to coordinate On-Target activity.

Thanks to Daniel, KB7PLO, for reminding us of this interesting event.
Arizona is ☢ radio*active *☢ and will be participating in Operation On-Target on Saturday, September 17th.

Check it out,

Joe, N2QOJ

From: Dennis Lawrence
Topic: 4002 Message: 4013

Jay, 8am is the start.

I will probably drive over in the RV. I have finished most of the items I wanted to get done before the Rim trip on the 15th. Took a test drive last night and all systems seem to functioning as they should. The a/c is still cooling very nicely, so I am calling the conversion to “Dust Off” as the R-12 substitute a success. You can feel the cool air all the way to the back of the coach. The engine temp is staying well in the low normal range, but that may change on those long climbs up the mountain.

Still have a number of things I want to do, such as add extra batteries and solar on the roof, new flooring, paint the ceiling, and recover the cushions, but those will be at a later day. I will make the maiden trip to the Rim on the 15th and I believe she is ready to go.

I will spend this weekend getting it all cleaned up from all the work I have been doing and get it all stocked with pots and pans and all the other stuff I will need for camping.

Dennis

4021. Arizona Emergency Net - Maricopa, Monday, 12 September 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-09-12 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4021 Message: 4021

Arizona Emergency Net - Maricopa reminder
When: Monday, 12 September 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4028. Community Emergency Preparedness Workshop Thursday, September 22nd, 2016 @ 7pm

Yahoo group: Queen_Creek_Hams
Date: 2016-09-22 19:01:28 UTC
From: Joe Sammartino
Topic: 4028 Message: 4028

Community
Emergency Preparedness
Workshop
Thursday, September 22nd, 2016 @ 7pm

This Month’s Topic:
Firearm Safety & Care
Taught By: Todd Thatcher (DPS Officer)

Gun safety rules and recommendations are intended to avoid accidental discharge or negligent discharge, or the consequences of firearm malfunctions. Their purpose is to eliminate or minimize the risks of unintentional death, injury or damage caused by improper possession, storage, or handling of firearms.

Gun safety training seeks to instill a certain mindset and appropriate habits by following specific rules. The mindset is that firearms are inherently dangerous and must always be stored carefully and handled with care. Handlers are taught to treat firearms with respect , and strongly discouraged from playing or toying with firearms, a common cause of accidents. The rules of gun safety follow from this mindset.

Come to this month’s workshop and learn more.

Open To Everyone!

4029. Founder's Day Volunteers Status

Yahoo group: Queen_Creek_Hams
Date: 2016-09-23 03:52:23 UTC
From: Joe Sammartino
Topic: 4029 Message: 4029

Folks,

We are just about there for volunteers needed. As of now, we have just enough but no buffer room. That is uncomfortable. If you have already volunteered, take a look below for your assignment.

We can double up on assignments if necessary. This is a great opportunity to serve our Town sponsor and improve our net and event skills.

All you need is your radio, some basic provisions, and your time. Please let me know if anyone else can volunteer and, if you have already volunteered, bring a ham.

We need a final roster by Friday mid-day. Shift 1 Volunteers should show up at the Library area around 4 PM. The Queen Creek Repeater will be used so check in on 449.475MHz (PL 136.5 Hz).

Thanks,

Joe, N2QOJ for QCECG

(If you have received multiple copies of this email, my apologies. I've combined several email lists in order to increase my chances of reaching all our members.)

Here is a description of the volunteer roles for this event:

- One (1) QCECG member will be at the Library as net control.

- Two (2) QCECG members will be at the Library to assist citizens with loading/unloading the shuttle bus, and parking.

- One (1) QCECG member on each bus, for a total of two, to provide event information and communicate with net control.

- Two (2) QCECG members will be at Founders' Park to assist citizens with loading/unloading the shuttle bus.

Here is the volunteer status so far:

Assignment by Shift

Shift 1 - 4:30 PM till 7 PM

Net Control - Tyler Call, AF7VP

Bus - Janet Cooper, KF7SLQ

Bus - Steve Knab, KG7BME

Loader - Library - Dennis Lawrence, KF7RYX

Loader - Library - Bruce Barnes, KF6EZT - Bruce will need to be relieved at 6 PM

Loader - Park - Joe Sammartino, N2QOJ

Loader - Park - Brad Heck, N7LZD

Shift 2 - 7 PM till 9:30 PM

Net Control - Tyler Call, AF7VP

BUS - Colleen Earl, K7RDZ

BUS - Michelle Waller, KG7NCW

Loader - Library - Dennis Lawrence, KF7RYX

Loader - Library - Joe Sammartino, N2QOJ

Loader - Park - Ron Earl, K7RWE

Loader - Park - David Waller, KG7NCV

Assignment by Volunteer

Ron Earl, K7RWE - Park Loader, Shift 2

David Waller, KG7NCV - Park Loader, Shift 2

Joe Sammartino, N2QOJ - Park Loader, Shift 1 / Library Loader, Shift 2

Brad Heck, N7LZD - Park Loader, Shift 1

Dennis Lawrence, KF7RYX - Library Loader, Shift 1 / Library Loader, Shift 2

Bruce Barnes, KF6EZT - Library Loader, Shift 1

Tyler Call, AF7VP - Net Control - both shifts

Janet Cooper, KF7SLQ - BUS Shift 1

Steve Knab, KG7BME - BUS Shift 1

Colleen Earl, K7RDZ - BUS Shift 2

Michelle Waller, KG7NCW - BUS Shift 2

4030. 33' vertical antenna for sale

Yahoo group: Queen_Creek_Hams
Date: 2016-09-24 21:06:02 UTC
From: ambroinaz@...
Topic: 4030 Message: 4030

QC Hams,

I decided to sell my 33' vertical antenna and go a different route for HF. I just don't have the space on my property to make this antenna perform well. I'm probably just gonna stick with a portable option like a buddistick or something.

I'm selling it for 1/3 of the cost of a new one. $100

Craigslist ad is here:

4032. Arizona Emergency Net - Maricopa, Monday, 26 September 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-09-26 15:55:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4032 Message: 4032

Arizona Emergency Net - Maricopa reminder
When: Monday, 26 September 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4033. International Space Station visible tonight

Yahoo group: Queen_Creek_Hams
Date: 2016-09-28 17:56:59 UTC
From: Joe Sammartino
Topic: 3451 Message: 4033
Attachments: 1 described; binary payloads are missing from this source WARC

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 5 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

Time: Wed Sep 28 7:11 PM
Visible: 5 min
Max Height: 81°
*Appears: 11° above SW **(from 225 degrees)*
*Disappears: 18° above NE **(toward 45 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.
If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

Regards,

Joe, N2QOJ

Folks,

If you have HF capability, Dennis - KF7RYX, Jay - N1RWY, are hosting the Arizona QSO Party Contest station, N7Q, up on the Mogollon Rim today and tomorrow.

Dennis can be contacted on 40 meters at 7208 Kilohertz.

Regards,

Joe, N2QOJ

Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4056. Winter Field Day Jan 28-29 2017.

Yahoo group: Queen_Creek_Hams
Date: 2016-10-14 15:16:18 UTC
From: Jay
Topic: 4056 Message: 4056

Greetings all,
As mentioned last night at the QC EMCOM meeting, the group is going to take part in Winter Field day again this year. Dave, AC7FF is going to lead the event.

We are looking to gauge interest to see who is interested in coming out to the event and if so, your activity level.

If you are interested please reply back and we can create a targeted email list to keep the conversation going.

This event right now is planned to be down around the Florence area, same location as last year.
NO trees for antennas, and is just like the summer Field Day event, just in the "winter".

At this point we are looking at either 2 or 3 transmitters being active full time for the event., but that could always change based upon interest.

- Jay N1RWY

4069. Arizona Emergency Net - Maricopa, Monday, 17 October 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-10-17 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4069 Message: 4069

Arizona Emergency Net - Maricopa reminder
When: Monday, 17 October 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4070. Volunteers Needed - Queen Creek Trunk or Treat - Saturday, October 22nd.

Yahoo group: Queen_Creek_Hams
Date: 2016-10-17 17:39:28 UTC
From: Joe Sammartino
Topic: 4070 Message: 4070
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

QC Recreation Services Division has made a request of the Fire & Medical Department for communications services and shuttle bus assistance for the upcoming Trunk or Treat event on *Saturday, October 22, 2016*. Volunteers will be needed from *3:30 - 10:00 p.m.*

Here is detailed information from Joe LaFortune, Emergency Management Coordinator:

Here is a link to the event page on the Town's website, *http://www.queencreek.org/departments/parks-recreation/special-events/trunk-or-treat <http://www.queencreek.org/departments/parks-recreation/special-events/trunk-or-treat>*

QCECG assisted with this event for the past few years but this year will have a big change. The event has outgrown Desert Mountain Park and will be moving to Town Center. Ellsworth Road will be closed from Ocotillo Road to Rittenhouse Road.

Recreation Services will employ two (2) shuttle buses from 4-10 p.m. to move citizens from the parking area at Desert Mountain Park (DMP) to the event site in Town Center.

Volunteer roles to fill first:

- One (1) QCECG member will be needed as net control. We need to determine if they should be located at Desert Mountain Park or the Town Center drop off location.

- Two (2) QCECG members, one on each bus, to communicate with net control and provide event information to citizens.

- Two (2) QCECG members will be at Desert Mountain Park to assist citizens with loading/unloading the shuttle buses. Two (2) CERT members may be added to this team.

- Two (2) QCECG members will be at the Town Center shuttle drop off location to assist citizens with loading/unloading the shuttle buses.

- One (1) QCECG member at Public Parking #1 on the northwest corner of Ellsworth and Maya Roads. Two-Three (2-3) CERT members will be assigned to this location. An MCSO Deputy will also be assigned to this location.

With the use of Town Center, there are a number of public parking locations on dirt lots that will be available. Last year the public seemed reluctant to use the Library North dirt lot until they were told it was okay to use. By posting a volunteer and a light tower at each location we hope to encourage their use. We can fill these locations second if possible.

- One (1) QCECG member at Public Parking #2 to assist citizens with parking direction. One (1) CERT member may be added to this location if recruited.

- One (1) QCECG member at Public Parking #4 (IHOP East) to assist citizens with parking direction. One (1) CERT member may be added to this location if recruited.

- One (1) QCECG member at Public Parking #5 (IHOP West) to assist citizens with parking direction. One (1) CERT member may be added to this location if recruited.

- One (1) QCECG member at Public Parking #6 (Library North) to assist citizens with parking direction. One (1) CERT member may be added to this location if recruited.

- One (1) QCECG member at Public Parking #7 (Library South) to assist citizens with parking direction. One (1) CERT member may be added to this location if recruited.

I would like to operate two shifts of volunteers if possible:

1st Shift: 3:30 - 6:45 p.m.

2nd Shift: 6:45 - 10:00 p.m.

As you can see, we will need about 13 QCECG volunteers for each shift -- that's a total of 26 volunteers for the entire event. I'm sure we will have several volunteers who are willing to provide a double shift of service but it will be good to have a buffer. *A map of the event area is attached so you can get an idea of the locations referred to in Joe's description above.* As always, if you have a ham friend that is not a QCECG member that would like to lend a hand, just be sure to let me know who that is. We must provide a list of volunteers to the Town in advance.

I need to hear back from all of you reading this. Please respond if you can volunteer AND if you cannot. We need to better manage our volunteer requests so your responses are very much needed.

All responses need to be sent directly to me at my email address noted below my signature. If you click on "Reply" in your email app, be sure my email address is showing in the "To:" field.

Thanks,

Joe, N2QOJ
Dennis, KF7RYX

Folks,

The QCARC / QCECG organizations have been invited to participate in this year's preparedness fair that is being sponsored by the 4 Gilbert LDS Stakes. This is one of the largest and most well attended preparedness events in the Valley.

We need volunteers for setup, public relations, and tear down. We will setup at 6:30 AM and start break down at 11 AM. 4 or 5 volunteers should be all that we need.

We need your help, please contact me, Dennis, or Ron asap to let us know if you can assist. There will be over 100 booths for you to visit and a free pancake breakfast.

Thank you,

Joe, N2QOJ - jsammartino@...
Dennis, KF7RYX - kf7ryx@...
Ron, K7RWE - ronearl2@...

From: Joe Sammartino
Topic: 4074 Message: 4074
Attachments: 1 described; binary payloads are missing from this source WARC

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 6 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

Time: Wed Oct 19 6:40 PM
Visible: 6 min, Max Height: 83°
Appears: 10° above NW (from 315 degrees)
Disappears: 15° above SE (toward 135 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

Regards,

Joe, N2QOJ

4075. MFJ antenna analyzer for sale

Yahoo group: Queen_Creek_Hams
Date: 2016-10-20 01:59:53 UTC
From: Jay
Topic: 4075 Message: 4075

Hey all,
I have a MFJ 259 antenna analyzer for sale.

I have it up on Craigslist for $125.

I would sell it to a member here for $100.

FOR SALE: MFJ-HF/VHF/SWR ANALYZER
MODEL: MFJ-259.

This is one of the older models, the 259. 1.8 - 170 MHz.
I am the third owner. Works off of AA batteries. I have used it for several years without issues.
However, as of late, the main band selection knob contacts needs to be cleaned or replaced, as the frequencies will jump around when the knob is turned to certain positions. On other positions it works fine.

I contacted MFJ about it and this was their reply:

"You can try cleaning the contacts of the frequency switch with rubbing alcohol and a small brush or replace it altogether, the part is just $3.50. p/n: 500-1565."

I open it up and took a look at replacing it, and it would be about an hour of time, with having to desolder the switch, and remove the antenna connection solder joints from the board, remove the board, replace the switch and do the reverse in order.

If you are handy with a soldering iron, it could take less time.

I don't have time to dedicate to this project with all the other things I am trying to get done.
So.. It is up for sale.

It is several years old and has some dings. It isn't a showroom model, but has worked well at several club events as well as use on my own antennas.

- Jay N1RWY

4079. Arizona Emergency Net - Maricopa, Monday, 24 October 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-10-24 15:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4079 Message: 4079

Arizona Emergency Net - Maricopa reminder
When: Monday, 24 October 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

History was made this month!

Digital ATV has come to Arizona!

AF7M in Tucson has accessed the Mt Lemmon HAM TV repeater with Digital ATV.

AD7OI in the Phoenix area has accessed the White Tanks HAM TV repeater with Digital ATV..

I'm not an expert but I play one - on HAM TV.
Bil Munsil
K1ATV HAM TV
Mesa AZ
Hams should be seen as well as heard.
More than 30 years on and off HAM TV in Arizona.

4087. going out on a limb looking for bird slugs

Yahoo group: Queen_Creek_Hams
Date: 2016-10-29 04:17:44 UTC
From: Jay
Topic: 4087 Message: 4087

Greetings all,
Anyone happen to have any extra Bird 43 100H / 1000H (2-30Mhz 100/1000 w)
slugs kicking around that they want to part with?

Thanks

Jay N1RWY

4088. Arizona Emergency Net - Maricopa, Monday, 31 October 2016

From: Queen_Creek_Hams@yahoogroups.com
Topic: 4088 Message: 4088

Arizona Emergency Net - Maricopa reminder
When: Monday, 31 October 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4089. Amateur Radio License Testing at QCECG

Yahoo group: Queen_Creek_Hams
Date: 2016-10-31 18:39:37 UTC
From: Joe Sammartino
Topic: 4089 Message: 4089

QST - Queen Creek Emergency Communications Group Announces Monthly Testing

Great news ....

There will be amateur radio license testing at every QCECG
<http://www.qcecg.org> monthly meeting moving forward!

Dave Martin, AC7FF, our very own VE Session Manager, will be providing this
service with help from Tyler Call, AF7VP.

QCECG volunteer examiners will also support this effort.

It would be good to know how many people will be coming so shoot me an
email if you have a candidate.

Follow this link <http://www.qcecg.org> for details on location and time.

Regards,

Joe, N2QOJ
QCECG, Queen Creek Fire and Medical Department

So you want a good guide to help you understand what you memorized for your Technician test?

Or, you have a friend or family member that wants to get licensed but wants to actually learn in the process...

I've attached this great guide for you:

*The No Nonsense Technician Class License Study Guide <https://dl.dropboxusercontent.com/u/4721475/QCARC/2014-no-nonsense-tech-study-guide-v20.pdf>
- FREE, by Dan Romanchik KB6NU*

Or download from here <https://dl.dropboxusercontent.com/u/4721475/QCARC/2014-no-nonsense-tech-study-guide-v20.pdf>
if you don't get the attachment.

Regards,

Joe, N2QOJ

This applies to all stations - regardless of contesting.
Late night nets, running net control for some of our events, or early
morning check ins.
Ergonomics and the layout of the station will make you a happier operator.
Posted in the ARRL email update.
Worth a read.

Community
Emergency Preparedness
Workshop
Thursday, November 17th, 2016 @ 7pm

This Month’s Topic:
Fire-Starting [Hands-On]
Taught By: Rodney Standage

What is it about building a fire that’s so important for survival when you’re in an emergency situation?

· Fire keeps you warm. Depending on the environment where you’re trapped -- warm and dry, frigid and wet, etc. -- building a campfire could be the difference that saves you from discomfort, hypothermia, frostbite or even death.

· Fire gives you a way to signal your location. When you’re stranded in an emergency situation, you’ll want a way to notify those searching for you of your whereabouts. Especially in the dark, fire is helpful for informing searchers of your location.

· Campfire furnishes the heat needed to make both water and food safe to ingest. If you have a fire, a pot/skillet and access to food and water, you’re able to refuel your body by hydrating yourself with purified (boiled) water and refueling your body with cooked food.

· Fire provides light and comfort. A fire is also a great survival tool because it emits light that’s comforting and allows for you to study your map, compass, etc.

This workshop will be a hands-on activity (outside at the Ramada. Dress accordingly) This is a great workshop for the youth as well. There will be lot’s to learn and do.

Open To Everyone!

4th Thursday of Each Month (3rd Thursdays in Nov. & Dec.)

LDS Church Building Higley Rd. South of Ray Rd.
1865 S. Higley Rd, Gilbert, AZ. 85295
(Higley Rd. Exit off of the 202. Go One Mile South; Across from Williams Field High School)

Yahoo group: Queen_Creek_Hams
Date: 2016-11-14 14:59:06 UTC
From: Dave
Topic: 4098 Message: 4098

Greetings All,
It’s been awhile since we had a gathering of the willing in the park and we will be doing one this coming Thursday at 17:00hrs in Desert Mountain Park in the back by the baseball fields. We will set up at least 3 stations and demonstrate different mode ie…CW, Digital, Voice. This is a perfect opportunity for you to come learn about different modes and get on the air. We will start setting up at around 16:30. I will also bring my testing material for anyone that has been considering upgrading or knows anyone that may want to become a Amateur Radio Operator. We usually stay at the park for 3-4 hours depending on band conditions. I hope to see you all there on Thursday evening to play radio and fellowship with one another. If you have any questions please feel free to email me. Have a good week and stay safe.

73,
Dave Martin

☢ *International Space Station visible tomorrow morning *☢

Folks,

Good news! Another opportunity to spot the station for 5 minutes. It will be at an 48 degree elevation and should be good viewing barring any cloud cover.

Time: Mon Nov 21 6:10 AM
Visible: 5 min
Max Height: 48°
Appears: 18° above WNW (from 293 degrees)
Disappears: 11° above SSE (toward 158 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

Regards,

Joe, N2QOJ

I am not a professional installer, I am a frequent inataller. I also will be of less help until January because I am a snow bird. I am a co-author of the Chrysler installing instructions which is available from your dealer. Tell them it is a "TSB" issued every year (or at least it was for many years.) I may have a copy somewhere. The last page of your owners manual should state the coporate policy for 2-way radios which I also helped write. Please note the instruction in the TSB telling you to never, use a ground fuse even if the radio manufacturer supplies one. The positive wire goes to the battery terminal and the ground goes to somewhere on the chassis or body without a fuse. Most installers put it on the battery. This will probably cause a furor which I have no time to defend here. I'll explain in January.

Hi Tom,

Matt is asking for a recommendation for an experienced mobile radio installer. Based on that, I don't think he is looking to become fluent in vehicular RFI mitigation at this point in time - or in January.

TSB-08-31-94 was superseded by TSB 08-22-95, then TSB 08-16-98.

If anyone needs a copy of TSB 08-16-98, contact me directly.

Matt: If you would like some pointers on installation, bring your vehicle and radio to one of our meetings. There are some questions I would ask if I was doing the install. E.g. The Icom 5100 has a detachable head. Are you interested in a remote mounted radio? Stealthy? Temporary/permanent? The installer will want to know all of these things plus type of antenna, antenna mount, mounting location, etc.

Regards,

Joe, N2QOJ

4109. Re: [Queen_Creek_Hams] mobile install

From: jsammartino@...
Topic: 4101 Message: 4109

Who wants to wait for January for info on ground wire hook-up?

Not me.....

Here's what Chrysler thinks of ground wire fusing....

DO NOT FUSE THE GROUND LEAD. If the ground-side fuse were to open, the entire supply current would be conducted by the coax shield. This could cause the feedline to overheat with possible resulting damage.

There you have it. Now we can enjoy the holidays without the cliffhanger.

Regards,

Joe, N2QOJ

Arizona Emergency Net - Maricopa reminder
When: Monday, 21 November 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4111. ☢ Queen Creek Holiday Festival and Parade, Decembe r 3rd, 12 PM to 7 PM ☢

Yahoo group: Queen_Creek_Hams
Date: 2016-11-23 17:45:21 UTC
From: Joe Sammartino
Topic: 4111 Message: 4111

Folks,

The ☢ QCECG ☢ has been asked to provide communications services for the the Town's Holiday Festival.

We need volunteers! Probably two shifts again beginning at 11:30 AM and ending at 7:30 PM.

Stay tuned for more details.

Regards,

Joe, N2QOJ

4118. "Radio in the Parking Lot" - Sportsmas Warehouse, 1750 Greenfield Rd , Mesa, AZ

Yahoo group: Queen_Creek_Hams
Date: 2016-11-27 20:15:57 UTC
From: Joe Sammartino
Topic: 4118 Message: 4118

From our friends at Mesa R U Prepared

All hands on deck! This will be an off the grid Ham radio demonstration and education event open to the public! We will be doing advertising through the store and press releases. We will have Ham radio information and discussion with anyone that stops by including GOTA (Get On The Air) stations. This will be an opportunity to teach and learn as we will be setting up antennas and using our radios all day. We are often asked for hands on radio time, here it is! Do not worry if you are not experienced, everyone started from the beginning. You do NOT have to be licensed to participate. We can divide the day in to two 3-hour shifts 9-12 and 12-3 or three 2-two hour shifts 9-11, 11-1, 1-3. We will also need some brief setup and take down assistance. Please reply with your availability.

Map
<https://maps.google.com/maps?f=q&hl=en&q=1750+Greenfield+Rd+%2C+Mesa%2C+AZ%2C+us>

Please contact Michelle <rnwaller@...> or David <rnwaller@...> at Mesa R U Prepared if you are interested in volunteering but do tell your friends to visit the event if they are interested to learn about ham radio.

4124. Town of Queen Creek Holiday Festival and Parade

Yahoo group: Queen_Creek_Hams
Date: 2016-11-28 00:58:35 UTC
From: Joe Sammartino
Topic: 4124 Message: 4124

Attention all region net control operators and 2100 net control operator:

Please be sure to ask each of your check-ins tonight if they can volunteer for next Saturday's event.

We need about (15) volunteers to cover this event. This event is much different than the other Town events. The primary roles will be to "shadow" event officials and provide communications support between them and the other event officials. We will have need for (2) net control operators and several volunteers are needed to report/observe on key event functions such as equestrian staging, barricades, etc. There is a lot of walking involved with these assignments.

Complete details with event maps will be published a bit later this evening.

Please report your volunteer list to the 2100 Net Control Op when asked and send to me via email also.

Thanks,

Joe, N2QOJ
QCECG

4125. Holiday Festival and Parade info for QCECG Volunteers

Yahoo group: Queen_Creek_Hams
Date: 2016-11-28 01:57:35 UTC
From: Joe Sammartino
Topic: 4125 Message: 4125
Attachments: 1 described; binary payloads are missing from this source WARC

I'm told that things should be very similar to the previous years. With the exception of the start and end times, which is later in the day this year, we shouldn't expect too many changes. The parade route is a bit longer and noted on the map in the attached info document. The parking will be similar to recent past events (Founders' Day). There are no buses. The event duration has also been shortened from 9 hours to 7 hours -- beginning at 12 PM and ending at 7 PM. We will need to be on station from 11:30 AM and till at least 7:30 PM.

The most demanding portion of this event for us is the initial staging, parade run, and de-mobilization of the floats as they reach the end of the parade route. It's a lot of walking.

As the parade run and de-mobilization activity completes, the shift moves more to supporting of our recreation department contacts as they focus on the Festival activities which includes the carnival and live entertainment at the outdoor stage.

In the past, volunteers have supported the entire event, start-to-finish. This year, we can try to break it up a bit into (2) shifts based on the volunteer response. So far, we have only (5) volunteers.

Volunteers need to report on site at the QC library no later than 11:30 AM. Give yourself time to park. Check in with Net Control on your arrival. Net Control will be setup just outside the Southeast doors of the Rec Department/Library (near the shrubs!).

Bring your HT, extra battery, water, snacks, a jacket (it may be cold). The Town usually provides some form of dinner or snacks for the volunteers. This is not confirmed so be prepared.

Here's the volunteer list so far:

Joe, N2QOJ, 480.381.2993
Dennis, KF7RYX, 602.510.3838
Brad Heck, N7LZD
Janet Cooper, KF7SLQ
Christi Feldewerth, KG7NAD

*We need a lot more volunteers to meet our commitment to the Town. Please send me an email directly at jsammartino@... <jsammartino@...>
if you can volunteer.*

The attached document has a full description of the event and detailed maps for parking, festivities, and parade route.

Questions? Comments? Contact me without delay.

Joe, N2QOJ

Joe,

Thanks for letting everyone know about the Sportsman’s Warehouse event. Let’s divide and conquer here, It’s time to step up and participate! You will not regret it, either way you stand out in your community with the value of Ham radio.

Michelle

All hands on deck! This will be an off the grid Ham radio demonstration and education event open to the public! We will be doing advertising through the store and press releases. We will have Ham radio information and discussion with anyone that stops by including GOTA (Get On The Air) stations. This will be an opportunity to teach and learn as we will be setting up antennas and using our radios all day. We are often asked for hands on radio time, here it is! Do not worry if you are not experienced, everyone started from the beginning. You do NOT have to be licensed to participate. We can divide the day in to two 3-hour shifts 9-12 and 12-3 or three 2-two hour shifts 9-11, 11-1, 1-3. We will also need some brief setup and take down assistance. Please reply with your availability.

4128. Arizona Emergency Net - Maricopa, Monday, 28 November 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-11-28 15:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4128 Message: 4128

Arizona Emergency Net - Maricopa reminder
When: Monday, 28 November 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4132. Anyone have a cantenna or 800-1000w dummy load?

Yahoo group: Queen_Creek_Hams
Date: 2016-12-06 12:26:16 UTC
From: Jay Baack
Topic: 4132 Message: 4132

Hey all- I have been rebuilding a barn find SB-200 amplifier- and I am getting close to being ready to apply RF to it to test the output of the tubes, which means I need a stout dummy load for some testing.

I promise I will be gentle with it.

Thanks!

Hi Jay,
You'd think there'd be a dusty Cantenna joined at the hip to that SB200
.... Someone may have an oil cooled load or boat anchor.

Best I can do is a hefty Continuous 250W / Intermittent 350W Air Cooled
Resistive Load. That should be enough load capacity to warm up and exercise
the tubes and do initial diagnostics and assessments. Then if all's well,
some low power alignments. Save the final plate glow and smoke alignment
with a known good antenna that can take the abuse.

Norm,
Thanks for the reply. I bet that when this 200 was pulled out of the barn, the cantenna was probably tossed in a corner someplace. I appreciate the offer to use your dummy load.

I ended taking my lunch break with a drive to Hro and picked up a 2kw oil filled dummy load. Should take care of all my testing on this amp and any other future project. I am looking forward to keying this classic piece of American history and seeing what it will do.

Jay,
Welcome. You're new load will serve you well. Looked at you Blog project, looks like you spent some time cleaning things up.

Brings back memories ... when; built a Heathkit SB-220 2KW and the ..... "don't even think about not ordering" ... Cantenna kit. Those were the days of thinking Bing-Bang-Boom. Heath made a bullet proof linear and power supply.

These days it's all about QRP with SDRs and fancy antenna's.

Have fun ionizing antenna elements.

That should be enough load capacity to warm up and exercise the tubes and do initial diagnostics and assessments. Then if all's well, some low power alignments. Save the final plate glow and smoke alignment with a known good antenna that can take the abuse.Norm, aa7oo

Thank you all for the offers of assistance. I ended up picking up my own dummy load at HRO at lunch today. I figured with all the use I will put it through it was worth the purchase.

Thank you all again!

4144. Arizona Emergency Net - Maricopa, Monday, 12 December 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-12-12 15:55:07 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4144 Message: 4144

Arizona Emergency Net - Maricopa reminder
When: Monday, 12 December 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4145. International Space Station visible tonight, 6:47 PM (1847 Hours)

Yahoo group: Queen_Creek_Hams
Date: 2016-12-18 18:21:20 UTC
From: Joe Sammartino
Topic: 4145 Message: 4145
Attachments: 1 described; binary payloads are missing from this source WARC

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 4 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

Time: Sun Dec 18 6:47 PM
Visible: 4 min
Max Height: 80°
Appears: 10° above NW (from 315 degrees)
Disappears: 47° above ESE (toward 113 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Regards,

Joe, N2QOJ

4147. ☢ RUSS, Radio Under Sun Shade - Also Known as "Rad io in the Park" - RITP, January 7th, 2017 ☢

Yahoo group: Queen_Creek_Hams
Date: 2016-12-21 01:16:51 UTC
From: Joe Sammartino
Topic: 4147 Message: 4147

☢ *RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP, VE Testing *☢

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB (7.158 Mhz also)
- and replicate this recipe several times over in the Valley at the same time

What is the objective?

- Engage in as many contacts as possible across the Valley using a VHF simplex frequency of 146.460 Mhz. while operating off grid power, If possible.

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 3 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio while exercising emergency communications via simplex and off-grid.

**Where and When?* *Queen Creek and Mesa*

January 7th, From 10 AM (1000) till 2 PM (1400).

We have two local RUSS / RITP planned. Dennis, KF7RYX, will host his event at the ball field pavilion behind the Queen Creek West Stake Center (19730

East Ocotillo Road) located near the intersection (just West) of Hawes Road and Ocotillo Road.

BONUS: VE Testing will be provided from 11 AM till 1 PM at the Queen Creek location by Dave, AC7FF, and his VE Team.

If you are looking for an event to visit that is closer to Mesa, Doug, WB7TUJ, will host RUSS / RITP in Mesa at Emerald Park.

If you can't visit the sites, please check in via the frequencies listed above.

Here is a link <http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600> to a map of both locations:

http://aprs.fi/#!mt=roadmap&z=12&call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600

Check out the website links below for more information about local ham radio activity in the Queen Creek and San Tan valley areas.

Thanks Joe, it was 20 some odd years in the making from my first tech exam back in Barrows hall at the University of Maine in the early 90s..

I contemplated and waited for to long to get it done- but I am glad it is finally complete, it met one of my goals of 2016- to get it passed.

I have to say- Being crammed in a plane for 5 hours with nothing but airline coffee, Gordon Wests' Extra exam guide, and the 99 cent Extra class test app for my iPhone was a great way to pass the time and get my confidence and subject matter knowledge up to par. As a side note- rebuilding the Heathkit SB-200 also helped more than I thought it would with the test!

Paying it forward- I will donate my Extra class exam books for FREE to any General who is toying with the idea of upgrading. They only come with one stipulation- I get to hound you every week to study and take your test - UNTIL YOU PASS IT.

So free books and free motivation!
Does it get any better than that?

Jay N1RWY

From: Jay Baack
Topic: 4150 Message: 4151

When you are outside, bring your ht. Set the frequency to 145.800 And leave the squelch OPEN do you hear the static. Since this pass is going to be up to 74 degrees- you should be able to hear the Space stations replying to others earth based stations. It might take a minute or two before you can start to hear the station with any intelligibility due to Doppler and fading.

Another hint- turn your ht antenna sideways so that it is horizontal vs vertical. It will help with reception.

Jay N1RWY

4152. Yuma hamfest Feb 17 & 18th.. road trip?

Yahoo group: Queen_Creek_Hams
Date: 2016-12-21 16:22:01 UTC
From: Jay
Topic: 4152 Message: 4152

Hey all,
Some of us are planning to head down to the two day Yuma hamfest. We would be camping over night on site. Feb 17&18th, two days of looking for those elusive deals and bottom of the box gems.

If you are interested in joining us - drop me an email. I can setup an email list where we can work out the travel and camping logistics.

Note: The dates are a FRIDAY and SATURDAY for the event, with up to three nights of camping allowed. (Th night - Saturday night).

I will be heading down Thursday to get there for Thursday night.

- Jay N1RWY

4154. Arizona Emergency Net - Maricopa, Monday, 26 December 2016

Yahoo group: Queen_Creek_Hams
Date: 2016-12-26 15:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4154 Message: 4154

Arizona Emergency Net - Maricopa reminder
When: Monday, 26 December 2016 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Which of you folks has registered with Amateur Radio Emergency Service? Let me know via direct email.

If you are not a member of ARES, you do not have to be a member of the ARRL to register for ARES.

Fill out the attached form, sign and date it and send to Dennis Bietry at ke7ejf@... . Be sure to mention QCECG somewhere on the form. It doesn't ask for affiliations but you should probably put it somewhere if you are a member of QCECG.

Remember, this is not an application process. It is registration. Once filled out, signed and sent to the ARRL Section Emergency Coordinator, consider yourself registered.

Here's the requirement from http://www.arrl.org/ares:

"Every licensed amateur, regardless of membership in ARRL or any other local or national organization is eligible to apply for membership in ARES. Training may be required or desired to participate fully in ARES. Please inquire at the local level for specific information. Because ARES is an Amateur Radio program, only licensed radio amateurs are eligible for membership. The possession of emergency-powered equipment is desirable, but is not a requirement for membership."

Please drop me a line to let me know you have registered.

Thanks,

Joe, N2QOJ

Ahhh. Its the Thunderbird Hamfest .... lets see .....
Eating....Hamfest...eating....Hamfest....eating....HAMFEST....

Ahhhhh

Sorry guys, I've got RF burns in my DNA ..... I wouldn't be all there if I skip a hamfest to attend breakfast, my eye lids would strobe over dimly glassy eyes.

What a great meeting tonight! Thanks to Joe, Dennis, and Ron for all your work leading the group and to Jay for his presentation about Outfitting your Ham Shack. Also thanks to Brad for his discussion of Mesh and Ham Shack computers. I have pages of notes to review and implement!

The QCECG has started the year off with a bang!

4178. Thunderbird hamfest report

Yahoo group: Queen_Creek_Hams
Date: 2017-01-15 16:20:15 UTC
From: Jay
Topic: 4178 Message: 4178

Hey all,
If you were looking for Lynksys mesh units or Heathkit sb-200 or 220 amplifiers.. this was the hamfest for it. At least 2 dozen mesh units were up for sale, I think most folks are dumping these to upgrade to the ubiquity products.

I only missed out on two deals - one I missed by seconds (a 100W RF concepts 70cm amplifier) for a steal - and a Motorolla 1/2 rack complete with doors. I saw that one and said to myself, I will come back around for it.... Wrong answer.

Plenty of neat stuff for sale and I picked up some odds and ends needed for projects. WELL attended, at least 6 rows deep of vendors. $3 to get in. Was worth it.

Add it to the calendar for next year for sure!

4179. Queen Creek Emergency Communications Group Net, Sunday, 15 January 2017

4180. Arizona Emergency Net - Maricopa, Monday, 16 January 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-01-16 15:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4180 Message: 4180

Arizona Emergency Net - Maricopa reminder
When: Monday, 16 January 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

In anticipation of the next ham mesh networking demonstration by the Queen Creek Emergency Communication Group, an information data sheet has been created for interested hams to review and pursue a bit of self-learning on the subject.

It is attached to this message. If you have a problem with the email attachement, you can download the document here:

http://tinyurl.com/QCECG-Mesh

The mesh demonstration date and time will be announced in the near future.

The folks at AZTHunt Group (that's a treasure/fox hunt group) are having an antenna building party.

AZTHunt J-Pole Antenna Party
Saturday, January 21, 2017
Maps and Information attached.

The AZTHunt Antenna Party will take place from 1 PM to 4 PM in the Community Room of the Chandler Police Department located at 250 E. Chicago St. in Chandler. We will be building twin-lead J-Pole antennas for the two-meter band. Twin-lead and tools will be provided, personal tools are also welcome. Participants will need to supply a short length of RG-58 or RG-174 with the radio connector of their choice.

Open to all hams...

4190. Winter Field Day 2017 with QCARC, Jan 28 1900 UTC - Jan 29th 1900 UTC (Noon to Noon local time)

Yahoo group: Queen_Creek_Hams
Date: 2017-01-22 07:32:37 UTC
From: Joe Sammartino
Topic: 4190 Message: 4190

N7Q is the special event call sign that has been assigned to the Queen Creek Amateur Radio Club for this special event.

Participants will include members of Queen Creek Amateur Radio Club, Queen Creek Emergency Communications Group, East Valley QRP Group, and Mesa R U Prepared.

This event will feature the Winter Field Day 2017 contest. More info here: http://www.winterfieldday.com/

This event combines radio operations with camping fun at Cottonwood Canyon in Pinal County Arizona. You can get directions to this location using this link:

https://www.google.com/maps/dir//33.1855183,-111.3360376/@33.1850918,-111.3373573,934m/data=!3m1!1e3?hl=en

Visitors to the event are encouraged and will have the chance to operate an event station.

The site can also be found via APRS at:
http://aprs.fi/#!mt=roadmap&z=11&call=a%2FWFD&timerange=3600&tail=3600

More info at our QRZ home page: https://www.qrz.com/db/N7Q .

Local event frequencies will be posted later this week. If you make contact with N7Q during the event, you can request a Special Event Certificate of Participation.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4201. HF items for sale (IC-718, SM-30 & MFJ-949E) to QC Hams first

Yahoo group: Queen_Creek_Hams
Date: 2017-02-05 17:39:12 UTC
From: ambroinaz@...
Topic: 4201 Message: 4201
Attachments: 5 described; binary payloads are missing from this source WARC

Hello fellow QC Hams,

I have decided to go a different route with my HF setup. I essentially want to be more mobile (go-box). What that means for me is that I need to part with a few items and purchase some more compact options.

So, I have the following things below I am going to be putting up for sale on Ebay and Craigslist; but I thought before I do that, I would first offer these to the QC group at a lower price first.

Everything is in very good working condition, and you are more than welcome to test them first as well.

1. ICOM 718 w/ SM-30 desk microphone (sold as a pair only)
Both for $475 for QC Hams

HF Compact Multimode Transceiver 160 - 10 Meters with DSP

http://www.hamradio.com/detail.cfm?pid=H0-003490
http://www.hamradio.com/detail.cfm?pid=H0-003490

Desk Microphone - Goose Neck - for Amateur Transceivers with 8 Pin Plug

http://www.hamradio.com/detail.cfm?pid=H0-011024
http://www.hamradio.com/detail.cfm?pid=H0-011024

2. MFJ-949E TUNER, 300W, 1.8-30 MHZ, PEAK CROSS METER, DL,
http://www.hamradio.com/detail.cfm?pid=H0-001313 http://www.mfjenterprises.com/Product.php?productid=MFJ-949E&PHPSESSID=a542605f575a3d911ff256fd216c1fd2
$90 for QC Hams

Let me know if you are interested this week. I'll be putting them up for sale beyond this group on Saturday Feb11 if I still have them.

Thanks,

Andy

4212. Arizona Emergency Net - Maricopa, Monday, 06 February 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-02-06 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4212 Message: 4212

Arizona Emergency Net - Maricopa reminder
When: Monday, 06 February 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Interesting question, Tom - It's TRUE!

It's scheduled every month. Those who can, go, those who can't, don't.

I guess no one could go. Mystery solved.

A more appropriate question might have been, "is anyone going to QCARC breakfast this Saturday?"

4216. ☢ Vintage Ham Gear For Sale ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-02-07 17:15:11 UTC
From: Joe Sammartino
Topic: 4216 Message: 4216
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

A local ham (Don - W7ZOH) passed away a while back and his son, Greg, would like to offer some of his radio gear for sale to our community.

Here are the listed items. Some have information links. You can research the others on your own. All appear to be in good condition.

Greg would like to sell all items together and is asking $600 for everything.

If you are interested, send to me a private email at jsammartino@... (jsammartino
at gmail dot com) and I will put you in contact with Greg.

Let me know if you are interested asap. The equipment looks like it was taken care of very well.

That's (3) good condition vintage transceivers with nice, and useful, attachments. the SBE 33 looks to be the rarest of the bunch.

A pdf with photos is attached. If you have a problem with the attachment, send to me a private email.

Thanks,

Joe, N2QOJ

Last month there were three conflicting events that most hams in the QC
area who usually come to the breakfast attended instead.
I should be there for coffee this Saturday.
I am sure others will be attending as well.

Subject: Gathering Of the Willing
To: Dave Martin <ac7ff1@...>

Greetings To All,
Hello all, it's been awhile since we gathered in the park and played radio. We are planning to get together this evening for a couple of hours and set up and play radio. We will meet in the back of Desert Mountain Park at around 17:00hrs (5:00pm) and go
for a couple of hours this evening. If your not familiar, Desert Mountain Park is at the southeast corner of Hawes and Ocotillo Rd in Queen Creek. We will have a couple of stations set up and will be doing several different modes. Please feel free to bring you equipment and set up and make some contacts. We will be monitoring the Ocotillo Repeater 449.325 (-) 100 PL if you need assistance in finding our gathering location.
Hope to see you there this evening.

73,
Dave Martin

QC Hams,

I have a large Gator box I am selling. I intended on building a radio go-box with it, but this one is a little too big for what I wanted to do at 23"L x 19"W x 20"D. It is used but in good shape. It doesn't have a key for the locks.

Offering it up here for $95.

Thanks,

Andy

4231. FT-8800 for sale

Yahoo group: Queen_Creek_Hams
Date: 2017-02-12 18:45:48 UTC
From: ambroinaz@...
Topic: 4231 Message: 4231
Attachments: 4 described; binary payloads are missing from this source WARC

QC Hams,

I pulled the trigger just now and purchased a new FT-857D from HRO. I know, I know... My bank account is now decimated. However, in order to recover, I am selling my FT-8800.

Offering the FT-8800 here to QC Hams first for $225.

It is very lightly used as it has only been used in my home office and never "mobiled". I have the original boxes from when I bought two of these radios from HRO in late 2014 (one remains in my truck). It also includes the separation kit which has never been used. I personally did the extended transmit MARS/CAP mod on the radio as well. Radio is in mint condition and functions as expected.

Let me know if your interested via cell phone. If no QC takers, I'll throw it on Craislist/Ebay at a higher price in a few days.

thanks,

Andy

4233. Ham Mesh Network Information - source list

Yahoo group: Queen_Creek_Hams
Date: 2017-02-13 04:18:40 UTC
From: Joe Sammartino
Topic: 4233 Message: 4233
Attachments: 1 described; binary payloads are missing from this source WARC

In anticipation of the next ham mesh networking demonstration by the Queen Creek Emergency Communication Group, an information data sheet had been created for interested hams to review and pursue a bit of self-learning on the subject.

A second data sheet describing the prevailing amateur radio mesh networks and the recommended mesh network node components for QCECG members is attached to this message.

If you have a problem with the email attachment, you can download the document here:

http://tinyurl.com/QCECG-Mesh2 <http://tinyurl.com/QCECG-Mesh2>

The mesh demonstration date and time will be announced in the near future.

4234. Arizona Emergency Net - Maricopa, Monday, 13 February 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-02-13 15:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4234 Message: 4234

Arizona Emergency Net - Maricopa reminder
When: Monday, 13 February 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

This was a really good primer Joe. Thanks for sending.
So If I understand this correctly, if all QC Hams put up a mesh node at our house, configured it on the same channel pair, and configured it with the same SSID, then provided our nodes were within reach of at least one other mesh node they would connect to each other in peer to peer fashion and we would have just extended the mesh network? Andy KG7KWG

4239. Gathering In the Park

Yahoo group: Queen_Creek_Hams
Date: 2017-02-22 01:03:49 UTC
From: Dave Martin
Topic: 4239 Message: 4239

Greetings All,
I hope everyone had a great Presidents day and for some I hope you enjoyed the day off from work. Unfortunately I had to work but on the up side, we were slow so all is well. We will be gathering tomorrow evening in our usual place at Desert Mountain Park in the rear near the restrooms. For those that might not be familiar with Desert Mountain Park it is located at the southeast corner of Hawes and Ocotillo Rd. If you drive to the very back of the park you will see the restroom building and we will be just south and east of the building. We plan on meeting at around 17:00hrs and will go 2-3 hours or until we have get tired. We will have at least 3 stations set up and will be doing different modes and bands. If you have nothing else going on and want to come out and play radio or want to bring your own equipment please bring it and play radio with us. I will probably be doing my usual Morse Code station. I hope to see some of you tomorrow night to play radio in the park.

73,
Dave Martin

From: Joe Sammartino
Topic: 1734 Message: 4242

Folks,

Dennis, Ron, and I had the opportunity to repair/enhance the performance of the Queen Creek Repeater located at the Queen Creek Municipal Services Building.

449.475 MHz, PL 136.5 Hz

Please use it from home and while away from home. We would like some comparative feedback from as many different operators as we can get. Analog and Digital operations are encouraged for this Fusion repeater.

Initial testing shows a very noticeable improvement in RF foot print and in signal/audio quality.

Thanks,

Joe, N2QOJ

Joe,

I am not sure if this information is listed somewhere else, but is this repeater Wires X capable as a node as well, or just a Fusion (analog / digital) repeater? I live down at Power and Chandler Heights and I believe I can hit the repeater with no issues, but I've not heard any traffic on it when i do actually dial it up.

Thanks for your time,

George Bollinger

From: ambroinaz@...
Topic: 4250 Message: 4250

Been reading a lil bit about Yaesu digital (system fusion). From the looks of it, there are just a few transceivers right now that can go digital... Such as FTMDR & FTM400... Seems like an exclusive club if you ask me. ;)

Inserting glossy brochure which is sure to lure you into spending more money...
https://www.yaesu.com/pdf/System_Fusion_Text.pdf
https://www.yaesu.com/pdf/System_Fusion_Text.pdf

Is there any accessory add-ons, digital mods or some hack out there that can get you going wth system fusion on other yaesu FM radios? It would seem there might be a market for this...

Andy

Andy,
First let me state that I have never used the mode. (Fusion)- However, I believe that it is also called C4FM, and is available in other radios (Yaesu) as well- such as the 991 and 991a, ftm100dr, ft-1xdr and others that you have mentioned.

Again- never used the mode.. and for the near term- don't think I will be.

4252. RE: [Queen_Creek_Hams] Transceiver add-ons for Yaesu System Fusion?

Yahoo group: Queen_Creek_Hams
Date: 2017-02-27 15:03:48 UTC
From: Dennis Lawrence
Topic: 4250 Message: 4252

Hello Andy,

There are a lot more Yaesu Fusion systems out there than you think. Well over a dozen people have fusion radios here in Queen Creek. Also, the QC repeater is a Fusion Repeater. It will automatically switch to whatever mode is being used…C4FM or FM Analog. There are at least a dozen or more Fusion repeaters around the valley.

Yaesu has shown that they want to be a dominant force in this digital market, so I do believe it has a solid future.

I have used it on many occasions and it definitely has some advantages over FM Analog. By having a radio that is C4FM capable does not limit your use of FM Analog in any way. All fusion radios give you the capability to use either mode.

Dennis

4253. Arizona Emergency Net - Maricopa, Monday, 27 February 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-02-27 15:55:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4253 Message: 4253

Arizona Emergency Net - Maricopa reminder
When: Monday, 27 February 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4254. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-02-27 16:51:02 UTC
From: Dave Martin
Topic: 4254 Message: 4254

Greetings All,
EVQRP group plans on meeting this week on Wednesday evening at 17:00hrs in Desert Mountain Park in the back of the park. For those that are not familiar,Desert Mountain Park is located at the south east corner of Hawes and Ocotillo Rd. We will be located near the rest room building in the back of the park. As always we will have 3 of our stations set up for folks to use and ask questions. Usually we have a Phone, CW and a Digital station up and running. Please feel free to bring you own gear to set up and play radios in the park with us. We usually go around to around 20:30-21:00hrs for operating. I hope to see all of you there Wednesday evening. We will be monitoring the Ocotillo and Queen Creek repeaters if you should need directions to our location. Have a great week and hope to see ya there!!

Dave,
AC7FF

Dave,
I will be there for the duration on Wednesday (I got approval from the wife). I plan to bring my new buddistick and newly built go box for a test run and for inputs from our QC Elmers. Andy KG7KWG

4260. Fwd: Request for QCECG Volunteers for QC Block Party

Yahoo group: Queen_Creek_Hams
Date: 2017-03-01 14:23:09 UTC
From: Joe Sammartino
Topic: 4260 Message: 4260
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

See the attached from Joe LaFortune.

We need volunteers for Saturday. Please let me know if you can participate
ASAP.

Thanks,

Joe, N2QOJ

---------- Forwarded message ----------
From: Joe La Fortune <joe.lafortune@...>
Date: Mon, Feb 27, 2017 at 6:48 PM
Subject: Request for QCECG Volunteers for QC Block Party
To: Joe Sammartino <jsammartino@...>, Dennis Lawrence <
kf7ryx@...>, Ron Earl <ronearl@...>

Gentlemen,

I apologize for the late notice on this request. Denis and I briefly
discussed this item at the February monthly training but my time has been
consumed by the Fire Station #1 and Public Safety Building projects. I
have received a request from the Town's Recreation Services Division for
volunteers to assist with communications and parking for the QC Block Party
event on *Saturday, March 4, 2017*. Volunteers will be needed from *11:30
- 6:00 p.m.*

Here is a link to the event page on the Town's website,
*http://queencreek.org/departments/parks-recreation/special-events/queen-creek-block-party
<http://queencreek.org/departments/parks-recreation/special-events/queen-creek-block-party
>*

This is a new event for QCECG. The event will be in the Town Center
similar to the Trunk or Treat event. Ellsworth Road will be closed from
Ocotillo Road to Rittenhouse Road.

There will be no shuttle buses used for this event. We will be assisting
Parks and Recreation with moving traffic around the

Volunteer roles to fill first:

- One (1) QCECG member will be needed as net control

- Two (2) QCECG members at Public Parking #1 on the northwest corner of
Ellsworth and Maya Roads.

With the use of Town Center, there are a number of public parking locations on dirt lots that will be available.

- Two (2) QCECG members at Public Parking #3, #4, and #5 to assist citizens with parking direction.

- Two (2) QCECG members at Public Parking #6 (Library North) and #7 (Library South) to assist citizens with parking direction.

I am open to operating two shifts of volunteers:

1st Shift: 11:30 a.m. - 2:45 p.m.

2nd Shift: 2:45 - 6:00 p.m.

Thanks,

Joe

Hello Joe,

I can assist with this event. If you would please, pair me with someone that has done one of these before so I can learn the ropes. I am the newbie in the crowd but willing to do my share. Any advice on what to bring to prepare for the event would also be helpful.

Gentlemen,

I apologize for the late notice on this request. Denis and I briefly discussed this item at the February monthly training but my time has been consumed by the Fire Station #1 and Public Safety Building projects. I have received a request from the Town's Recreation Services Division for volunteers to assist with communications and parking for the QC Block Party event on Saturday, March 4, 2017. Volunteers will be needed from 11:30 - 6:00 p.m.

Here is a link to the event page on the Town's website, http://queencreek.org/departments/parks-recreation/special-events/queen-creek-block-party

This is a new event for QCECG. The event will be in the Town Center similar to the Trunk or Treat event. Ellsworth Road will be closed from Ocotillo Road to Rittenhouse Road.

There will be no shuttle buses used for this event. We will be assisting Parks and Recreation with moving traffic around the

Volunteer roles to fill first:

· One (1) QCECG member will be needed as net control

· Two (2) QCECG members at Public Parking #1 on the northwest corner of Ellsworth and Maya Roads.

With the use of Town Center, there are a number of public parking locations on dirt lots that will be available.

· Two (2) QCECG members at Public Parking #3, #4, and #5 to assist citizens with parking direction.

· Two (2) QCECG members at Public Parking #6 (Library North) and #7 (Library South) to assist citizens with parking direction.

I am open to operating two shifts of volunteers:

1st Shift: 11:30 a.m. - 2:45 p.m.

2nd Shift: 2:45 - 6:00 p.m.

Thanks,

Joe

Joe LaFortune, MPA | Emergency Management Coordinator, Fire & Medical Department | Town of Queen Creek | phone: 480-358-3502 <tel:(480)%20358-3502> | cell: 480-797-4854 <tel:(480)%20797-4854> | fax: 480-358-3133 <tel:(480)%20358-3133> | e-mail: joe.lafortune@... | 22350 S. 4264. QC Block Party - Volunteers Needed for Saturday, March 4th

Yahoo group: Queen_Creek_Hams
Date: 2017-03-02 10:07:52 UTC
From: Joe Sammartino
Topic: 4264 Message: 4264
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

The Town of Queen Creek has requested 15 volunteers to provide support at the event parking lots. Communications is not the primary aspect of this event but still a component.

So far, we have only (7) volunteers for this event. Here is a description of the key aspects of this event:

- Volunteers will be needed from *11:30 - 6:00 p.m.*

- Here is a link to the event page on the Town's website, *http://queencreek.org/departments/parks-recreation/special-events/queen-creek-block-party <http://queencreek.org/departments/parks-recreation/special-events/queen-creek-block-party >*

- The event will be in the Town Center similar to the Trunk or Treat event. Ellsworth Road will be closed from Ocotillo Road to Rittenhouse Road.

- We will be assisting Parks and Recreation with moving traffic around the public parking lots.

- Volunteer roles to fill first:

- One (1) QCECG member will be needed as net control

- Two (2) QCECG members at Public Parking #1 on the northwest corner of Ellsworth and Maya Roads.

- With the use of Town Center, there are a number of public parking locations on dirt lots that will be available.

- Two (2) QCECG members at Public Parking #3, #4, and #5 to assist citizens with parking direction.

- Two (2) QCECG members at Public Parking #6 (Library North) and #7 (Library South) to assist citizens with parking direction.

- Two shifts will need to be manned:

- 1st Shift: 11:30 a.m. - 2:45 p.m.
-
- 2nd Shift: 2:45 - 6:00 p.m.

If you can volunteer for one or both of these shifts, please let me know asap by direct email.

A map of the event illustrating the public parking lots is attached. Once we have a final roster of volunteers, information will be sent out indicating meeting areas, shift assignments, etc.

Regards,

Joe, N2QOJ

Thank you or volunteering!

Please report to the event at 11:15 to 11:30 am tomorrow morning and check in on the Queen Creek repeater at 449.475 MHz PL 136.5 Hz. Proceed to the Recreation Annex Main Door at the North East corner of the QC Library building.

Same meeting place for those of you volunteering for the second shift. As you can see from the distribution list, we did not get as many volunteers as was requested. We will do the best we can.

Be sure to have your radio, appropriate clothing, your vest if you have one.

If anyone else can volunteer, please let me know.

Regards,

Joe, N2QOJ
